

Estimated as Free Hundred Barrel Oiler!

Makes Uncle Sam Refinery Eleven-Hundred-Acre-Lot-Forty-Three-Osage Worth a Million Dollars

Room for 228 more just like it on this one tract. Cherryvale Uncle Sam Refinery operating full blast. Four drills running day and night. Work on Cherryvale-Missouri River Pipe Line going ahead with a vim. Part of the machinery now on the road for Uncle Sam Refinery No. 2, on the Missouri River at Atchison.

Can You Afford to Turn Down an Investment in This Growing Enterprise?

You probably have often read of the Uncle Sam Refinery at Cherryvale, Kan., and have about made up your mind to invest some of your idle money in this growing enterprise. If this is the case, don't delay another minute, for good fortune continues to favor this grand independent company—one that is cutting its way through to success in the Western oil fields, regardless of any and all difficulties and oil trust interference.

One of the Greatest Oiler Among Great Oiler.

Every man who is acquainted with the movements of an independent refinery knows that it is of the utmost importance for the refinery to own its own oil production. The Uncle Sam company altogether own and control over 32,000 acres. On these properties there are now ninety-two producing oilers. However, the striking of the big well on lot 43, Osage, by the Uncle Sam company marks the beginning of a new career for this giant enterprise. Consider, if you please, what even a 50-barrel oil well means. Then think even what 100 barrels daily means. Then shut your eyes and take a jump into what seems almost impossible and consider what a 200-barrel well will do in the way of making a company's bank account grow. Then take your pencil and figure the profits of a 1,500-barrel well and you will know what a fortune maker the Uncle Sam company have been fortunate enough to discover one of their holdings. Lot 43, Osage, about five miles southwest of Bartlesville, contains 1,100 acres. As before advertised, it is in line with the greatest oilers ever secured in the west, and while some knockers laughed at the predictions of the management of the Uncle Sam company when development commenced at this location, however the real thing can now be seen and there is one of the greatest oilers ever drilled into the oil sand in the western oil fields now on this lot 43, and there is room for 228 more just like it. This one property when developed would make the entire capital stock of the Uncle Sam company worth \$1.00 per share, let alone one great refinery and thousands of acres of more oil lands and nearly one hundred other oil wells and miles of pipe lines and other properties of the Uncle Sam company. Oil men who have been at the well since it started to flowing through a 1,600-foot hole claim that when completed this well will make from 1,200 to 1,900 barrels of oil on the start. These opinions are based on what other oilers have done under like circumstances. The oil is high grade and worth \$1.00 a barrel to the Uncle Sam company to make into refined oil.

Stock Will Be Sold at the Same Old Price a Few Days Longer.

Hundreds of investors have purchased stock in the Uncle Sam company at the present price offered in this announcement. Now with this great oil secured and with property that cost the

PHOTO OF A PIPE LINE SQUAD.

This is a picture of a group of teams loaded with pipe for the Cherryvale-Missouri river pipe line. Forty-three miles of this pipe is now on the ground and is being laid. Every minute, hour and day the work is now going ahead with a vim. With a great oil production to start with, four drills bringing additional oil and work starting on the Atchison-Missouri river refinery HOW IN THE NAME OF COMMON SENSE can the refinery stock help but go to at least \$1.00 per share? Let reason reign and secure some of this valuable stock by return mail. \$56.00 will buy five thousand shares. Par value of five thousand shares is five thousand dollars.

company only about one-third of a hundred thousand dollars is now proven to be worth close to a million dollars in increases the assets back of this stock almost a half. Stock at the price that it was selling at before this great well was secured is now a snap, a bargain, is dirt cheap and cannot last long at these prices.

Three or Four More Wells Like this Will Build the Atchison-Missouri River Refinery and Complete the Pipe Line Now Building.

The Uncle Sam company is a great growing enterprise. It will take hundreds of thousands of dollars to complete the great work. However, it will not be necessary to sell much more of the stock to do the work with even three more producers like the one just completed. Stop and think a minute before you turn down an investment in this company. It is doing things, it is on the square, it has gone by the doubtful stage if there ever was one, and is coming in on the home stretch far ahead of the most enthusiastic ex-

pectations of its friends and managers. It is a winner and if you fail to get in now before the stock doubles in price you will want someone to kick you inside of a year, for the Uncle Sam stock is not going to stop with a FEW CENTS' VALUATION; IT IS GOING TO PAR OR \$1 PER SHARE.

Telegrams Pouring in for Stock With Heavy Remittances by Every Mail.

The company is in telegraphic communication with over 400 investors. Men are coming in on every train to see the big well and are buying the stock. The Uncle Sam company has over 5,000 stockholders, big and little. Seventy-five per cent of them are increasing their holdings. Now is the time for you to accept opportunity while it knocks at your door and line up with the Uncle Sam refinery while you can at present prices.

Send for Fifty Photographs of the Refinery and Different Views of Our Oil Fields.

We do not care where you live, whether it is on the Pacific or Atlantic

coast or Canada or Old Mexico or Philippine Islands. The Uncle Sam company has stockholders everywhere, and is prepared to furnish every prospective investor with pictures from the field showing the great work just as you would see it were you here. We have a fifty-picture four-page photographic view and will mail this to you, with other information, upon request.

Company Will Be Able to Realize Over Four Hundred Thousand Dollars from the Balance of the Stock.

You can figure for yourself the strength back of the Uncle Sam company. They now have properties worth on a conservative basis more than 12 cents per share for every share of stock issued. Sixty-eight per cent of the stock is now held by men who have purchased same, all over America. With the balance of the stock placed even at the present price will net the company considerably over FOUR HUNDRED THOUSAND DOLLARS. THERE IS NOW SUBSCRIBED ON GILT EDGE INSTALLMENTS OVER

ONE HUNDRED AND TWENTY-FIVE THOUSAND DOLLARS for stock already allotted from the treasury. Don't wait until all this money is raised and until the pipeline to the field showing the great work just as you would see it were you here. We have a fifty-picture four-page photographic view and will mail this to you, with other information, upon request.

Part of Machinery for Atchison Refinery is on the Road.

Business men of Atchison have given the Uncle Sam company lands and other considerations worth close to Eight Thousand Dollars. They did this after they sent a committee to Cherryvale and investigated Uncle Sam refinery No. 1 and oil holdings. The company will complete the Cherryvale-Missouri pipe line to Atchison, fifty-

eight miles due north of Cherryvale, on the Missouri Pacific railroad, where it will tank car the oil from this point to the Atchison refinery until the balance of the line can be built. In other words, the refinery at Atchison will be built at once. There is nearly enough pipe now on the ground to build the pipe line to Atchison. A line will be built at once connecting the Uncle Sam Cherryvale refinery with lot 43, near Bartlesville, where the big wells are. Now, don't this kind of work look practical to you? Don't you see this company is following safe, conservative lines and will win? There is 350 per cent profit in refining oil. We have proven to the world that the company has the oil and with the stock sold can complete both pipe lines and another refinery, and it is just a matter of a few months until the value of this stock will grow to \$1.00 per share and continue to grow.

Uncle Sam Company is Selling Refined Oil.

The company is delivering refined oil to twelve different cities near Cherryvale. Tank wagons are arriving. Twenty-four tank station storage tanks are on the road, and will be stationed all over Southern and Central Kansas during the next fifteen days. YOU WILL NEVER HAVE THE OPPORTUNITY AGAIN TO BUY STOCK AT THE OLD PRICE. GET IT NOW AND SECURE ADVANTAGE OF THE ADVANCE.

For a few days longer you can buy stock at the old price as follows. If you don't see this advertisement when it first appears, better telegraph:
