

AFFAIRS AT SOUTH OMAHA

Start Made on Paving of Twenty-Fourth Street with Brick.

CONTRACTORS HUSTLE FOR LABORERS

Work of Tearing Out the Worn Asphalt is Well Under Way and Vigorous Efforts Are Promised on Job.

Wednesday forenoon Parks, Johnson & Parks started to work on the Twenty-fourth street paving.

James Parks hunted the town over for men yesterday. He even called on men willing to work. He is offering 50 cents an hour for ordinary labor.

These contractors say that they want fifty men right away to work on this paving, the pay to be 30 cents an hour. The Parks company will unload material for the paving of the north and of Twenty-fourth street at the Krug brewery switch.

At the tracks and J street this firm has fished in about half an acre and put up a couple of big sheds for the storage of material. About six cars of cement are in sight, enough to commence work on. Fourteen cars of brick are in the yards. Every day that work can be done all the men that want to can find employment.

The telephone company has completed the laying of conduits on Twenty-fourth street from A to J street and will not interfere in any way with the paving. If laborers can be secured the contractors expect to finish the paving on the east side of the street this year.

News of the history of the city has the pavement on this street been in such a dilapidated condition and residents are greatly pleased at the start made on the paving.

Lineman Breaks Leg. S. Zimmler, a lineman in the employ of the Electric Light company, fell from a pole near Avery Wednesday afternoon and broke his right leg just above the ankle.

The accident happened as the last bit of work was being done on the new line from South Omaha to Fort Crook. Two heavy bare copper wires now run from the Electric Light company's terminal station, Twenty-third and M streets, to Fort Crook.

Wagon Street Widened. A petition was presented to the city council some time ago signed by property owners in Corrihan addition asking that the city purchase a part of lot 14 in Wagoner & Phelan's addition in order that the intersection of Thirty-ninth and S street may be widened.

The statement was made that the property desired could be bought for \$200. The council referred the matter to the city attorney. Mr. Lambert yesterday sent in a communication stating that there was no legal objection to such a purchase if the council desired to go ahead.

Notices to Voters. Chairman Gibson of the republican county central committee is having notices sent to all voters to be sure and register on the two remaining days of the registration.

GOVERNMENT NOTICES

PROPOSALS FOR TWO STONE BUILDINGS—Department of the Interior, Office of Indian Affairs, Washington, D. C., October 25, 1905.—Sealed proposals, addressed to the Commissioner of Indian Affairs, Washington, D. C., will be received at the Indian office until 3 o'clock p. m. of Tuesday, November 21, 1905, for furnishing and erecting the necessary materials and labor required to construct and complete a superintendent's residence and employees' quarters, including heating and electric wiring, at Fort Leavenworth, Kan.

OFFICE CONSTRUCTION QUARTERMASTER, Fort Leavenworth, Kan., September 25, 1905.—Sealed proposals, in triplicate, will be received here until 11 a. m., central time, October 27, 1905, and then opened for the construction of five (5) double sets of lieutenant's quarters, including plumbing, heating and electric wiring, at Fort Leavenworth, Kan.

PROPOSALS FOR RESURVEYS AND SURVEYS in Rock and Brown counties, Nebraska.—Department of the Interior, October 18, 1905.—Sealed proposals, in triplicate, will be received at the General Land office for executing surveys and surveys until Wednesday, November 1, 1905, at an extension of time from October 14, 1905, as originally advertised, and subject to same conditions and provisions. W. A. Richards, commissioner.

CONTRACTORS COMPLAIN OF LOSING MONEY

Scarcity of Men in City Engineer's Department Delays Paving.

CONTRACTORS COMPLAIN OF LOSING MONEY

Financial Loss Because Engineers Cannot Lay Out Work Fast Enough.

Paving work all over the city is being delayed by limitations of the city engineering department due to short funds. Contractors for several days have besieged the city hall demanding the setting of stakes so they can move ahead with their work.

Every available engineer or engineer student from the city engineering department has been pressed into active service and the drafting room is deserted, but the force cannot lay out the work fast enough for the pavers.

