The explanation given is that while Mr. Roosevelt is not opposed to some revision of the tariff, he is far more concerned with the question of railway rate regulation and will consequently appears to be that the administration would assume too much if it should undertake to push through the two propositions of tariff revision and rate regulation, and in the judgment of the president there is more to be gained for the general good in the latter than in the former.

It was recently announced, probably without official sanction, that Russia would leave 500,000 men on the ground where the peace treaty checked its continued retreat. Later advices put the number at 300,000. While it is readily believed that so large a force has in it somewhat menacing to Japan, inasmuch as economical consideraions will doubtless lead to a quick reduction of the Japanese army, inasmuch, also, of the United States has no imitators as Russia's strength is greater on land than on the sea, it is alleged that Russia's purpose in keeping this force is primarily to threaten the Chinese, whose ntolerance of the white race continues to be shown in the objection to German traders in their country, and who are not unlikely to be influenced to new forms of old hostility by the success of their blood relatives, the Japanese. Still, there is another reason for the retention of this army at a long distance from the Russian capital, and it is that the soldiers are not trusted at home. In any country where the army is maintained by enforced drafts there is certain to be discontent, but in Russia more than in most others, since no discrimination is made which excuses heads of families, or members of peace so cleties, or of religious organizations that disbelieve in war, from military service. The very multitude of the soldiers is an element of weakness in one sense, for where the caar has brought together men of different race, creed, speech and political opinion, their officers do not invariably rouse their trust or respect, and are serving a government with which many of them are at odds.

Sir John Wilson died in 1856, but Captain Wilson refused to touch a penny of it, with the result that the estate has remained for forty-nine years unadministered. Now the crown inherits both fortunes. Says the London Chronicle: "It has very rarely happened that so large an estate as Captain Wilson's falls to the life, had only one or two as large. Although the aggregate amount which annually reverts to the crown in the case of persons dying intestate, without known heirs, is considerable, it is chiefly made up of a number of very small estates, and there are usually many claimants. The ghastly vote of Philadelphia has been reduced still further by striking off the names of revolutionary patriots, long since dead and forgotten.

Just as dime museums are declining in popularity, a Baltimore officeholder protested against having his salary raised. He doesn't need the money. In Philadelphia the discredited politicians driven from the mealtub by Mayor Weaver

are obliged to buy advertising space in the newspapers wherein they boost the superior qualities of their ticket. One onesome newspaper sticks to the gang. Considerable insurance money is said to have dropped into various juckpots, and the nquisitors are anxious to turn a searchlight on the game. The spectacle will

justify the effort. Major Carson, Washington correspondent of the Philadelphia Ledger, commenting on the approaching battle for rate regulation in congress says: "That Theodore Roose velt is going to have the labor of his life in jamming rate regulation down the throat of the United States senate is a fact increasingly plain each day. The senate is not only hostile to such legislation, but is full of secret enemies of the president. From corridor to corridor the senate chamber is honeycombed with men who, while avowing for publication their oyalty to the president, would esteem it the chief joy of their lives to thwart him."
