COME AT

Foreign Markets Lower Grains-Trade in Corn Light and Trend is Toward Lower Level.

The wheat market was firm early on amalier northwestern receipts and on buying by the bull interests. This took the edge off local bearishness. The last hour, however, support was apparently withdrawn and the market turned weak. Liverpool was lower, affected in part by freer offerings of Manitobs wheat. A cable from Argentina says the locust pest is extending, but there is no damage yet. Prospects for the 1968 wheat crop are encouraging. December closed at 85%c, and May at 85%c. OMAHA, Oct. 14, 1905.

ing. December closed at 85%c, and May at 85%c.

The trade in corn was light and the trend of the market was toward a lower level. The current month was weak, reflecting the prospect of an early movement and a falling off in cash demand. December closed at 44%c, old December at 86c, May at 43%c, and July at 5%c.

Oats worked off about %c during the seasion. The export demand continues good. December finished at 25%c, May at 85%c, and July at 19%c.

Liverpool closed %d lower on wheat and 36%d lower on corn.

Frimary wheat receipts were 1,175,000 bushels and shipments (50,000 bushels last year and shipments of 16,000 bushels. Corn receipts were 285,000 bushels and shipments 825,000 bushels and shipments 67 289,600 bushels and shipments 67 289,600 bushels and shipments 67 289,600 bushels of onts, 185,000 bushels of corn. 211,000 bushels of onts, 185,000 bushels of wheat and 30,000 bushels. Broomhall's estimate of arrivals of breadstuffs into the United Kingdom during the last week is 4,400,000 bushels. Australian wheat shipments for the week were 125,000 bushels, against 146,000 bushels for the previous week and 518,000 bushels fast year.

Liverpool wheat prices have advanced equal to 24c in three days, while Chicago is off. All foreign markets have strengthened the last week, while prices in Chicago have shown a tendency to weakness, although December is %c higher than a week ago.

have shown a tendency to weakness, al-though December is %c higher than a week

though December is %c higher than a week ago.

From the Record-Herald: "Receivers attribute the increased sales of oats by the country to the desire of farmers to get ready for corn husking next month. While they count on a big run of oats during the next two weeks, they are figuring on small receipts thereafter. This they admit is phenomenal, but they claim also it is a phenomenal crop and a phenomenal year for getting it in shape for market."

New York wired: "Ocean freights are at a standstill for the present, as shippers will not make fresh engagements until sure they can get their grain to the seaboard. Rates hold firm, however, and probably will remain so until there is more ocean room. New York exporters are not trying to work new business until the rail situation clears up, and they will be careful in the future not to be caught again in their present deplorable position, which may mean heavy losses, due to their inability to fill ocean freights."

CHICAGO GRAIN AND PROVISIONS Features of the Trading and Closing

Prices on Board of Trade. CHICAGO, Oct. 14.—Influenced by spe lative operations on a large scale, the wheat market was a "skyrocket" affair today, going rapidly up and then dropping back. The close showed a loss of 1494c for December. Corn is down 14c. Oats closed 14c off. Provisions are off 21495c to 714c.

closed \$4c off. Provisions are off 24/90c to 714c.

Heaviness in wheat at the start vanished before brisk buying, led by brokers for a prominent grain operator, who for a time absorbed all offerings. December opened a shade lower to a shade higher, at \$5% to \$5%, and was bid up to \$64c. The buying was on a very liberal basis, and estimated in the aggregate at 1,000,000 bushels. The market assumed every appearance of buillishness, although the news was not of in the aggregate at 1,000,000 bushels. The market assumed every appearance of bullishness, although the news was not of an influential character. While the bullishness was in full swing the leader in the buying movement withdrew his support and simultaneously came reports from the northwest that liquidation was in progress for the same operator. The early buyers began unloading and a break in prices resulted. The December option declined to 554,9554c under the pressure. Sufficient buying orders at the decline were filled to advance December a shade from the bottom, the close being easy, at 554c. Primary receipts were 1,750,000 bushels, compared with 1,244,000 bushels a year ago. Clearances of wheat and flour were equal to 250,000 bushels. Minneapells, Duluth and Chicago reported receipts of 763 cars, against \$24 cars last week and \$97 cars a year ago.

Trading in corn was lifeless but the

Duluth and Chicago reported receipts of 163 cars, against \$34 cars last week and \$97 cars a year ago.

Trading in corn was lifeless, but the market had a firm undertone, due to a break in the weather west, entailing a possibility of interference with movement of the new crop. December started unchanged to a shade higher, at 44% to 44%@44%c, became firm at 44%c with the upturn in wheat, but declined later and closed at the bottom price for the day, 44%c. Local receipts were 341 cars, with \$3 of contract grade.