The latter are doing their best to take advantage of the fine weather but find themselves much handicapped by the conditions in the engineering department.

Added to the short funds and an obvious impossibility of hiring enough men at fair wages the department is confronted with an enormous demand from railroad and other sources for men who know anything at all about handling a transit instrument or acting as rodmen. New construction by the Union Pacific, Burlington and other roads is draining the available supply of young and old engineers.

Notwithstanding the disheartening conditions, the city engineering department is trying to do the best it can. Although the city engineer has found it was to add about \$1000 or more to the engineering funds, the council has taken no pains to get through with the necessary formalities.

Contractor E. D. Van Court, who is doing much of the curbing, was at the city engineer's office Wednesday trying to get stakes set for a lot of work.

"I am losing money because the city engineering department simply can't lay out work fast enough," said he. "I don't blame Mr. Rosewater. The authorities who make the appropriations and have control of the funds are responsible. It is a shame a city like Omaha should be so tied down and handicapped in its engineering department."

It is expected the executive committee of the Auditorium board in the next few days will authorize Manager Gillan to put a new floor in the building for roller skating.

Mr. Gillan wishes to get at the work as soon as the Orphan's fair is over, in order that skating may be begun November 8, the night after Emma James is here. A new floor is a necessity to make skating a success. Two men will be busy all next week putting the skates in repair. New costumes will be provided this year for the band, skate boys and other employees.

Space is being made ready for the permanent exhibit at the Auditorium during the meeting of the Implement Dealers' association, which will be held November 15 and 16. Manager Gillan had a letter Wednesday from the J. L. Case company at Lincoln, asking for space to exhibit a separator. Among other firms which have secured floor room are the Linger & Metcalf company, the Baum Iron company, the Monitor Drill company of Minneapolis, the Secler Manufacturing company of Moline, Ill., the Dempster Mill Manufacturing company of Beatrice, Neb.

Two Elevators Bought Up. Granaries at Creston and Platte Center Acquired by the Transmississippi Company.

The Transmississippi Elevator company has bought two elevators which belonged to Joseph Connor, one at Creston, Neb., with a capacity of 25,000 bushels, and one at Leigh with a capacity of 16,000 bushels. The company also has bought a 15,000-bushel elevator at Platte Center from Ed VanAllen of that city.

Work is being pushed on the company's new 25,000-bushel elevator at Sargent's Bluff, Ia., which is being erected in place of the smaller one recently torn down. Contractors are driving piles for the new Transmississippi elevator at Council Bluffs and construction of the elevator proper will be begun in short time.

The Westbrook-Gibbons Grain company of Omaha has made the announcement that it will build a 100,000-bushel elevator at Kearney. D. H. Cramer of Omaha has the contract and he expects to begin work next week.

No work has been done on the Cooper-Vondorn Elevator company's building at Council Bluffs, but Mr. Vondorn says it will not be delayed very long.

Fred Foster Disappears. Neighbors Are Suspicious and Call Police, Who Discover Nothing New.

Fred A. Foster, living at 3428 Kansas avenue until last Monday morning, has disappeared. Some of the neighbors of the family became suspicious and reported the matter to the police. They said they had often heard violent quarrels between Foster and his wife. Detectives were sent out last night and after much effort roused the inmates of the house. Mrs. Foster and her two sons. Mrs. Foster was apparently under the influence of liquor.

Hand Sapolio. Is especially valuable during the summer season, when outdoor occupations and sports are most in order. GRASS STAINS, MUD STAINS AND CALLOUS SPOTS yield to it, and it is particularly agreeable when used in the bath after violent exercise.

Baby Mine. Every mother feels a great dread of the pain and danger attendant upon the most critical period of her life. Becoming a mother should be a source of joy to all, but the suffering and danger incident to the ordeal makes its anticipation one of misery. Mother's Friend is the only remedy which relieves women of the great pain and danger of maternity; this hour which is dreaded as woman's sever
