Wheat Advances Three-Eighths of Cent at Session's Close.

GOOD FOREIGN AND DOMESTIC DEMAND

Argentina's Exportable Surplus About Same as Last Year—Corn Shows Slight Gain—Gossip of the Trade.

OMAHA, Dec. 14, 1935. Wheat was up 3/8 at the close on strong domestic demand and good export demand. The opening and good export demand around opening figures until after...

Primary wheat receipts were 73,000 bushels and shipments 29,900 bushels, against receipts last year of 56,000 bushels and shipments 22,000 bushels. Corn receipts were 712,000 bushels and shipments 80,000 bushels against receipts last year of 720,000 bushels and shipments 80,000 bushels.

According to today's Inter Ocean a Chicago trader says that the corn longs have been liquidating for a week or more and while liquidation is not entirely over, and the lower levels are being attained, it is not advisable to watch for a sharp decline in the price of corn.

Chicago Grain and Provisions Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, Dec. 14.—Moderate purchases by bull leaders caused final quotations on the May delivery being up 3/8. Corn was up 1/4 on a steady demand. Provisions showed a gain of 2 1/2 to 3 1/2.

Trading in the wheat pit was quiet and prices fluctuated only slightly during the day. During the first half of the session movement was inclined to be bearish, although the news of the day was such as to give the market an indefinite character as to be of little value.

Increased local receipts depressed corn prices early in the day, but this influence was offset later by a heavy trading in wheat. The volume of trading was extremely small. The market closed firm with prices up 1/4 to 3/4.

NEW YORK STOCKS AND BONDS

Speculative Interest in the Market is Fully Maintained.

VALUES ARE IRREGULAR AT ALL TIMES

Brilliant Advances in Stock of Large Interest Keep Alive Confidence and Facilitate Realizing of Profits.

NEW YORK, Dec. 14.—Speculative interest in the stock market was fully maintained today as it is abundantly indicated by the volume of trading and the fact that it was decidedly irregular at all times and more than once during the progress of the trading.

The evidence of successful progress in the distribution of holdings is one of the most satisfactory features in any bull market. The almost entire abandonment of the course of the current speculation has been a large cause for the distrust and criticism of the market as being artificial and flagrantly manipulated.

While call loans were made at lower rates on the stock exchange today it is realized in all quarters that the market is money uncertainty is not yet past. Time loans for short periods continue to command a premium in the market and the call loan rate has not yet returned to 7 or 8 per cent.