Oats were firm at a slightly lower range. There were moderate realizing sales and some in the way of hedges by cash interests against increased country offerings and heavier receipts. A good demand developed on the declines and saved the market from consequent losses. December closed at 28%c, after ranging between 28%c and 28%c. Local receipts were 444 cars.

Holders of deferred ontions to provisions.

28%c, after ranging between 28%c and 28%c. Local receipts were 44 cars.
Holders of deferred options in provisions showed a disposition to sell at the start, but offerings were readily taken by prominent speculators and the market held firm at a small decline. January pork closed 7%c down, at \$12.55. Lard is 5c off. at \$6.90. Ribs are 2%@5c lower, at \$5.57%@6.60. Estimated receipts for Monday: Wheat, 50 ears; corn, 209 cars; oats, 406 cars; hogs, 37,000 head.

The leading futures ranged as follows: Articles. | Open. | High. | Low. | Close. | Yes'y. 45% (6 % 44%) 4 43%

Liberal runs had been anticipated for Cattle Steady-Hogs Five Cents Lower this week, but as the beef steers, both

this week, but as the beef steers, both corn-feds and rangers, failed to show up the market gradually took on more strength day after day until at the close of the week values are all of 150% higher than they were at the close of last week. The trade was active every day at the advancing prices, as there was a good healthy demand for all desirable killers. Most days the market opened in good season in the morning and a reasonably early clearance was

market opened in good season in the morning and a reasonably early clearance was effected. All in all the market has been in a most satisfactory condition this week from start to finish.

Nearly everything that has been said regarding the steer trade would apply equally well to the market on cows and heffersthat is, prices for the week are 1525c higher and the trade has been in a good healthy condition. The advance was due to the disappointingly small receipts and the very good local demand. There appears to be a large consuming demand for cow beef and quite large runs are required at this point to supply the requirements of the trade.

Biockers and feeders have not shown very

to be a large consuming demand for cow beef and quite large runs are required at this point to supply the requirements of the trade.

Stockers and feeders have not shown very much change as regards prices this week. The demand and supply have been so nearly equal that there has been no occasion for any decided change in values in either direction. The cattle that have arrived have sold to good advantage all the week and the trade on most days has been reasonably active, but the cattle have sold in about the same notches as last week.

HOGS—It was the same old story in the hog yards this morning—that is, an uneven and uncertain kind of a market, closing slow and easier. Some of the first sales, if anything, were a little lower than yesterday, but later good hogs sold at just about steady prices, and the average market was not far from steady with yesterday. When once under way the trade was fairly active, so that the most of the hogs changed hands in reasonable season. Heavy hogs sold largely at \$5 and under, with good medium weights largely at \$5.06-56.10 and good lightweights on up to \$5.5.

As has been pointed out in these columns several times of late the hog market at this and all other selling points is in a rather peculiar condition—that is, not to the liking of any one. The feeling is general among packers at all points that hogs are too high as compared to the provision market and they are reluctant to store away cured meats until they can get the price down. As a result they are limiting their operations largely to taking care of the fresh meat trade. It happens that there is a good demand for fresh meats and at the same time a moderate supply of hogs, there opens with a decent demand for the deairable loads and at fair prices. After this demand is satisfied the packers pound down what is left, causing the market to close duil and lower most every day. But the next time a moderate supply of hogs, there working hard packers succeeded in getting the average a fraction under \$5 on the good kinds, only to

DRUIDING'S FINANCIAL REVIEW

be interested in speculative accurities we have made arrangements with Mr. F. G. Druiding of Chicago, an expert writer on financial topics and delineator of stock exchange probabilities, to furnish a weekly review of the salient features of current inancial topics gleaned from the various

We desire, however, on the part of The Ree to disclaim all responsibility for the ac-curateness of any forecast Mr. Druiding may make concerning future prospects of any investment or enterprise.

All special inquiries about the present or prospective value of any particular seurity should be addressed direct to Mr. F. G. Druiding, No. 524 First National bank building, Chicago, Ill.

CHICAGO, Oct. 14—(Special.)—One of the most preminent speculators, who has been on the right side of the market continuously for the last year, has just returned from an extensive trip in the east, where he made a very minute and cautious examination of the conditions affecting the market at the present time. His opinion of the prevailing condition concurs with mine. He says that although trading has been extensive, and the volume of business not at all disappointing, orders are all on a very large scale. One hundred share lots are not to be found on the books of the New York brokers. In other words, the public is not in the market. The most strenuous efforts have been made by eastern financiers to coax or interest the public in Wall street at the present time, but their efforts have been unavailing.

Although the general prosperity of the CHICAGO, Oct. 14 .- (Special.) -- One of the

In Wall street at the present time, but their efforts have been unavailing.

