TAFT STARTS FOR PANAMA

Party Will Travel from Hampton Roads to Colon on Cruiser Columbia.

AFTER FACTS NOT SECURED IN REPORTS

Request of Panama Government Secretary of War Will Be Present at Celebration of Independence.

WASHINGTON, Oct. 27--Secretary Taft and his party started on their Panama trip tonight, leaving here at 6:30 o'clock by boat for Norfolk. He will transfer to the United States cruiser Columbia at Old Point at 7 o'clock tomorrow morning. Mr. Taft was overwhelmed with work up to the time of his departure. In the forenoon he went over the estimated expenditures of the canal commission since January 1. It is said the purchase of the new plant to build the canal will be completed by January of February.

Secretary Taft will make a comprehensive personal investigation of conditions at Panama and inform himself at first hand of the needs of the canal to be presented to congress. He will have a personal interview with Governor Charles E. Magoon and will consult with Chief Engineer Stevens to gain information which cannot be adequately presented in written reports. A number of officials connected with the Taft fortification board will accompany Secretary Taft to secure preliminary information as to the need of fortifications at the terminals of the canal.

The party consists of Secretary Taft, General John P. Story, Colonel Clarence R. Edwards, Lieutenant Colonel William Black, Major George W. Goethals and Lieutenant Mark Brooke, the last three officers named being of the corps of engineers. Colonel Black and Lieutenant Brooke were in Panama at the time of the transfer of the property from the French company to the United States. Colonel Edwards is chief of the insular bureau, through which the administrative affairs of the canal have been transacted. W. W. Michler, assistant private secretary to Secretary Taft will accompany the party.

Secretary Taft, at the earnest request of officials of Panama and the United States, has timed his visit so as to be in Panama November 3, the second anniversary of the independence of the republic of Panama. The republicans believe his presence on this occasion will do much to strengthen the relations between this government and the isthmian republic. Secretary Taft will board the United States cruiser Columbia at Hampton Roads Saturday morning. The Columbia has been prepared for the voyage and will at once sail for Colon with the Taft party. Mr. Taft expects to remain on the isthmus a week or ten days, and will return to Washington by November 15.

To Inspect Atlantic Defenses.

Members of the Taft fortification board who do not accompany the secretary of war to Panama have arranged for a trip of investigation to include the entire Atlantic coast from Narragansett in Rhode Island to Galveston, Tex. These officers have already made an investigation of the coast from the Canadian boundary to Narragansett, and the contemplated tour will afford them an opportunity to ascertain what is necessary in the way of additional fortifications for the remainder of the Atlantic coast, so that a complete report can be made for the use of congress. The officers will travel mostly by rail, but will use such vessels as are available along the coast to take them from point to point, necessary for their investigation.

Estimate for Army Expenses.

Secretary Taft has transmitted to the treasury department the estimates of the appropriations for the War department for 1907. These aggregate \$104,988,267.75 being \$3,715,322.52 less than the total appropriations made by congress for the use of the War department for the current fiscal year ending June 30, 1906.

The amount estimated as necessary for the military establishment, which embraces the cost of maintenance of the army and of the military academy at West Point is \$70,170,715 being \$28,717 less than the appropriation for the present year and \$2,304,437 less than the estimates made a year ago.

Under the head of public works, military and civil, which includes the construction of seacoast fortifications, military posts, etc., and the improvement of rivers and harbors, of various national parks throughout the country and of certain public buildings and grounds in and around Washington, the estimates call for appropriations amounting in the aggregate to \$27,816,129.96 for the fiscal year ending June 30, 1907, as compared with \$25,302,846.55, which is the amount of current appropriations for similar appropriations. This is a reduction of \$2,513,311.41.

The estimates submitted for the civil establishments which includes the pay of the clerical force, rent of buildings and other running expenses of the department in Washington are \$1,870,076. This is an increase of \$130, the current appropriations under this head aggregating \$1,858,786.

The amounts estimated for miscellaneous objects aggregate \$5,811,344, a net decrease of \$2,068.27 from the appropriations for the current fiscal year.

Under this head is included the estimate for the National home for disabled volunteer soldiers, which is submitted by the secretary of war as required by law. The War department, however, has no supervision over the expenditure of these funds

and no right to change the estimate. The estimates submitted by the board of managers of the National home for disabled volunteer soldiers are \$23,346 in excess of present appropriations for the home.

Cortelyou Talks to Postmasters.

