The wheat market was weak from start to finish. Throughout the day the market was subject to persistent selling pressure from commission houses. Notwithstanding at times a leading buil gave the market active support it was generally believed that much of the selling was for the account of this same trader. The greatest pressure was on the December option. Early in the seasion the market was influenced by increased receipts of wheat at Minneapolis and Duluth. A cablegram from Argentina saying that weather there was favorable for the wheat crop was a factor that exerted considerable influence later in the day. An estimate showing shipments of wheat from Argentina for the week to be 2.400,000 bu., compared with 75,000 bu, the corresponding week a year ago tended to increase bearish sentiment. After opening 157% lower at 20,450%, the May option slumped off to 5956%. The market closed weak with prices near the lowest point of the day. Final quotations on May were at 189%. Clearances of wheat and flour were equal to 473,000 bu. Primary receipts were 1,343,000 bu., compared with £12,000 bu. a year ago. Minneapolis, Duluth and Chicago reported receipts of 571 cars. against 794 cars last week and £13 cars a year ago.

The break in wheat was one of the principal factors contributing to a weak tone in the corn market. Several prominent longs were active sellers of the December delivery. News of the day was rather favorable to buils, cables being steady and weather unfavorable for the new crop. The market closed weak. May opened unchanged to 167% lower at 17647%, and closed at 1766 contract grade.

LONDON, Nov. 2.—Money was rather scarce and in good demand in the market today for heavy repayments to the Bank of England Discounts were quiet. Considerable caution was exercised in view of the political and monetary outlook abroad. Trading on the Stock exchange was quiet and the tone was undecided. The approach of the settlement checked speculative commitments. The market closed dull and irregular. Consols were slightly easier. Home rails occasionally were lower on profit-taking. Americans opened weak, steadier to rather above parity, and in the absence of activity sagged and weakened. During the last hour Wall street advices promoted selling and the market closed flat. Foreigners were comparatively steady. Japanese were in fair demand on the likelihood of an early conversion boan. Hragil. In some were not affected by the news of the revolt of the garrison of Fort Santa Cruz at Rio Janeiro. Peruvians were exceptionally were lowed at 101%.

There was a fair showing of fed cattle this morning, but the larger portion of the offerings consisted of short-fed and warmed-up cattle, and dressed beef men were not in much of a hurry to buy this kind of stuff. However, packers were all wanting some of this kind of cattle, with the result that the trading was fairly active at times and the choice stock brought prices that were at least steady and in prices that were at least steady and in

prices that were at least steady and in some cases ligher than yesterday's close. But the common and medium stuff, slong with the general run of steers, sold at prices that were just about steady in most

cases.
Cows and heifers were in fair supply, but the general run of stock was not of the best kind, but there was a fair demand on the part of packers and there were also a few orders from outside people. As a result of this demand there was not much change from the prices of yesterday. The best kind of stuff soid steady with prices on that kind of cattle yesterday, while the common kinds sold steady with the general run.

common kinds sold steady with the general run.

There was a reasonably good run of stockers and feeders this morning and there was quite a demand for this kind of stuff on the part of both local and country buyers, with the result that choice feeders firmed up a little and sold steady to porhaps a little stronger. Common kinds sold at prices that were generally steady with yesterday's prices. Representative sales:

the eastern markets indicated that there were large runs, and the market opening lower, all this had a had effect upon the market here and so caused a decline, but later reports coming in showed that the eastern market had taken a brace and firmed up considerably; this appeared to have a kind of strengthening effect upon the market at this point and served to steady things and helped to prevent a still further decline from the opening drop.
