NEBRASKA GRAIN TO GULF

All Shipments Practically Moving Southward Instead of to the Atlantic.

NO ROAD MEETS WABASH LATEST HATE

Schedules for Omaha Packing House Products Cut to Head Off Alton for Manana City Still Unmatched.

Grain from Nebraska is practically all moving to the gulf at present because of the difference in freight rates between the gulf and the Atlantic seaboard. The rate on all roads except the Wabash to the east are 11 cents to Chicago, 11% cents from Chicago to Baltomore and a charge of 116 cents for loading on the boats, making a total of 24 cents against a rate of 18 cents to the gulf, which rate also includes loading on the boats.

The Wabash has a rate via Baltimore and Hannibal of 23 cents to New York, but the local agents claim they are not taking any grain for Baltimore on this rate or even with the differential. The Wabash had announced this rate would be published to the east, but this announcement was followed by an announcement that the rate would be withheld, pending the meeting in New York last week. In spite of that announcement the rate was given to the Interstate Commerce commission and is now the rate. Mr. Ives explained the rate only applied via Hannibal.

Wabash Rate Not Met.

No other road from Omaha has as yet announced it will meet the rate which Mr. Ives put in for the Wabash on export packing house products to put Omaha on an equal footing with Kansas City. The Alton had cut the rate from Kansas City and the Wabash met the rate and made it also apply from Omaha. Other roads say, however, they stand ready to contract business on the same rate as the Wabash has They say they can do this and then publish a tariff which will cover it. The packers are taking advantage in the break in rates and have gone right after the railroads to have the reduced rates apply to all the products that they manu-

Most of the eastern lines from Omaha have a route whereby they get a haul, on grain destined to the gulf. The rate to the gulf is 18 cents, of which the roads get 8 cents to St. Louis or Centralia, and 10 cents from there on to the gulf.

facture and to have the rates also apply

to all Mississippi river crossings as well

as at St. Louis. Nothing has been done

BURLINGTON IN THE BIG HORN

in the matter to date.

New Line Will Tap Rich Country for Omaha.

Wyoming is considerably worked up over the flling of articles of incorporation by the Big Horn Railroad company over the signature of George W. Holdrege, general manager of the Burlington. This is taken as a definite conclusion on the part of the Buildington to build a line from Denver to the Shoshone reservation to connect with the Francie-Worland line at a point near Ehbshone. The amended articles say in

part:

The Big Horn Railroad company, in addition to the powers set forth in its original certificate of incorporation, shall have the power to construct, maintain and operate a branch of its railroad beginning at the junction of the Big Horn river with Muskrat river, in Fremont county, Wyoming, and running in a southeasterly direction through the counties of Fremont, Natrona, Sweetwater, Carbon and Albany to a point on the Wyoming-Colorado state line between the 166th and 167th meridians of west longitude.

The filing of these articles explains the

The filing of these articles explains the presence of a large corp of engineers in the neighborhood of Laramie, which town now idea, that it will be on the proposed route. It is thought the road will run from Lyons, the terminus of the Burlington's branch, north out of Denver, through Larimie and from there down the Big Horn fiver to connect with the branch now being uilt south from Frannie to Worland.

This will give the Burlington a splendid line from the Yellowstone and Big Horn country to Omaha, putting the Wind River and making a second trunk line to the northwest. The Burlington is working on exactly opposite lines from the Union Pacific. The Burlington has a regular network of feeders in Nebraska, while the Union Pacific is practically a big trunk line with few feeders. The Burlington is working for more trunk lines, while Harriman is working for more feeders.

Vast improvements are constantly in progress all along the line of the Union Pacific and the track is kept in the most perfect condition. At Grand Island alone over 100 extra men have been at work for over one year putting the tracks and yards neglected the necessary formality. in the best of condition for handling cars. Japa are being tried out in some places on the road and these will also be employed in the beet sugar fields where labor is scarce. The ballast of the Union Pacific is almost entirely Sherman gravel, the gumbo which formerly was burned for ballast near Elkhorn having been discarded some time ago, being too expensive and not so satisfactory.

The fill near Elkhorn no longer gives the road trouble, as pilling has been driven. which gives a firm footing and holds the fill in good shape.

In accordance with the announced plan of the Rock Island to improve its roadbed. under the direction of the new engineer, J. B. Berry, construction plans call for the reballisting with rock during the coming year of 600 miles and the renewal of 300 miles of track with eighty-five-pound rails. About 100 miles will be equipped with automatic block signals.

Railway Notes and Personals. General Manager Mohler of the Union

Pacific arrived from Chicago Tuesday morning.

It is estimated the Chicago, Milwaukee & St. Paul railroad will have 300 miles of trackage in the state of Washington.

A. E. Campbell, traveling freight and passenger agent of the Burlington out of Denver, is booked for the position of agent of the Burlington at Seattle.

Trains from the east were from one to three hours late Tuesday morning and the trains from the west were all in better shape. The snow in Iowa made fast running on the speedy trains almost our of the question.

Buperintendent Park of the Union Pacific

question.
Superintendent Park of the Union Pacific is making a tour of the Nebraska lines. He went Sunday to inspect the new ice houses of the company which are being built at North Platts to replace those recently destroyed by fire.

Frank S. Elliott is appointed superintendent of the Rio Grand Western Rallroad company, with headquarters at Sait Lake. The office of assistant superintendent is abolished and all reports will be made to the superintendent in the rature.

Receive next Sunday, the Rock Island Rocky Mountain Limited, which hereto-fore has left Omaha at 7:20 in the morning, will leave at 8:25 and arrive at Denver and Peublo at practically the same time.

OLD FOLKS LEAD AT ALTAR Next to Them Come Minors Who Want Matrimony.

Up to a few days ago the majority of marriage licenses issued since Christmas were applied for by people well along in years. The last few days the youngsters have been getting in the game. Out of the last seven licenses issued by License Clerk Morrill four have had to get the written country within twenty-four hours of Omaha permission of their parents. Three of these "infants" were young men under 21 and one girl was under 18. One male applicant had an elder brother with him, but Mr. Morrill gently chased him out to get his father's permission.

"Your brother may be posted on the matrimonial state and not afraid to consign you to it," said Morrill, "but your father is the man I must do business with, and your mother, too, may desire to have i word."

The permission always is forthcoming but in the course of a year a large number of minors show up for licenses who have

WOLF WOULD NOT PAY WILLIE Brooklyn Man Fined Five and Costs Because of Refusal to Pay

for a Meal. Among other lessons of life that A. W. Wolf of Brooklyn has learned in Omaha is that the legal way is the best way in the long run to pay for a meal when ordered and ate in a restaurant. Wolf was arrested Monday evening by Patrolmen Ryan and Rinn on the charge of disturbing the peace by refusing to pay for a meal at the restaurant of Leo Willie, 404 South Thirtsenth street. Willie, who is a Chinaman, has well defined ideas about the payment of meals. He knows how to make change and what to say when a patron takes exceptions to helping support the
