INCKI UKE

There is no use trying to stem the tide of public opinion

Good dressers are, year by year, becoming more favorable to our Millinery Department and for this there are many reasons. Here the dainty fineries for spring reign supreme; here all the spring styles in straws, flowers, foliage, feathers and millinery novelties have taken up their abode and demand the attention of those who wish to be correct in head dress. This sketch shows three Smart Spring Hats from our stock that was sketched by the artist from Imported French Patterns. A dozen leading fashionable milliners of New York and Paris are represented in our select stock of Spring Patterns, and masterful achievements in the art of good hat building is evidenced in every one of these superb creations. Short fronts with the extreme French bandeaux in the back, are features that count with correctly dressed women. Our stock so far surpasses those of any previous season, that you cannot imagine how great is the improvement in qualities, styles and varieties. Your inspection is cordially invited.