Although the general prosperity of the country is an uncontrovertible fact, and even though our crops have been realized, and the demand for them is upprecedented, and though it must be apparent to everyone that the tron and steel industry, and industries in general, are in a healthy condition financially, yet the public will not come into the market, although our export prices for the farming and agricultural products continue on the present satisfactory basis. There are but few disturbing factors to offset such resy conditions, chief among which is the labor agitation and the moderate excitement of the markets. But neither of these conditions are sufficient, under normal conditions, to act as a check upon a market which has such strong manipulators behind it. The public is wary, and the reason for it is not difficult to find.

The shrewdest traders are of the opinion

is wary, and the reason for it is not difficult to find.

The shrewdest traders are of the opinion that the present high levels in the market prices have more than discounted the great prosperity of the country. With the processional speculator this opinion is reached through experience and a long line of careful deduction. The small trader on the other hand arrives at the same result through intuitively feeling that the market is dangerous, and therefore he holds aloof. In truth, the small speculator would fare badly were he to pit his strength against this professional market as it exists today. Most of the shrewd outside traders have

gotten out of the market and are waiting for the time when prices will break and when the bargain day signs will appear again on Wall street. They believe that a buil market cannot start from the present high prices, and I believe they are right. In the Chicago market the Chicago subway shares have occupied the center of the Chicago exchange. Yesterday the stock broke to the lowest figures it has ever sold at. In New York the price was 48, in Chicago 428. Although subsequent recovery of from 3 to 32 points took place, the market essentially was weak. From the close on Wednesday night of 54% the shares opened down to 50% and sold down rapidly to 48. Then very slowly worked up to 52%. President Wheeler left for New York and during his absence many rumors were rife as to the probable results of his visit to New York. At the office of the company denials were made as to any change in the management. C. D. Slimpson of Scranton, Pa., who is one of the heaviest stockholders of the Chicago subway, in a statement says:

"The officers of the company cannot develop a property like this to please a speculative element. The New York, passenger subway has thousands of columns of valuable newspaper articles and it has margin, nor would any New York bank loan money on it. When the stock was selling around 90 no broker would buy it on a margin, nor would any New York bank loan money on it. When the stock worked up to lik it had a sensational drop to 31 in a very few moments, yet it did not affect the property, and it is today selling at 22. As we pay the city a percentage of our gross receipts, we are in perfect harmony with our people. We are in perfect harmony with our people. We are in perfect accord with the service that furnishes the funds, We are handling 7,000 tons daily now and increasing every month. We receive from 600 to 750 per ton for handling freight per mile."

Although Elgin & Southern continued to gain during the month of September, and

increasing every month. We receive from 50c to 75c per ton for handling freight per mile."

Although Elgin & Southern continued to gain during the month of September, and is still gaining in October. It is thought that there will be no dividends declared until the next annual meeting, which takes place in June. The directors of the Chicago Edison company are to hold a meeting in a few days for the devout purpose of declaring dividends. Better than the usual rate is expected. Business for this year has been secord breaking. The earnings of the Tille & Trust for September were 449, which is nearly 1 per cent on the entire capital stock. The year's earnings will exceed those of 1994, which were \$548, 565, or nearly 115. Reports as to the iron and steel trade were very favorable. September fron production was 1,859,873 tons, as against 1,834,673 in August and 1,741,855 in July. The overwhelming victory of the Goulds over Ramsey in the fight of the Wabash terminated as was expected. Almost the entire east to a man is figuring on the long side of Peney, but the patience of the average Philadelphian is greater than that of the New Yorker or Chicagoan, and it will take the Philadelphia patience to win out in Pennsylvania stock, because if there is any advance in price it certainly will not be immediate under present time is to refrain from doing any speculating in the markets. There will be a bargain day along pretty soon, and when it comes you should be prepared to take advantage of it.

OMAHA WHOLESALE MARKET.

killers and feeders has been if anything more urgent than last week, which is saying good deal, as the demand last week was as good as any one could ask for. To meet this demand there was a largely decreased supply, the total receipts for the week being little more than half what they were last week and considerably smaller than a year ago. A combination of light receipts and large demand could hardly fall to result in anything else than a strong and active market and that is just what has been experienced here every day this week. Commencing with Mcnday prices have gradually tended upward until at the close of the week they are safely 1505c higher than a week ago. In spots the market has shown more advance even than that, while in other cases not so much, but that would be as near the average as it would be possible to get.

During the week western lambs good enough for killers have sold largely at \$7.707.00, with top natives at \$7.50 and quite a string of feeder lambs at \$6.55, the highest price of the season so far. Fat yearlings have sold as high as \$5.50 and old wethers at \$5.60, with top western ewes at \$4.75. In conclusion it may be said that no seller could ask for a better market than has existed here all the week.

Quotations on feeder sheep and lambs: Good to choice lambs, \$6.759.700; good to choice old wethers, \$4.7506.00; good to choice ewes, \$4.4064.75.
