cumstances it is almost impossible that companies as busily engaged as ever while they can become good citizens. This trying to head them off. What the New York Press Says.

The Bankers Reserve Life Company.

One of the growing life insurance companies of the middle West is the Bankers Reserve Life Insurance Company of Omaha, Neb., of which B. H. Robison is President. Last year this institution maintained the degree of growth established in previous years and added satisfactory amounts to the various items making up its annual statement. The assets increased during the year from \$341,520 to \$519,775, and after providing for all liabilities there was left a surplus on policy holders account of \$135,589. Premium income of \$409,556 shows a gain of about \$100,000, while the insurance in force increased by \$2,005,305 and now aggregates \$11,-348,555. The company maintains a deposit for the protection of its policy holders with the State Auditor of Nebraska, which now amounts to \$100,900, and the statement submitted to the policy holders bears the certificate of the State Auditor to the effect that the securities claimed by the Company have been actually verified and found correct. The Company confines its operations to the territory contiguous to its home state, in which it is gradually building up an excellent reputation for itself as a clean-cut, progressive organization. A commendable feature of the Company is the frankness with which every detail of its operation is given to the policy holders by means of detailed annual reports' from every department.—The Spectator, New York, Feb. 1st, 1906.

Concerning Pianos-Some Questions Answered
