The United States Treasury department furnishes a contradiction to the weekly statement that clearances were mostly of Canadian wheat. It says clearances of American flour for December were 1,57,000 bbls., of wheat 7,270,318 bu. These figures do not include Canadian wheat.

A message from Pringle, Fitch & Rankin at Chicago says: "Fitty loads of Manitoba wheat has been sold for export since yesterday's close. There are still further orders in hand, but the Manitoba has advanced by the checking business for the moment."

From the Inter-Ocean: "The premiums on red winter wheat indicate that either there has been an unprecedented consumption of soft red winter wheat or that farmers are holding back large quantities or that the crop was the consumption of soft red winter wheat or that farmers are holding back large quantities or that the crop was the consumption of the crop was the mers are holding back large quantities or that the crop was greatly overestimated. The latter theory has many believers. It is selling lower in Chicago than in any other market. It is 7½c lower than in St. Louis and is at almost at a shipping difference; it is 14½c under Kansas City, while the freight difference is only 9c a bushel between the two markets.

It is selling here at May price in store, or 3½c over January and there is 2,316,600 bushels here. At St. Louis it is 12½c over January and at Kansas City it is 12½c over May."

Features of the Trading and Closing Prices on Board of Trade. CHICAGO, Jan, 17.-Improved weather in

Argentina was the cause of a moderate decline today in the local wheat market. At the close wheat for May Activery was off the close wheat for May Activery was off the close wheat the May Corn and provisions were up tally unchanged.

Following a decline at Liverpool based resions were practically unchanged. Poliowing a decline at Liverpool based upon the change in Argentina weather conditions the wheat market here opened easier, with the May option a shade to % the lower at 85% to 85%c. Pit traders sold freely and there was also some selling by local longs. Weather conditions in the United States were generally regarded as favorable and the movement in the northwest continued on a liberal scale. Before the end of the first hour the price of the May delivery had dropped to \$7%c. For a time trading was slow but toward the end of the session shorts bought actively because of a report from New York of an increased export business. The close was

of the session shorts bought actively because of a report from New York of an increased export business. The close was steady with May at \$75,958c. Clearances of wheat and flour were equal to 165,000 bu. Frimary receipts were 703,000 bu., compared with 689,000 bu. a year ago. Minneapolis, Duluth and Chicago reported receipts of 650 cars, against 355 cars last week and 630 cars one year ago.

The slump in wheat caused some weakness in corn early in the day, but on active demand by cash houses the market became steady. Other buillish factors were a continued good export demand and small local receipts, the arrivals being lil cars of which twenty-filine cars were of contract grade. The market closed ateady with prices at almost the highest point of the day. May opened unchanged at 45%c, sold between 45c and 45%c and closed at 45%c. Despite the weakness of wheat, the oats

Despite the weakness of wheat, the cats market was strong throughout the session. Offerings were light and mostly from small holders. Late in the day the market was strengthened by reports from New York of large foreign sales. May opened a shade lower to a shade higher at 31% 331% c, sold up to 31% c and closed at 32c. Local receipts were 131 cars.

up to 214c and closed at 32c. Local receipts were 13t cars.

Provisions were firm at the opening because of a 5c advance in the price of live hogs. The principal selling of the day was by the larger packers, and offerings were for the most part taken by shorts. At the close May pork was off 24c, at \$14.00. Lard was up a shade at \$1.0007.624. Ribs were a shade lower at \$7.524.07.55.

Estimated receipts for tomorrow: Wheat, twenty-six cars; corn, 22s cars; oats, 140 cars; hogs, \$6.000 head.

NEW YORK, Jan. 17.—The features of to-day's stock market was the speculative operations in a number of stocks which have been exhaustively exploited in the speculation of the immediate past and which passed through a period of profittaking subsequent to that speculation. There was a lively renewal in the same connection of a great variety of rumors, mostly pointing to combinations and mergers, which have already played a principal part in the advances effected in those stocks.

The capacity demonstrated by the movement for the completion of a digestive process of profit-taking in the market and a still further advance in the stocks affected made a considerable impression on speculative sentiment. The reversion of the market operations to these stocks was a accompanied by constant profit-taking at other points of the list. This extended to many stocks which showed strength in the earlier part of the day, so that they were made to yield their gains in the subsequent dealings. The most conspicuous example of the reversion of the speculation to former channels was that of Union Pacific. This was subjected to some further extensive profit-taking in the earlier part of the day, but it broke through this restraint later and rose to a new record levels amale and Lead both rose to new record levels. Amalgamated Copper was kept down or forced back when it did advance by a donstant stream of realizing sales. The news concerning these properties was plentiful, but was entirely in the form of rumors. The settlement of the Montana copper war, a merger of the smelling and lied metal industries are samples of the character of these rumors.

The actual news of the day was not important beyond the continued heavy ac-NEW YORK, Jan. 17.-The features of to-New York Money Market. The constant pressure upon Amalgamated Copper proved too strong for the resisting powers of that stock. Its sharp break later in the day decided the course of the rest of the market, which had been subjected to steady profit-taking under cover of the advances in the specialties which have been described. The price of copper in London fell sharply and some apprehension was expressed of a possible reaction in the markets for other metals. Attention was attracted by the remarks of President J. I. Hill of the Great Northern asserting that the nation was living profligately, and some seiling was said to be due to the tenor of the address. There were rallies from the late break in sympathy with the downward plunge in copper and the closing tone was steady.

Bonds were irregular. Total sales, par value, \$6,066,090. United States bonds were all unchanged on call.

sight. The market was in the most unsatis-factory shape that it has been in for a long time back. No one appeared to be just sure where he was at, either buyer or seller. A few loads sold right on the open-ing at prices that did not look very dif-ferent from yesterday, but that stage of the market did not endure for very long. Buyers almost from the beginning were offering prices that were is lower, and be-

fore anyone had time to turn around the market was Myloc lower. It is needless to add that the trade was extremely slow and dulil. Sellers made a strong, fight against the inevitable and they would not give up so long as there was the slightest ch of forcing huyers to do better. The r was that it was well along toward mi before any business of consequence transacted. Representative sales:
