On account of its frightful hideousness, specific or contagious poison in the blood is the worst of all diseases. It may be either hereditary or contracted. Once the system is tainted with it, the disease may manifest itself in the form of scrofuls, eczema, rheumatic pains, stiff or swollen joints, eruptions or copper colored spots on face or body-little ulcers in the mouth or on the tongue, sore throat, swollen tonsils, failing out of the hair or eyebrows, and finally a leprous-like decay of the fiesh and bone. Our specific treatment for this trouble, varied and modified to suit each individual case, is an unfailing cure to which a vast army of restored men today

ligion what the Hebrew patriarchs were to the old. The Irish nation was converted and ac-cepted the gospel of Jesus Christ, and in a few years a hundred monasteries covered the face of Ireland. They answered the spirit of God from the first day. These monasteries were the centers of the great-est influence, both intellectual and moral. The pope transferred to Ireland the duty of keeping intact the religion of Jesus Christ, and they kept it well. Men vested with the spirit of teaching were there when they could be found nowhere else, and it was these teachers that brought the re-ligion of Jesus Christ back to Europe, thus driving back barbarianism. France had lapsed back hat almost worse than Roman paganism. The Irish monks pitched their tents throughout continental Europe and around them arose intellectual centers and intellectual development and instilled a new life into those lands. It was an in-vasion of faith where 300 years before it had been an invasion of barbarism. Then Charlemagne appeared, but not until Ire-land had handed back to the European world the garlands of God it had received from Europe centuries before.

Could Not Be Fooled by Burgess Inte Excusing School Junitor from Jury.

Secretary Burgess of the Board of Edusation admits he lost out in an effort to induce George W. Stone, janitor of the Windsor school, from jury duty next week Since the present cold snap set in an epidemic of disability has taken place among the janitors and the secretary has been rather hard pressed to keep men busy at the furnaces. Said he:

"I told the judge the removal of Stone might endanger the lives and health of several hundred school children by requiring the use of an inexperienced man at the heating apparatus, but his honor merely looked at me and grinned. Of course I didn't tell him the Windsor school is warmed by hot air and not by steam, and would have preferred him to think we had boilers there and needed an expert engineer. He seemed to see through my omission, however, and merely grinned and said a substitute for Stone could be secured from among any dozen idle men. I could not arouse his sympathies worth darn and had to give it up."
