

GRAIN AND PRODUCE MARKET

Bulls Rule Early Hours in the Wheat Pit. Closing Price Considerably Lower. Dumping of Large Linn Cases Declines—Many Reports of Dry Weather in Southwest—Corn Easy and Oats Steady.

OHAMA, Feb. 7, 1906.

Report of dry weather in Nebraska, Kansas, Oklahoma, Missouri, etc., this morning. Aided by strong cables which succeeded in establishing a bullish sentiment on wheat for a time. At the advance, however, large lines were dumped and a decline ensued which left wheat 1/2c lower for May and 1/4c for July. Toward the last there was considerable selling of July and buying of May. May closed at 82c, July at 83c, and September at 84c.

Corn opened firm, but later evidenced a slight weakness in sympathy with wheat. The close was 1/2c lower, May closed at 44 1/4c, July at 44c, and September at 44c.

Oats were steady and closed unchanged. May finished at 30 1/2c, July at 29c, and September at 28c.

Clearance was 20,000 bu. of corn, 119,000 bu. of oats, 16,000 bu. of wheat and 2,000 bush. of flour. Primary wheat receipts were 26,000 bu. and shipments 20,000 bu. against receipts last year of 28,000 bu. and shipments 22,000 bu.

There was a good demand for cash wheat at Minneapolis. Millers were buying in the open market for No. 1 northern.

Chicago Grain and Provisions. Features of the Trading and Closing Prices of Board.

CHICAGO, Feb. 7.—Wheat—A large increase in the wheat crop of Australia, indicated in a private dispatch received here today, was responsible for a weak close in the market.

During the early part of the session the feeling in the wheat pit was steady. Numerous reports of damage to the crops in Nebraska, Kansas and Missouri were received, but these dispatches apparently were not able to offset the fact that prices in Liverpool for the wheat crop increased shown in yesterday's market.

Provisions were strong because of a decline in the price of live hogs. A local packer bought liberally of pork and lard and commission houses were buying from the sellers.
