doubtful if the big dredge belonging to the city which was used for deepening the creek from Sixteenth avenue to the Missouri river can be utilized for this work. Mr. Muloney stated yesterday that it was likely the committee would decide on employing scrapers and teams.

The committee has \$20,000 at its disposal for the work, this amount having been guaranteed by the several railroads having bridges across the creek. It is the intention of the committee, according to Mr. Maloney, to commence the work with as little delay as possible and to employ as big a force as can be handled properly so as to complete the work if possible before the June rains, which cause periodic overflows of the turbulent little stream.

The committee in charge of the work consists of Councilmen Maloney, chairman: Tinley and Olson and City Engineer
