Me hods Employed to De raud the United States Out of Public Land.

AMPLE TRICKS OF LAND GRABBERS

Injustice Resulting from the Acquisition of Large Tracts of Land by Cattle and Lumber Companies.

The ingenuity and audacity of the men he have been and still are engaged in sefrauding the United States out of public lands are equalled only by the absolute consciencelessness of this class of swindlers. Every possible device is resorted to by the men who have sought to acquire illegal title to the public domain, and even the startling examples of a United States senator sentenced to a penitentiary term and numerous "land kings" struggling in the toils of the law have not apparently served to diminish the attempts to perpetrate similar frauds.

An instance of this character which has just come to light was found in Idaho. A single contractor had erected on the order of a land company thirty-four cabins on as many homestend entries-"one hundred and sixties" they are called in the land office-had furnished them with the usual meagre furniture of the genuine cabin, had actually built fires in the little sheet iron stoves, in order that the cabins might appear to have been occupied and had hung from the rafters of each a fragment of a flitch of bacon. On each "one hundred and sixty" about a quarter of an acre had been actually tilled and planted to potatoes. The entries were made in the name of thirty-four individuals, the work done by the contractor was performed the following summer, and when the legal fourteen months had expired the alleged settlers appeared before a United States commissioner, each made affidavit that he had lived on and cultivated his claim for fourteen months, paid down the nominal price of \$1.25 an acre prescribed by law, where the commutation clause of the homestead thus been made title was granted, subject to final ratification by the land office in Washington.

A Narrow Shave. It was just here that something aroused the suspicion of the special agent charged with passing on the claims, and he began an investigation, which revealed the fact that to one of the claimants had ever resided on the land, that the cabins and the cultivation had all been performed by a single contractor, acting under orders from a large land company, and that each of the fictitious settlers was under contract to sell his homestead, as soon as the title was perfected, to the land company for a nominal sum. Had the scheme worked in this instance, as it doubtless has in numerous others, the land company would have ac quired a tract of 5,440 acres at a cost of a ittle less than \$9,000, and this tract would have been worth at the least calculation \$55,000, would probably have yielded double or treble that sum in timber, and then the denuded land would have been left in the hands of the land company, to be sold as opportunity offered for grazing purposes.

Another fertile source of fraud is the provision of the land law which entitles soldiers or soldiers' widows to deduct from the five years necessary to a free homestead entry the term of army service of such soldier. For instance, a land or cattle company desiring to secure title to a large tract will scour the country for indigent widows of old soldiers. When a sufficient company has been gathered together each will be "located" on a homestead entry. These women are generally ignorant of the character of the transaction in which they are asked to participate. They are only informed that they can secure their living and from \$50 to \$75 in cash by living for eix months each year in a little cabin which will be furnished them without expense. If a soldier has served throughout the war, four years, his widow can "prove after one year's residence on the claim, and this "year" is apocryphal, for in practice, it is reduced to six months, generally the summer season. When the time comes to "prove up" the widow is escorted to the local land office, or the United States court, and there told to swear to certain papers. which she does without inquiring as to their contents. As soon as her title is approved in Washington she deeds the land to the company which employed ber, receives her bonus and disappears.

A Woman's Trick. In Oregon an instance was recently discovered, almost under the nose of the court which was trying Senator Mitchell for complicity in land frauds. A young woman made entry on 160 acres, and put up a cabin six months after she made her entry, and lived in the cabin perhaps a week. Six months later she filed an affidavit that she was too ill to go on the land that summer, and continued to file such affidavits until the suspicions of the land office were aroused. Investigation revealed the fact that she was not in any sense a bona fide settler; that she had never cultivated the

