BROWN SECURES INJUNCTION

Supreme Court to Hear the Ditch Cases Latter Part of Month.

SICKNESS DELAYS THE BELL TRIAL

Judges Fix Dates of Court and Where They Will Preside in This District During the Coming

Year.

Notices were served 'yesterday on County Attorney J. J. Hess, County Auditor W C. Cheyne and the members of the Board of Supervisors that Judge Deemer of the supreme court had granted at the request of R. A. Brown & Co. of Washington, Ind., an order restraining the supervisors of Harrison and Pottawattamie counties from taking any further steps towards entering into the contracts recently awarded the Western Dredging company and Pollard, Gaff & Co. for the construction of the proposed joint drainage ditches until the last Tuesday in October, when a hearing will be had before the entire supreme bench at Des Moines.

The boards of the two counties are scheduled to meet in adjourned joint session in this city today, but in face of Judge Deemer's restraining order no action can no whe taken in the matter of the contracts. A further adjournment, it is expected, will be taken to some date subsequent to the bearing at Des Moines.

County Attorney Hess, in spraking of the matter yesterday, said that the securing of an injunction by Brown & Co. would not delay matters materially, provided a final hearing on the case could be had before the supreme court this year, but that it would in the event of the injunction suit not being reached by the supreme court until next spring or summer Mr. Hess, however, expressed the opinion that it was doubtful if the supreme court would grant Brown & Co. a supersedeas without a heavy bond, as had been the case in the injunction in the Harrison-Monona county ditch. Whether Brown & Co. would be prepared to furnish a bond, which Mr. Hess estimated ought to be in an amount of from \$100,000 to \$200,000, he was unable to say. In any case, Mr. Hess said, the present injunction proceedings would delay matters sufficiently to prevent any chance of the contractors commencing work this year.

Sickness Delays Bell Trial. In the district court yesterday the trial of H. B. Bell, the young man indicted on two counts in connection with the theft of tickets from the depot of the Rock Island railroad in this city, which was assigned for yesterday, was continued until next term at the request of the defendant Young Bell's mother is seriously ill at her home in Hamburg, and the continuarice was agreed to by the county attorney on the express stipulation that Bell at the next term would enter a plea of guilty and not put the state to the expense of a trial. Young Bell has already confessed to the theft and is out on bonds furnished by his mother and relatives in Hamburg.

The trial of David T. Stubbs, former company, charged with embezzlement, is slated for today... County Attorney Hess stated last evening that he was prepared to fry the case and that he would oppose any application on the part of the defendant fortwieentinuance.

INSANELY JEALOUS OVER WOMAN Some Light Shed on the Sionx City

Tragedy. SIOUX CITY, Ia., Oct. 18 .- (Special Telegram.)-It developed today that E. H. Darrow of Lead, S. D., who shot and killed Mrs. W. E. Darrow, his daughter-in-law, and then killed himself, had been insanely jealous over the woman and evidently he feared another suitor for her affections might win her from him and the coroner's inquest developed no new information. George E. Darrow, who is studying

dentistry at Creighton university, Omaha, and who is a son of the murderer, testifled that he possessed no knowledge as to illicit relations between his father and Mrs. W. E. Darrow.

Johnson, proprietor of the Arcade hotel, were other witnesses. Mr. Dick explained in an interview that the elder Darrow became interested in young Mrs. Darrow shortly after she entered the family circle at Sioux Falls. Previously she had been a school teacher. The old man's attentions to the young woman caused a separation between him and his wife. When Mr. and Mrs. W. E. Darrow moved to Kansas, the elder Darrow followed them and from there he followed them to Alberta, Canada. Then they all moved to Lead, S. D., where they lived four years. He had an insane infatuation for the woman and spent thousands of dollars on her.

Saves All Wasted With Other Stoves For Hard Coal, Soft Coal or Lignite

The waste of gas in burning hard coal is shown by opening the magazine cover of an ordinary base burner, when the oxygen supplied fills the entire stove with flaming gas. Cole's Hot Blast stove burns this gas in hard coal which, in ordinary stoves, escapes, on account of their leaky construction, causing great waste and endangering health and life when it escapes into the rooms.

In the ordinary magazine hard coal stove, three-fourths of the coal is partially consumed in the magazine, where it gives off no heat, as it is not in contact with the radiating surface. The onefourth of the coal in the fire pot must be kept at a white heat combustion to throw the heat into the rooms, thus causing great waste.

Cole's Original Hot Blast The combustion chamber and the magazine are combined in this stove and the Combustion is Perfect. The stove is filled to the top of the inside cast iron lining. This large body of hard

coal is burned under perfect control by means of the absolutely air-tight construction of the stove giving perfect control over the drafts. The coal is kept at a slow, economical cherry red combustion and as the heat is in direct contact with every square inch of the sensitive steel radiating surface, all the heat is radiated into the room where it is wanted and not blanketed in and sent up the chimney. Hard coal at Cherry Red Combustion burns 48 hours, while at white heat it is consumed in from 2 to 5 hours.

Sold Under a Positive Guarantee

We Guarantee Cole's Original Hot Blast to use less hard coal for heating a given space than any base burner with the same heating surface.

Requires attention only morning and night with hard coal. Warm rooms day and night. No escaping gases to endanger life. The heat wasted up the chimney with other stoves is saved.

Burns Any Fuel-Saves Half

Cole's Hot Blast is not only a perfect hard coal stove, but is generally recognized as the most economical and cleanest soft coal stove made. Soft coal is half gas and a \$3.00 ton of soft coal or a \$2.00 ton of slack is made to do the work of \$9.00 worth of hard coal, as the gas half is utilized as a heat producer. It burns soft 🌯 coal, hard coal or wood without any change of fixtures.

Scientific Construction

Cole's Original Hot Blast has an absolutely air-tight and gas tight construction throughout, by reason of its numerous patented improvements. The patented Hot Blast draft saves the gas. A patented steel collar connects the elbow draft to the stove body and cannot be made to leak air by action of the fiercest heat. The patented compound hinge on the ash door cannot warp and the door closes air-tight by its own weight. The heavy fire box protects the joints, where other stoves burn out first. The guaranteed smoke-proof feed door prevents smoke, soot or dust from escaping into the room when fuel is put into the stove. Perfect cleanliness, therefore, from soft coal.

CAUTION. Like all original improvements, Cole's Original Hot Blast has many imitations: They are failures, because they do not have the above patented features. The words "Cole's Hot Blast from Chicago" will be found on the feed door of every Cole's Hot Blast. None genuine without it.
