

GRAIN AND PRODUCE MARKET

Big Bull Interests Will Control the Situation. WHEAT RULES HIGHER AND STEADY. Very Few Transactions Take Place—Evidences of Armour's Buying in Corn and Prices Are Up—Oats Firmer.

OMAHA, Oct. 5, 1905. Wheat ruled higher and steady, with very light transactions. Armour seemed to be in absolute control and bought whenever necessary to strengthen the market. Little was offered for sale. Local traders say they see nothing bullish in the situation except the Army's buying of wheat for the army and navy to strengthen the market. December closed at 84 1/2 and 84 1/2.

Considerable strength was shown in corn. There were evidences of Armour's buying, although it was not necessary for him to purchase so frequently as in the case of wheat. December was up about 1/2. December closed at 24 1/2 and 24 1/2. Oats were higher in all months. There was a transaction in 1905 at 24 1/2 over yesterday. December closed at 24 1/2 and 24 1/2.

Clearances were 200,000 bushels of corn and 8,000 barrels of flour. Primary wheat receipts were 47,000 bushels and shipments 45,000 bushels. Corn receipts were 55,000 bushels and shipments 53,000 bushels. Oats receipts were 68,000 bushels and shipments 20,000 bushels.

Table with columns: Month, High, Low, Close, Year. Rows for Wheat, Corn, Oats, Rye, Barley, etc.

NEW YORK STOCKS AND BONDS

Rate for Call Loans Reaches Highest Point of the Year. TRADING DULL AND CONSTRAINED. General Belief that Firmness in Money Market Will Last Several Weeks Causes Caution Among Speculators.

NEW YORK, Oct. 5.—The call loan rate touched the highest level of the year at 10 per cent today and the stock market was generally firm. The market was further strengthened by moderate demand from a leading bull. Weather in the north was today very decidedly favorable for the movement of the new crop. This fact, however, was apparently ignored, as the wheat market was not so much affected as it was after the opening of the new crop.

In today's market, however, there was a noticeable buyer in the day, who was believed to be the principal support. This was necessary to prevent any decided decline in the market. The wheat market was steady, with prices for the month of October equal to 25,000 bushels. Primary receipts were 1,250,000 bushels, compared with 1,100,000 bushels a year ago.

Sentiment in the corn pit was bullish, with trading continued. Clear weather throughout the corn belt. Commission houses were active buyers the entire day. Buying of May the principal feature. One of the features of the trading, selling was mainly by a leader of the bears. Corn receipts were 55,000 bushels and shipments 53,000 bushels.

Provisions were steady as a result of an advance in the price of live hogs. At the close of the day, the market was 1/2 higher than at the opening. Estimated receipts for tomorrow: Wheat, 41 cars; corn, 123 cars; oats, 229 cars; hogs, 1,200 head.
