On track No. 1 northern, 1906, No. 2 northern, 1906; May, 1906; July, 1906. OATS—To arrive and on track, and May, 1906.

CLOSE IS PRACTICALLY UNCHANGED. Corn strong on Light Receipts and Bad Weather for Movement—Oats Close Firm at Slight Advance.

OMAHA, March 14, 1906. Favorable weather and weak cables offset better cash demand in wheat today. Reports of crop condition in the southwest were bearish and receipts were nearly double those of the same day last year. The market began weak on the foreign situation. There was good buying by shorts at the decline and the market recovered to the low point. Both the northwest and southwest crowds were heavy sellers at the advance and the market turned weak again. The close was but slightly better than yesterday.

Features of the Trading and Closing. CHICAGO, March 14.—Favorable weather for fall-sown wheat in the United States offset today the effect of a report of a famine in Russia and a steady close in the wheat market. Final quotations on the May delivery showed very little change from the closing of yesterday. Corn and oats were each up slightly. Provisions were a shade higher.

NEW YORK, March 14.—The limitation upon the possible oscillation of prices was demonstrated again in the stock market today. The lack of available medium for successful trading operations had a discouraging effect upon the professional element who had the market to themselves for several days, and transactions even of this character subsided abruptly.