land, and doubtless never intended to. In the same neighborhood a case was found where a man living in the village had made a homestead entry. He erected a cabin and was cultivating on his claim a scant acre of potatoes. Meanwhile he had been cutting the timber with which the ciaim was covered. When detected by the agent charged with investigating such cases he had cut timber worth \$1,000 and had contracted for its sale. He had also sought to sell the relinquishment of his claim to some. one else who would become a real settler Had he been successful he would have ac guired \$1,000 worth of timber, for which be had given no return whatever, and would value to the settler who followed him, but who would have bought his relinquishment because it represented three years of the five necessary to perfect a title without

a little shack and spent their vacation on the claim, cultivating it to the extent of a small kitchen garden. The fraudulent character of their "residence" was detected just in time to prevent their sequence that it is up to all expectations and will do far more than any other yard enwhere the government has caused a survey to be made, and the Department of the Interior has sought to preserve certain forest tractice by refusing to survey them, but even power of that magnitude.

grade to Plymouth. The ore trains sent out of Ashtabula are the heaviest known in the ore-carrying world. Since the arrival of the new locomotive it has been found that it is up to all expectations and will do far more than any other yard engine ever brought here. The tractive force of this locomotive is \$5.200 pounds, which means that it is capable of exerting a power of that magnitude.

LOOTING THE PUBLIC DOMAIN | agent sent to investigate the character of GRAIN AND PRODUCE MARKET claims are passed they denude them of the imber, worth from \$50 to \$100 an acre, and then move on to begin operations elsewhere under new names and under the supervision of other land agents.

The great difficulty which the General Land Office encounters in preventing these frauds is the looseness of the law and the fact that the government has never classified its lands, as do the railroads and all other institutions which do business on ousiness principles.

A special effort is also being made to compel settlers to appear on certain specified days before special land agents to make their final proofs. If this can be done the land office can, in advance, send its agents quietly to investigate the character of "cultivation" performed by those persons who seek to perfect their titles, ind, where everything does not look right. to cross-examine the entrymen when they make their affidavits. Under existing conditions the court officers who receive the nal proofs are all too often virtually the attorneys of the entrymen or of the fraudulent companies who are seeking ultimate possession of the land.

Hard on Real Settlers. The injustice resulting from the acquisi tion of large tracts of land by cattle and lumber companies is grave. One or two thousand acres or more fenced and devoted to grazing or lumbering operations renders the region almost untenable to the genuine settler. He is deprived of neighbors, roads, school-in a word, of all those advantages which a community would afford him, and all too often he sickens of his isolated position and finally sells his homestead to the company which has already acquired a monopoly of his surroundings. And all this is in addition to the frustration of the purpose of the government in granting land to settlers on such easy terms, the settlement of the area by small home owners. The great landed companies which already monopolize so great portion of what were originally public lands, not only constitute an impassable barrier to the advance of civilization and the development of the country, but they have in many instances become a menace to law and order, ruling the country about them with an iron hand, prostituting its act is availed of, and "final proof" having courts and destroying its liberties in a most high-handed manner, so that peaceable settlers gladly embrace the first opportunity to escape from their baneful influences.

Once in a while the land office makes mistakes in its first impressions of the validity of claims. This was the case with certain claims recently forwarded for final approval by members of the Heros family in the southwest. The father, since de ceased, had perfected a homestead entry and the land office was called upon to approve the claims of two of his minor children. The case was immediately assumed to be fraudulent and so reported in the public prints, but further investigation 27% 028%c. RYE-No. 2, 66067c; No. 3, 64066c. It was found that under the law even a minor could become the legal head of a family by adopting a child. In this instance there was a large family and the parents were extremely poor. The oldest son had adopted a younger brother and, as the head of a family, had taken up a claim on his own account, while the old- CHICAGO GRAIN AND PROVISIONS est daughter had adopted a younger sister and had taken up another. Final decision in this instance has not been reached, but

in this instance has not been reached, but everything points to the validity of the claims and their ratification by the land office.

The publication of such facts as are herein set forth have caused radical demands for revision of the land laws, but comparatively few of these demands have been tempered with wisdom or justice. For instance, it has been demanded that the commutation clause of the homesteal act be entirely repealed, whereas this would work grave injustice to many people.

