Another interesting point was brought out by Mr. Hughes just before the close. Edwin F. Devlin, real estate manager for the New York Life Insurance company, was called to continue his testimony of of the company's properties in this country. and abroad. Mr. Devlin had had to consult the records and he presented a number of transcripts of the records. It developed that the New York Life had ac-

McCall Charges Blackmall.

Mr. McCall on this question made the startling information that three-quarters of the bills affecting life insurance companies were in the nature of blackmail. The officers of the company were worried at the beginning of each year, he said, by the proposal of laws that would hamper their companies, and these officers "really trembled at what they would have to endure the first six months of each year." While Mr. Hughes was engaged in tooking up some document, Chairman Armstrong took the opportunity to ask Mr. McCall if he had ever given any thought as to the feasibility of a standard policy that could be written by all companies Mr. McCall said he had, and he thought some such policy would be a good thing.

Rufus F. Weeks, actuary and accord vice president of the New York Life Insurance company, was another witness today. He FLURRY IN MONEY ON CALL went into the technical description of the various forms of policies, the tables upon Rate Raised to Seven and One-Quarter which the cost of life insurance is computed and various other computations of his department.

The committee adjourned until tomorrow morning, with Mr. Devlin still explaining the real estate holdings of the company.
