

The best test of any food is the ability to work well on it; sleep well after it; keep well by it.

No article of food has stood this test so well—so long as the soda cracker. No soda cracker has stood this test so satisfactorily as Uneda Biscuit.

Babies have thrived on them; strong men have kept strong on them; sick folks have lived on them; well folks have kept well on them.

The conversation took place in the superintendent's room, where the representative had tarried for a few minutes. Hugh immediately undertook to convert him to Broatch. It required only a few minutes for Mr. Barnes to announce where he stood and he did so in a voice which total disregard for consequences, real or imaginary.

## MILLION ACRES RESTORED

Amount of Land Brought Back for Entry by Prosecutions.

ALL HELD UNDER FRAUDULENT FILINGS

Chief Wheeler and His Secret Service Force Will Round Up This Acreage by First of July.

As a result of the investigations made by the land department through the secret service and other land agents within the last several months there will have been restored to the public domain 1,000,000 acres of land by July 1, which will become available for public entry under the homestead laws. This 1,000,000 acres represents the actual amount of land which has been segregated from the public domain by fraudulent filings, the evidence of which is substantiated by affidavits procured by the special officers of the government detailed to make these investigations.

All of this work is directed from the Omaha office in the federal building, the agents and secret service men being under the immediate direction of L. C. Wheeler, to whom all reports are made direct.

Reports constantly are being received from the agents in the field of northwestern and northern Nebraska. These affidavits, which show a remarkable degree of fraudulent practices, are obtained from various sources, and particularly wherein the land has been bought outright on the final proof certificates of the parties employed to make them.

One bunch of affidavits recently was received from a bank at Red Oak, Ia., through which the money had been paid to the parties making proof and upon the presentation of warranty deeds to the claims. Among these are several soldiers' widows, the consideration being \$75 and \$100 per acre. Practically all of these fraudulent transfers and filings have been made since the fall of 1903, and all of such have been recommended for cancellation. Where a patent has already issued it will be impossible to secure a cancellation of the entry. And where the transaction was completed prior to 1903 the statute of limitations bars the government from recovery.

## AMATEUR SHOW A BIG HIT

Metropolitan Club Minstrels Prove Their Ability to Entertain is Unlimited.

A night in camp in the woods was made the basis of a vaudeville performance, the numbers being embellished by local bits in which the club members were victims. The principal numbers on the program were a chalk talk by Jerome Heyn, songs by

## CAR MEN'S UNION GETS BUSY

Two Meetings Held for Purpose of Strengthening its Organization.

ANGUS AT HOME AT THE TIME

Youth's Mother Proves Alibi for Him to Contradict His Confession of Holdups.

At Wednesday afternoon's meeting of the Street Railway Employees' union C. O. Pratt counseled more perfect organization among the local street car men and urged loyalty to the international association. The session was a closed one and was largely attended by the night force of men. Another meeting was held last evening and that session, too, was executive. No action has as yet been taken on the report of the executive committee regarding its conference with the street railway officials.

President P. J. Lenihan of division 288 of the carmen's union said Wednesday afternoon:

"Our grievance lies with the apparent discrimination against the men because they belong to the union. There have been three dismissals of our members during the last few weeks, which had largely to do with the fact that they were union men. The head men of the company do not make any discrimination because of the union, but some few of the bosses do, but not all of them."

General Manager Smith stated that no grievance complaints had come direct to him, nor did he know of any serious grievance prevailing. Such matters, he said, would naturally come to Superintendent Tucker.

Superintendent Tucker said: "A committee of the employees visited me this morning in the interest of the union. They held that one of the foremen was discriminating against union men. We have had no trouble with the union at all. I asked the resignation of one of the conductors because he had been observed going into a saloon while on duty on two occasions. The rules of the company are very rigid in this respect, as they are in all corporations. The offending conductor was admonished for the first infraction of the rule. Shortly after this the offense was repeated and his resignation was asked. One of the purposes of the visit of the committee this morning was to ask his reinstatement. As regards any discrimination against union men, there is nothing to it."

## THE CHICAGO TRIBUNE

Health Commissioner Reynolds of Chicago, in his latest bulletin of the department, says that the worst danger to which the children of Chicago are now exposed is the neglected cold.

It would be unwise for the health commissioner of a city to recommend any remedy for a cold; but should he do so, Chamberlain's Cough Remedy would certainly head the list as the most efficacious for colds, croup and whooping cough in children, as a remedy that can always be depended upon to effect a speedy cure and that is pleasant and safe to take. This remedy contains no opium or other harmful drug and may be given as confidently to a baby as to an adult. Its great worth and merit in the treatment of these diseases has been attested by many thousands of mothers.

Announcements of the Theaters.  
The day's entertainments were good ones, when they were becoming rained of startling hue and stuck each other under the fifth rib with as much grace and carelessness as they arranged their ruffles. ## THE OTHER MAN

THE ONE WHO IS MANLY, VIGOROUS AND STRONG

Is the man who is not suffering from the ravages of private and sexual diseases, sickly debility, effects of Nervous Debility, Weakness, etc. Comparisons are usually odious, but the weak, sickly debilitated man cannot help comparing himself with the "OTHER MAN."

THE OTHER MAN treats all men when the first symptoms show themselves there need be no such comparisons. And there would be few men seeking a rejuvenating of their physical, mental and sexual powers, and there would be none marked with the indelible stamp of constitutional syphilis, and the sufferer from

Varicocele, Gleet, Stricture, Hydrocele, Impotency, Gonorrhoea, Emissions, Nervous Debility, Rupture, Kidney and Bladder Diseases,

would be reduced to a minimum. But as long as MEN continue to disregard the golden advice, and continue to neglect themselves or to exercise indifference, or poor judgment, in securing the right treatment at the outset, just so long will there be multitudes of chronic sufferers.

Many a bright and promising career has been blighted by injurious habits or folly before the age of knowledge and understanding, and many have been cut short by the unfortunate contracting of some poisonous special disease, which, through neglect or improper treatment, has completely ruined and shattered the physical strength and mental faculties. No greater mistake can be made than to lightly the first evidence of the introduction of any private disease into your system or to neglect the first symptom of weakened mind and ap-

proach of nervous debility, caused by improper or unnatural habits, excesses, dissipation, etc.

Such indifference and neglect of the first symptoms are responsible for thousands of human wrecks, failures in life and business, domestic discord and unhappy married life, divorce, insanity, suicide, etc. Men! Why take such desperate chances? The manifestation of the first symptoms of any disease or weakness should be a warning for you to take prompt steps to safeguard your future life and happiness. You should carefully avoid all uncertain, experimental, dangerous or half-way treatment, for upon the success of the first treatment depends whether you will be promptly restored to health again, with all taint of the poisonous disease removed from your system, or whether your disease will be allowed to become chronic and subject you to future recurrences of the disease, with the various resulting complications, etc.