Prices on Board of Trade.

CHICAGO, Nov. II.—Improved demand from exporters caused a firm finish today in wheat. Closing quotations on the May delivery showed a gain of 1/2014c. Corn is up 1/2016c. Oats are unchanged. Provisions are up 1/2016c.

The firmness in wheat developed toward the middle of the session. Early in the day the market was quite weak. At the opening, the May option was a shade higher to 1/2014c lower at 38/2884c. For a time there was further liquidation by belated longs. Commission nouses also sold freely. The selling was induced by liberal receipts at Minneapolis and Duluth and by work grave injustice to many people. receipts at Minncapolis and Duluth and by Fourteen months is, however, too short a prices at Liverpool, however, had some efperiod, and this should be extended to twenty or twenty-two, so that the genu-ineness of the efforts at "cultivation" may be accurately gauged. The most important reform needed is a classification of the lands and authority conferred on the government to reject any entry except such as was suitable to the land in question. Thus desert land claims could not be entered on timber lands, homestead entries could not be entered on lands best suited to timber claims, etc.-New York Tribune.

## LEVIATHANS OF THE RAILS Huge Locomotives for Switching

Purposes Weigh Over Two

Hundred Tons.

The heaviest switching locomotives in the world have just been placed in service on the lines of the Lake Shore railroad. Two are at Collinwood, O., one at Ashtabula.

locomotives of such size would not be a success. If ever by some mishap they got off the track it would be a mighty job to get thom on again. It was reasoned that if such mammoth rolling stock ever came into general use heavier rails would be required and bridges would need to be strengthened. Since that time, however, nearly every road in the country has been preparing for the mammoth locomotives of the future by the laying of heavy rails. replacing of old bridges and the like. and the introduction at this time by the Lake Shore of a locomotive larger than the giants of the Bessemer is but another step in modern industrial development. The locomotives built by the Brooks works of company sent to St. Paul and Minneapolis the American Locomotive company and and gathered up on the streets of those just installed by the Lake Shore are 28,300 pounds heavier than those of the Bessemer. The engine without the tender is

Comparative Quiet Follows Weakness of Previous Day.

STRENGTH DEVELOPS AT THE CLOSE

Strong Corn Market Caused by Liberal Covering of Shorts-Reports of Disappointing Yields Are Generally Discredited.

OMAHA, Nov. 11, 1996. Comparative quiet followed the closing weakness yesterday. There was a strong close, with 147% above yesterday. Shorts overed free. Northwestern receipts were arger than last year. December closed at 65%. May at 88% and July at 83%.

4%c, old December at 45%c. May at 45%c to and July at 45%c. Oats were stoady, with periods of firmness. Many of the small holders have been influenced by the action of corn and have sold out. There is nothing in the situation to discourage holders. December closed at 25%c. May at 25%c and July at 31%c. A Minneapolis wire says: "Some of our largest country mills have sold double and some three times their output in the last few days. Flour sales here are large. Mills have sold ahead."

Broomhall estimates the world's wheat

some three times their output in the last few days. Flour sales here are large. Mills have soid ahead:

Mills have soid ahead:

Broomhall estimates the world's wheat shipments for the week at 12,000,000 bushels, of which quantity Europe takes 10,400,000 bushels. Shipments last week were 14,144. 600 bushels. Shipments last week were 14,144. 600 bushels and a year ago 12,308,000 bushels. Liverpool closed %234d lower on wheat and 49%d lower on corn.

"I believe the trade will forget the big government figures on corn in a day or two." said E. W. Dennis, according to the Inter Ocean. "Certainly the general reports of disappointing husking returns we have been getting for several days do not justify an improvement in percentage in October."

