OMAHA, Oct, 18, 1905.

The wheat market developed a higher tendency today. All the news received was builtan. The short crop in Russia was a subject of common talk and one big firm had confirmations from its Russian agent. More news came of threatened damage by locusts in Argentina. Winnipeg received the cars, against 250 last year. American receipts were larger than expected, Trade was not heavy. Desember closed at 80%c, May at 80%cejc and July at 83%c.

The market was easier on December corn, put other months were a little stronger. December closed at 44%c, old December at 44%c, May at 45%cysi%c, and July at 85%. OMAHA, Oct, 16, 1905,

Receipts of oats largely overran the es-imates. There was a good demand and prices were a shade better. A good for-sign demand continues. December closed at 134-6728%c, May at 80% 200%c and May at

CHICAGO, Oct. M. Absence of seiling pressure permitted the wheat market to veer upward today on demand from a leading buil. At the close wheat for December delivery showed a gain of %d. Corn and provisions are practically unchanged. Outs are in 162%c.

Strength in the wheat market developed soon after the opening. At the start sentiment in the pit was a trifle bearish and initial quotations on December were off 162%c. Lower prices for wheat at Liverpool provided an incentive for seiling at the outset. Weakness at the English market was attributed to freer offerings of Russian and Manitoba wheat. There was, however, very little wheat for sale here. In consequence a comparatively small demand from a prominent long was sufficient to cause a raily before the end of the first hour. The advance was helped along by the announcement of a decrease of 2,374,000 bu. In the advance was helped along by the announcement of a proportion of the first hour. The advance was helped along by the announcement of support from the buil leader. The total volume of trading, however, was small. Active demand for flour in the northwest helped to maintain builtish enthusiasm. For December the highest point of the day was reached at 85%gets. The market closed strong, with December at 85%c. Clearances of wheat and flour were equal to 147,500 bu. Primary receipts were 1,855,000 bu., compared with 1,650,000 a year ago. Minneapolis, Duluth and Chicago reported receipts of 1,255 cars, against 1,259 last week and 1,067 a year ago.

Likelihood of an increased movement of corn in the near future had a bearish effect on the corn market. This influence, however, was largely offset by demand from a leading buil. As a result the market help a leading buil. As a result the market help and closed at the highest figure. Local receipts were 635 cars.

Provisions were steady as a result of a fair demand for January products for investment account. Packers also were moderate buyers. At the close January pork was unchanged at 28%c.

LONDON, Oct. 16.—Money was in somewhat better supply in the market today by the payment of the Egyptian unified debt coupon and other dividends. Discounts were firm, being helped by the coming issue of treasury balances. The sum of 15,000,000 rubles in gold left India October 14 for London. Prices on the Stock exchange were fairly steady. There was an exceedingly quiet tendency and the tone was undecided. Consols closed easier. Americans opened dull at a shade above parity. Prices weakened somewhat later and closed easy, several stocks being slightly above the lowest quotations of the day. In other sections prices were mostly steady. Peruvians were firm on continental buying. Japanese imperial 6s of 1906 were guisted at 101%.

973 CATTLE—Receipts or cattle this morning were heavy, over 400 cars being reported in the yards. There was an increase of close to 100 cars compared with last Monday and with the same day a year ago. It was in fact the largest run for a Monday was in fact the largest run for a Monday and with the same day a year ago. It was in fact the largest run for a Monday so far this year. Large receipts were also reported at Chicago, Kansas City and other market points. As a result of the large runs there was a lower tendency to prices at all markets.

With a plentiful supply of beaf steers and with other selling points reporting declines of 10c generally buyers here were disposed to take their time in making selections. The result was that the forehoon was well advanced before any business of consequence was transacted. When the trade did open it was on the basis of about a 10c decline on the general run of the cattle. Some of the most desirable lots that just happened to meet requirements may not have been quite that much off in all cases, but the exceptions were not numerous.

Are Killed.

BAKERSFIELD, Cal., Oct. 18 -- A northbound owl train on the Southern Pacific railway was wrecked at the yard entrance at Fresno early today. Engineer Cole and Fireman Butts, both of Bakersfield, and an unidentified tramp were killed. As far as known none of the passengers was seriously hurt. The wreck was due to a misplaced switch, the work of train wreckers. The lock was broken with

a rock found near the switch. Fatality at Horse Show. ST. LOUIS. Oct. 18.-J. W. Denton, a well known horseman of Biocmington, Illi, who was kicked by a horse during the horse show Saturday, died from his injuries today.

WHEAT .

The Wheat markets of the world have been very strong throughout the past week. Frices have not risest matterfally in American markets on account of the rearraining influence exerted by the leading bull operators, who do not seem to be ready at this time to head a sharp campaign. While the domestic levels have been only maintained, Liverpool and the continental markets have seen a series of sharp upward jumps that have brought the foreign markets practically to a basis upon which our Whest may be shipped. The advisability of marketing any of our Whest abroad in the shape of raw grain has been seriously called in question, and the peculiar action of our markets may be the logical answer to this query. It is a known fact that the Minneapolis mills, are booked months ahead with capacity orders. The largest of these mills has orders for six months which will tax its productive power and has been grinding on the same character of business for a month. It is announced that not a pound of this Four is for demestic delivery.

The question immediately arises: is it worth while to export any Whest as long

delivery.

The question immediately arises: is it worth while to export any Wheat as long as we can export Floor instead, thus giving American labor profitable employment?

The underlying conditions in Wheat are so strong that we cannot advise selling operations except of a scalping character.
