RESOLUTION IS APPROVED

President Agrees to Request for Information Regarding Railroads and Trade.

OTHER PROVISIONS MUST BE MADE

Mr. Roosevelt Sees Opportunity of Preventing Prosecution for Offenses if Present Plan is Carried Out.

WASHINGTON. March : - President Roosevelt today sent a message to con-

main practically insperative unless money be provided to carry on the investigation and the commission be authorized to take centimony under its provisions. He suggests, therefore, that congress give serious onmideration to just what it desires the Interstate Commerce commission to do. and that \$50,000 be placed at the disposal of the commission to defray the expenses of the proposed investigation

Message of President. The message in full follows:

To the Senate and House of Representa-tives: I make signed the joint resolution instructing the Interstate Commerce com-mission to make examinations into the instructing the Interstate Commerce commission to make examinations into the subject of railroad discriminations and monopolies in coal and oil and report on the same from time to time. I have signed it with hesitation, because in the form it was passed it achieves very little and may accomplish nothing, and it is highly undestrable that a resolution of this kind simil become law in such form as to give the impression of insincerity that is, of pretending to do something which really is not done. But after much heditation I considered to sign the resolution, because its defects can be remedied by legislation which I legeby ask for; and it must be understood that unless this subsequent legislation is granted the present resolution.

The committee will promise Mr. Jardine a relief from onerous duties if he will stay must be mattily, and may be entirely, incorrection.

briary 15, 196, relating to the oil indust, and a further part having to do with a source him that the board needs him for the counsel he can give.

GIRL DRAWS THREE YEARS February 15, 1866, relating to the oil industry. And a further part having to do with the anthracite coal industry, has been for some time under consideration by the Lieparament of Commerce and Labor. These investigations. I am informed, are approaching completion, and before congress adopting 1 shall submit to you the promotion of these investigations. I have investigations. The investigations in the period of these investigations. The investigations is the first sitting of the court in April.

Shallenberger Stock Goes Up.
While the democratic love feast held at the Lincoln botel last night has failed to create any stampede into the ranks of the unterrified it has created some discussion. One thing shown at the banquet was the fact that A. C. Shallenberger is the strong man in the democratic party for governor, pay a specified sum each month until the seeing the two investigations con-

May Prevent Prosecutions.

In the second place, I call your attention to the fact that if an investigation of the nature proposed in this joint resolution is thoroughly and effectively conducted it will result in giving immunity from criminal processories to all persons who are called, sworn and constrained by compulsory process of law to testify as witnesses, though, of course, immunity from processories in not given to those from whom statements or information merely in contradiction to sworn testimony is obtained. This is not at all to say that all investigations should not be undertaken. Publicity can by itself often accomplish extraordinary results for good, and the court of public judgment may secure such results where the courts of law are nowerless. There are many cases where an investigation securing complete publicity about tion securing complete publicity about abuses and giving congress the material abuses and giving congress the material on which to preceed in the enactment of laws is more useful than a criminal prosecution can possibly be. But it should not be provided for by law without a clear understanding that it may be an alternative instead of an additional renedy—that is, that to carry on the investigation may serve as a bar to the successful prosecution of the offenses disclosed. The official body directed by congress to make the investigation must, of course, carry out its direction and therefore the direction should not be given without full appreciation of what it means.

But the direction contained in the joint

resolution which I have signed will remain resolution which I have signed will remain almost inoperative until money is provided to carry out the investigations in question and unless the commission in carrying them out is authorized to administer caths and compel the attendance of witnesses. As the compel the attendance of witnesses. As the resolution now is the commission, which is very buss with its legitimate work and which has no extra money at its disposal, would be able to make the investigation only in the most partial and unsatisfactory manner; and, moreover, it is questionable whether it could under this resolution, administer oath at all or compel the attendance of witnesses. If this power were disputed by the parties investigated the investigated to investorment a candidate when the bill becomes a law.

Roosevelt today sent a message to congress announcing his signature to the joint resolution recently passed instructing the interstate Commerce commission to make examination into the subject of railroad discriminations and monopoles in coal and oil. He says frankly that he signed it with hesitation because it may achieve little or nothing. He indicates, too, that if the investigation proposed by the resolution is conducted thoroughly it will result in giving immunity from criminal prosecution to all persons who are connected and swarn as witnesses.

In the opinion of the president the direction contained in the resolution will return the opinion of the president the direction contained in the resolution will return the opinion of the president the direction contained in the resolution will return the opinion of the president the direction contained in the resolution will return the processory to render the investigation by a commission and then not to furnish either the full legal power or the money, both of which are necessary to render the investigation effective.
