THE OMAHA ILLUSTRATED BEE.

# Proclamation of Freedom Brings Death and Terror to Warsaw

ARSAW, February 11.-(Special Correspondence of The Bee.)-The times are so exciting here that one hardly has time to write to you people across the sea in your happy country-happy because free. Notwithstanding two proclamations of the imperial decree, one of October 30 and the other of December 16, 1906, by which the socalled constitutional rights were given to the people of the entire empire, and more particularly to those of Poland, this country is still in a "state of slege" as I write, and the black terror of absolutism is raging in every part of the land in every possible manner.

In the first place the humorous constitution has promised the people the right to erect and to form a national congress or legislature, called here the "Douma," which is to congregate in St. Petersburg. On hearing such giorious news the people of the city, on the evening of November 1, the day after the first proclamation, organized a great procession through the streets, marching with national fings flying and singing patriotic songs. By common consent they all met at the end of the various line of march in "Theater square" before the "magistrate's building," or city hall, as it would be called in America. This building contains the chief police station of the city and the people expected that, in commemoration of the proclamation of the constitution, and according to its terms, the political prisoners would be released. Warnaw is a city of over \$50,000 people and it is not surprising that, while many persons did not take part in the procession, the square was, in a short time, literally packed with people.

# 

Cossneks Sabre the People.

Then followed an event which could not have taken place outside of the Russian after all, the exiles may be more fortuempire. The managers of the parades had not taken into their confidence Mrs. Bibicoff, wife of the president or mayor of Warsaw, who resides with his family in the city hall. Mrs. Biblcoff is a sister-inlaw of Mr. Scallon, the governor general of Poland. When she saw the great crowd, which was so dense as to be practically immobile, she became alarmed. Others besides her were alarmed, as the authorities," which had permitted the parade, were not prepared for one of lis size; but their fears were nothing compared to those of the woman. She immediately communicated with the governor general by telephone, telling him of the crowd and of her fears. He, without waiting to investigate the matter, immediately issued a command by telephone to an officer of the troops, telling him to clear the square forthwith. This terrible order was given to Cossacks for execution. These semi-barbarous troopers knew nothing of the situation and clear the square and instead of executing the order in a sensible manner they entered the square mounted through each of the four avenues leading to it, and with drawn swords charged the unarmed and peaceable men, women and children there assembled.

It seemed that they felt called upon to Mukden, and well they did their "duty," sword men, women and children in all conditions of life, leaving many wounded upon the streets and others maimed for

## Authorities Repress the People. This "scarlet first of November" will be recorded in the history of this country as

he "baptism of blood" of the glorious (?)

Conditions of the Prisons. I must now describe to you some of the prisons in which political prisoners are kept. In the city of Warsaw and its vicinity there are about 30,000 prisoners held for political offenses only. Many of these persons have been in confinement two and three months and have not been given examination. It is therefore probable that they are innocent and are being "held on . suspicion." The authorities were unprepared for so many "offenders" and had made no provisions for caring for them. After the regular prisons were filled they placed the unfortunate prisoners in the quarters most convenient to the officersin places which under other circumstances would not be used to shelter low-grade animals. Not having sufficient furniture for these temporary prisons, they give each probably cared less. They were told to prisoner ten pounds of straw to be used at night for a bed and during the day for a seat.

I here thought to describe the food given them, but after writing it down I fear to transmit it, as it would require an affidavit before a notary in order to impress its truth upon American minds, and under the circumstances I am making no affiavenge the defeats upon the Yalu and at davits on the subject when such must be recorded by Russian officials. Suffice it to for, without opening an avenue for the say that such rations were never issued to people to leave the square, they rode them civilized man before, except perhaps durdown, striking indiscriminately with the ing some of the starvation times in towns besieged in the "dark ages."

# Scenes on the Streets.

It may be better to illustrate rather than to describe the street life in Warsaw at this time, and for this purpose I send a number of photographs, some of them

In my next letter I shall give you more joyous descriptions, telling something of the preparations for the elections to the "Douma," which are being conducted with no more idea of what the thing means than an American would have of how to behave himself in a Polish police station. F. S.

nstitution. From this incident began the practice of the strongest representive means-tures on the part of local authorities, who understand that the new constitution will out the ground from under their feet. As cut the ground from under their feet. As a consequence the freedom of the press, so heraided in the imperial manifesto, has become, in the hands of the administrators of the old system, an excuse for still stronger and closer censorship. Many nevespapers have, since the proclamation, been confiscated, the offices closed and the utted by the police.

ated into English by the late Paul Soboswaki of Chicago, the hymn beginning:

And the given fame and all its glory bright And through long ages saved our Father-land

We chant at thy alters our humble strain. O, Lord, make the land of our love free again."

This hymn closes with the words:

If in the future we deserve thy wrath Turn us to dust-but let that dust free."

And this hymn, notwithstanding the imperial constitutional manifesto, is absolutely prohibited because there is a prayer in it for freedom, and that freedom would mean the end of the rule of despotic and "conservative" office holders.

> "We will work those parts of the union territory. Our selling agents will go from farm to farm like the canvasser does selling books, and will induce such as have money to buy this land on installments. If they are interested we will flood them with literature and will probably bring them to Canada at reduced rates of transportation to show them what we have to

In the mountime the lands are offered at several times the price asked for the spring wheat lands further north and east; but the Canadians claim that they are cheap on account of the water, which insures stendy crops year after year regardless of seasons.

Introduced by the Mormons. The practical possibility of an irrigated Canada was suggested by the Mormons. There are about 19,000 of them now living on irrigated lands near Lethbridge, between here and the United States boundary. They have established towns, have built up a beet sugar factory with a canital of \$1,000,000, have one flour mill, which is now turning out a carload of flour daily, and they are, altogether, one of the most thriving peoples of the new Canada.

These Mormons produced more than 1.000 -600 bushels of wheat last year, and they now shipping flour direct to Japan and China. They come from the irrigated states of Utah and Idaho. They farm on tracts of about eighty acres each, and I am told that they rales two or three times as much on such farms as can be raised in the non-irrigated section During my stay in Canada I have visited