The convention of National League postmasters of the fourth class offices of the United States came to an end this afternoon when the delegates were received by Postmaster General Cortelyou. After welcoming them Mr. Cortelyou made an address, in which he reiterated the attitude of the Postoffice department to organizations within its ranks, and discussed contemplated changes in organization and administration methods. He pointed out to receive its sanction in any degree, must have their object improvements in the service or be of a purely fraternal or beneficial character, and that he recognized every employee as an individual to be appointed, advanced, transferred and in all respects treated upon merit. The postmaster general said:

In April last, the present policy of the department regarding fourth class offices was announced. The department will be retained during satisfactory service. This is being adhered to strictly, and I am confident that a continued adherence to it will result in substantial improvement.

The department has carefully considered a number of changes in organization and administration which it believes will be beneficial. Among other things we expect to reduce rather than increase the number of instructions sent to you. We shall endeavor to simplify the blanks you use. We shall exact of you system in the conduct of your offices, but a system that is businesslike and freed as rapidly as possible from unnecessary detail. We shall insist that every position be filled with a man that its records shall be ready for inspection at any time, that the postmasters and employees shall be attentive to their duties and courteous to the public.

Public Printer's Suggestions.

Acting Public Printer Ricketts today made several suggestions for the saving of money to the government in its public printing to the joint committee on printing of the senate and house of representatives. A volume of 60 pages was exhibited by Mr. Ricketts, being one of twenty-four such volumes issued annually by the patent office and containing pictures and descriptions of patents issued. It was the belief of Mr. Ricketts that \$100,000 a year might be saved in the patent office printing alone by a condensation of the subject matter alone. He also ventured the information that the \$60,000 annual requisition for franked envelopes for members of the senate and house was more than the actual requirement.

By reason of the wages of the employees of the government bindery being 5 per cent higher than in commercial offices, Mr. Ricketts was of the opinion that much of the binding done for the government could be done outside with a great saving to the government.

Mr. Ricketts expressed the opinion that 20 per cent of the present cost of composition is due to correction in proofs, which expense he showed could be saved by more careful editing before sending copy to the printer.

Representative Landis, chairman of the commission, took occasion during the hearing to say that he thought that "vanity" is in a measure responsible for the immense amount of printing turned out by the print-offices. The proportion was, he thought, largely dependent upon the prominence of the author's names on the title pages.

No Discrimination Against Sailors.

Secretary Bonaparte has directed the dismissal of an employe of the Norfolk navy yard as a result of a complaint which came to the department that the employe, after having agreed to lease two roofs of his house to a machinist's mate serving with

the reserve torpedo flotilla, refused to carry out the agreement because it would be necessary for the machinist's mate to come to his residence dressed in the uniform of a petty officer of the United States navy. The employe, it has been explained to the department, said that neither he nor his wife had any objection to the uniform, but owing to the prejudice which existed in the town of Berkeley against sailors, he felt it due to his family in order to maintain their position in the town, that he should refuse to allow a sailor to reside in his house.

Wallace Meets Canal Engineers.

Former Chief Engineer John Findlay Wallace of the Panama canal commission was present today at the meeting of the board of consulting engineers which is considering the question of recommending a sea level or a lock canal. The board is anxious to obtain Mr. Wallace's views about various features of prospective canal work, particularly his opinion as to the time which will be required in installing adequate machinery to get at the maximum output of earth at the Culabra cut and what that amount will be.

TEMPERANCE WOMEN MEET

National Convention Opens Its Annual Session at Los Angeles.

ANNUAL ADDRESS OF THE PRESIDENT

Mrs. Stevens Says opposition of Army Officers to Abolition of Canteen is Not Supported by Statistics.

LOS ANGELES, Cal., Oct. 27--The first day's session of the thirty-second annual convention of the National Woman's Christian Temperance union was devoted to routine matters. Devotional exercises, the appointment of committees, and the hearing of reports by the executive officials of the organization occupied almost the entire morning and afternoon sessions. The feature of the first session was the annual address of the president, Mrs. Lillian M. Stevens of Maine.

Mrs. Stevens' address recited the work of the Woman's Christian Temperance union during the last year, commented upon the various legislative measures the organization is urging, both in state legislatures and in the national legislatures, and spoke very encouragingly of the future growth of the temperance movement.

Address of Mrs. Stevens.

In her annual address, Mrs. Stevens reviewed the developments of the past year and saw much reason for encouragement. Upon the subject of reform bills introduced in the last congress and which were acted upon said:

At mention of there is before you visions of political union have circled, memories of weary miles you have traveled, rebuffs you have endured, arguments you have presented, and the future is bright. But no memories of defeat, for you have wrought with a triumphant spirit, and the same spirit is ours today as we look forward to the coming months.