Primary wheat receipts were 1,178,000 bushels and shipments of 469,000 bushels. Corn receipts were 469,000 bushels of ordinary and shipments of 338,000 bushels of ordinary shipment. Clearances were 20,000 bushels of ordinary shipment. Once housed of ordinary shipment. Other houses did a fair business, but figures were withheld.

frect. The December delivery was especially weak. For May the lowest point of the day was reached at 87%c. After the first hour offerings suddenly became scarce. Many of the early sellers turned buyers and shorts covered freely, causing a moderate erate upturn. The change in sentiment was due to reports from various points showing that foreign demand was becoming quite active. New York reported fifteen boatloads taken for export. An improved demand for flour at Minneapolis was an additional incentive to buyers of whent 

cars, against 795 cars last week and 602 cars a year ago.

Early in the session sentiment in the corn pit was bearish, but later a firm tone developed and the market closed at practically the highest point of the day. Increased local receipts and clear weather were the weakening influences at the start. During the last haif of the day the market received support from bull leaders. The close was firm May opened \(\frac{1}{16}\) \(\frac{1}{16}\)

and two at Elkhart, Ind. Without the tender each one of the five weighs 35,000 pounds more than the much-talked-about locomotives installed by the same road a year or so ago. The total weight of each of the new monsters, including the tender, is 419,600 pounds or nearly 210 tons. The capacity of the tender is 8,000 gallons of water.

When the Bessemer railroad inaugurated its yard engines, weighing 294,600 pounds or £20,300 pounds without the tender, and with a tank capacity of 7,500 gallons, all former records for size were decidedly eclipsed. It was predicted for a time that locomotives of such size would not be a

CATTLE—The run of cattle this morning was small and inconsequential and there was practically no trading whatever.

As will be noted from the table above, the receipts of cattle this week have been somewhat smaller than for the previous six weeks, and as compared with the receipts for the same week last year they are larger by about \$.000 head.

The week's trade opened at prices that were just about steady with the close of last week. The run was only moderate and during the week the more desirable kinds of cattle have been rather scarce, the larger portion of the stuff coming in during the week being of the common and medium classes.

the larger portion of the stuff coming in during the week being of the common and medium classes.

All during the week there has been a decided shortage on the better grades of cornfed and western cattle, while there has been a fair demand for this kind of cattle, with the result that choice beef steers close the week steady to a little lower, while the common and medium kind of stock closed the week slow and off 15@20c from last Week's prices

Cows and helfers have been in fairly good supply all this week. This is particularly true of the last few days' run. For the first three days of the week there was an active demand for good cow stuff, both on the part of packers and outside people, with the result that prices advanced a little over the previous week's close. However, the succeeding days saw a decline in this kind of stuff of from log isc. The market on cows and helfers for the week closed slow and logists off, except on the choice stuff, which remained almost steady.

The run of feeders this week has not been up to expectations and there have been but a comparatively few choice feeders on the market. The market on this kind of stuff of stuff of stuff of stuff of stuff of them were looking for the heavier stuff and were unwilling to take light and common kind of cattle, with the result that the common and light class of stockers and feeders closed off 15420c, while the choice heavy stuff closed the week just about steady.

HOGS—Receipts of hogs this morning were moderately large for a Saturday.

closed off 15473c. while the choice heavy stuff closed the week just about steady.

HOGS—Receipts of bogs this morning were moderately large for a Saturday, about 4.200 head being received, making an average run for the day.

The market on hogs opened brisk and generally 51/200 higher this morning, and there was considerable trading done at that advance. The trade on choice light butcher weight stuff was mostly 2/200 higher, the most of the hogs of this kind selling at prices ranging from \$4.50 to \$4.55. with the toppy loads selling at \$4.50, while the bulk yesterday was \$4.772/20.48 so and the top \$4.50, which top does not include a little assorted stuff. As has been stated the early market opened brisk and active and ruled so at the nrices quoted during the early part of the losing the most of the early mornings advance. Prime heavyweight hogs during the early portion of the motning sold at prices that were generally 2/20 higher.

The receipts of hogs for the week were about 5,000 head. This is smaller than for the close was steady net unchanged to 10 points higher. Sales were shout 5,000 head. This is smaller than for the corresponding date last year \$1.261,180.14 to doay were \$1.541,360.14 and for the corresponding date last year \$1.261,180.14 to doay were \$1.541,360.14 and for the corresponding date last year \$1.261,182.06.

