CHICAGO, Feb. 2.—Notwithstanding the fact that the predicted cold wave failed to develop in the winter-weat section. A reported increase in ing by pit traders. A reported increase in exports from Argentina of almost 1,00,00 exports from Argentina of aimost 1,00,000 bushels over the corresponding week of one year ago increased the seiling movement. The market closed firm, with prices at the highest point of the day, the final quotations on May being Sites 845c. Clearances of wheat and flour were equal to 32,000 bushels. Salesmen, however, were generally asking more money and there was very little trading done on that basis. Soon after market firmed up and became \$51000 higher, the hogs selling freely at \$5.41495.50. Some of the hogs sold as high as \$5.55.

After the more urgent orders were filled the market slowed up and half or more of the early advance was lost. From that time on the market became very slow and dull under the influence of the bear tactics, followed by some of the heaviest packers.

The close was very slow and weak.

Today's advance carries the market to the highest point touched so far this year.

There is nothing new to be added to what has aiready been said in these columns regarding the situation in the sheep market. The change to somewhat cooler weather yesterday and today has given rise to hopes that the east may be covered by a cold wave, which would have a tendency to improve the mutton market. At the present time all that is necessary, apparently, to place the sheep and lambs market on a good basis is a normal consuming demand from the large eastern centers. Until there is a radical improvement in the eastern mutton mark to the market on live sheep and lambs and would continue advising moderate shipments.