Mrs. Stevens was positive in her attitude against the re-establishment of the army canteen. She read letters from Secretary of War Taft and others, showing that army officers as a rule, claim there is more drunkenness among enlisted men since the canteen has been abolished than before, but she insisted that no statistics have been compiled to support their position.

The attempt to revive the canteen is only a small part of the work of the liquor element of this country, and I confidently predict that congress will take no adverse action the coming winter.

Opposes Gothenburg System.

Mrs. Stevens touched on all the questions which the temperance union concerns itself, including Mormonism, the purity crusade, patent medicines and the Gothenburg system of regulating the liquor traffic.

Mrs. Stevens declared the Woman's Christian Temperance union to be unqualifiedly opposed to the Gothenburg system, which she considered would be a compromise with the liquor interests.

Mrs. Stevens saw much to encourage the advocates of equal suffrage, and believes the time to be near when all women as well as men, may exercise the privilege of ballot.

Reports of the national officers and heads of the departments occurred at the afternoon session.

Boy Confesses Murder of Old Man.

CHANUTE, Kan., Oct. 27--Lum L. Baley, the 16-year-old boy who murdered Henry Furbush, a well-known farmer of Winnsboro, night, made a full confession today. Baley said he had the motive to kill the old man, but while holding a shotgun in his hand, impulse led him to fire, the shot blowing off the top of Furbush's head.

CIVIL SUIT FOLLOWS LYNCHING

Woman Asks Damages for Death of Husband Killed by Kentucky Mob.

CINCINNATI, Oct. 27--A sensational suit, the echo of the lynching of William Thacker at Flemingsburg, Ky., in 1903, was filed in the federal court of Covington yesterday by Mrs. Mary Thacker, the widow. She is suing George Jordan and other citizens of Flemingsburg for \$50,000 damages for mobbing her husband, who had been indicted for the killing of the son of Jordan.

In the affidavit some sensational allegations are set forth.

The most sensational charge is the one made by Thomas Wallingford that an arrangement existed between the mob and Jailer Morris to get the keys.

FIVE WOMEN BADLY BURNED

Dropping of Candle in Pot of Lacquer Causes Fire in Hardware Factory at Newark, N. J.

NEWARK, N. J., Oct. 27--Five women were badly burned, two of them probably fatally in a fire which destroyed the hardware factory of M. Gould & Sons company. The injured are Minnie Garrity, 15; Carrie Rimmer, 18; Sadie Schaefer, 18; Marj Schwenck, 13, and Anna Schaefer, aged 15. The fire started just as the factory was

about to close, when one of the girls upset a candle in a pot of lacquer causing an explosion which set fire to her clothing and that of her four companions.

The flames caused a property loss of about \$20,000.

O'BRIEN KNOCKS OUT KAUFMANN

San Francisco Boy Goes Down in the Seventeenth, After Putting in a Plucky Fight.

SAN FRANCISCO, Oct. 27--It took Jack O'Brien, a veteran of 350 fights, seventeen rounds tonight to knock out Al Kaufmann, who fought his second battle as a professional. Kaufmann took a beating as has seldom been received in the history of San Francisco fights. Kaufmann, a husky 19-year-old boy, who is credited with a punch, could not land it on the shifty man from Philadelphia. O'Brien's side-stepping, ducking and general footwork was a marvelous exhibition of skill and all his strength could land only an occasional blow that never hit a vital spot. O'Brien, cool and self-posessed, danced in and out hitting the youngster almost at will. Early in the fight Kaufmann's left eye was closed and his nose commenced to bleed. In spite of the terrible punishment administered to him the boy kept after his experienced adversary and on several occasions rallied and fought back in a manner that brought the spectators to their feet. In the seventeenth round a succession of left punches to the jaw staggered Kaufmann and then O'Brien put over a right cross to the jaw and Kaufmann fell to the mat, his head striking with great force.

Kaufmann showed that he is strong, willing and game to the core, but he lacks experience and skill as a boxer when compared with a man like O'Brien.

MOTHER AND CHILD.

Let the mother take Scott's Emulsion for the two; it never fails to benefit them both. One can eat for two, but nourishing two is a different thing. It calls for a degree of internal strength that the average woman lacks. People of luxury are not very strong by habit; overworked people are weak in some functions from exhaustion or their surroundings. Scott's Emulsion can be depended upon to overcome such conditions. It is a wonderful food for a mother and child.