Monday \$1.851,762.06 \$1.613,861.14 Wednesday \$1.261,80.25 \$1.603,831.05 \$1.213,80.25 \$1.603,831.05 \$1.213,80.25 \$1.603,831.05 \$1.213,80.25 \$1.603,831.05 \$1.601,72.36 \$1.603,831.05 \$1.603,72.36 \$1.6

than the receipts for the same week one year ago by a small number. The moderate run has served to a certain extent to prevent much of a decline, but still the prices on hogs at the close of the week is about Tige lower than at the close of last week's business.

Unly, 7.20c; September, 7.85c. Spot Rio, year ago by a small number. The moderate steady; No. 7 invoice, suffice.

OMAHA WHOLESALE MARKET.

Condition of Trade and Quotations on sentative soles:

SHEEP—There were only three cars of sheep received this morning, and as there were no sheep of any consequence left over from the sales of yesterday the market this morning was practically bare and there was no trading at all to speak of. The supplies of sheep this week were very liberal, about \$9.000 head being received, as against \$6,000 head for last week. The run has been pretty well divided this week as to killers and feeders, but the demand for practically all kinds of feeders has narrowed down so that the outlet for feeding stuff of the number that have been received here this week has been entirely too small. There have been but a comparatively few buyers in this week, and this fact has aided the packers in forcing the prices down on all fat stuff. Late this week the market has been in pretty bad shape, the most of the stock received being of the common sort, which has found a rather slow sale.

The run of fat sheep during the week has been a very fair one, but for the most part has consisted of the common run of stock, while buyers were in a bearish frame of mind and were wanting the better class of stuff, with the result that the market was rather slow; this is especially true of the latter part of the week. Good, fat lambs have sold at prices that were just about steady with last week's close, while owes, wethers and yearlings are 10915c lower than last week.

There has been a fairly good run of feeders this week, but, as the case with the tast.

than last week.

There has been a fairly good run of feeders this week, but, as the case with the fat stuff, the majority of the feeders consisted of the common and light stuff, causing a slow market. Light feeding lambs have suffered a decline of 250,40c, while feeding cwes have declined 206,35c. There have been but few yearings and wethers offered this week and these have sold mostly 54,0cc.

lower.
Quotations on fat sheep and lambs: Good to choice fed lambs, \$7.00@7.25; good to choice range lambs, \$6.90@7.25; good to choice old wethers, \$5.40@5.60; good to choice old wethers, \$5.40@5.60; good to choice old ewes, \$4.60@5.60; good to choice old ewes, \$4.60@5.50.

Quotations on feeder sheep and lambs: Good feeding, \$5.65@5.15; good feeding year-lings, \$4.75@5.25; good feeding wethers, \$4.60 @5.00; good feeding owes, \$4.75@4.35; breeding ewes, \$4.25@4.50.

Foreign Financial.

LONDON, Nov. II.—Money was in good supply in the market today and rates were steady. Considerable sums changed hands in connection with the issue of \$1.30.00 in corporation bills and the distribution of \$3.70.00 in interest and dividend payments. Discounts were immaterial, being merely an adjusting of positions for the general carry-over November 13. Consols were steady. Home rails were occasionally a fraction better. Americans opened firm at parity. The changes were mixed, gains predominating on New York buying. The dealings were moderate but prices closed strong. Grand Trunk juniors were supported on the traffic returns. Foreigners were rather active. Russians recovered part of yesterday's loss, Japanese were in fair demand. Japanese imperial sixes of 190 were quoted at 101%.

PARIS, Nov. II.—The tone in the bourse today was hesitating. Prices were heavy. Russian imperial fours were quiet at 9.04 and Russian bonds of 1904 at 518.00.

BERLIN, Nov. II.—Frices on the bourse today were generally firmer.
