Are the People Entitled to know the Composition of Remedies?

There is one man who stands out honestly and squarely upon the merits of his well-known remedies. Dr. R. V. PIERCE, who is author of one of the best-known medical books, the "People's Common Sense Medical Adviser," which has reached its 66th Edition, over Two Million One Hundred Thousand Copies having been printed, and who is head of one of the best Sanitariums and Surgical Institutes in the country, was the first physician to use pure, triple-refined glycerine in the preparation of his vegetable compounds instead of alcohol.

Nearly Forty Years Ago,

Dr. Pierce discovered that chemically pure glycerine of proper strength is a better solvent and preservative of the active medicinal principles residing in most of our indigenous or native medicinal plants than is alcohol. As its use is entirely unobjectionable, while alcohol as is wellknown when used even in small portions, for a protracted period, does lasting injury to the human system, especially in the case of delicate women and children. He found that the glycerine, besides being entirely harmless, possesses intrinsic medicinal properties, of great value. Its nutritive properties, Dr. Pierce believes, far surpass those of cod-liver oil, entitling it to favorable consideration in all cases of incipient consumption, especially when it is combined with the active medicinal principles extracted from Black Cherrybark, Queen's root, Stone root, Golden Seal root and Bloodroot, as in his ready put-up medicine the "Golden Medical Discovery." Besides its superior nutritive properties, glycerine is a very valuable demulcent and thereby greatly enhances the remedial action of all the foregoing roots in the cure of severe coughs, bronchial, throat, laryngeal and other kindred affections of the air-passages and lungs. In all "wasting diseases," where there is loss of flesh and gradual "running-down" of the system, the glycerine certainly plays an important part in lessening the breaking down and wasting of tissue, and in promoting assimilation and increase of bodily weight. It is, in Dr. Pierce's estimation, a powerful reconstructive agent in all cases of impaired vitality and especially valuable when associated and combined with such superior alteratives and tonics as in "Golden Medical Discovery:11 Its wonderful solvent properties also play an important part in the cure of gall-stones, severe constipation, with dry and almost impacted stools. Glycerine is also one of the very best anti-ferments and as such counteracts the excessive fermentation of foods in the stomach, present in most cases of indigestion or dyspepsia. Thus the pain, belching of noxious gas, bloating and other disagreeable symptoms are overcome and the Stone root, Golden Seal root, Bloodroot and other ingredients of "Golden Medical Discovery" are greatly assisted in their action in completing a cure. As will be seen from the writings of Drs. Bartholow, King, Scudder, Coe, Ellingwood and other high authorities, these agents can confidently be depended upon for the most positive, curative action in all atonic, or weak, states of the stomach, accompanied with distressing indigestion or dyspep-sia. Read from the writings of the authorities quoted, under headings of Golden Seal root, Stone root, Black Cherrybark, Bloodroot, Queen's root and Mandrake root and you will find that all these ingredients are recommended as remedies for indigestion or dyspepsia. All are ingredients of "Golden Medical Discovery," combined in such porportions that each enhances the curative action

GOLDEN SEAL ROOT

Hydrastis).

Professor Roberts Bartholow, M. D., was the first of the old school of medicine to publicly recommend (in 1887) Hydrastis-or Golden Seal root. At that time Dr. Pierce had used this preparation as a principal ingredient in his "Golden Medical Discovery" for over twenty years. Since then Hydrastis has become of National reputation as a remedy for mucous membrane diseases, especially in throat ailments and in inflammatory conditions of the lining membranes.

GOLDEN SEAL ROOT (Hydrastis Canadonsis).

Dr. Roberts Bartholow, Jefferson Medical College of Philadel-

phia, a recognized authority on Materia Medica and Therapeutics, says of Hydrastis (Golden Seal): "Very useful as a stomachic tonic (stomach tonic) and in atonic dyspepsia. Cures gastric catarrh (catarrh of stomach) and headaches accompanying same. In catarrh of the gall duct and jaundice, it is of especial utility. Constipation, dependent upon different deficient secretions, with hard and dry stools, may be overcome by the remedy. Chronic catarrh of the intestines, even if it has proceeded to ulceration, is remarkably benefited by Hydrastis."

The foregoing is certainly a wonderfully strong endorsement of one of Dr. Pierce's chief ingredients used in his "Golden Medical Discovery."

From "Organic Medicines," by Grover Coe, M. D., of New York, we extract the following: "Hydrastis (Golden Seal), exercises an especial influence over mucous surfaces. Upon the liver it acts with equal certainty and efficacy. As a cholagogue (liver invigorator), it has few equals. In affections of the spleen, and abdominal viscera generally, it is an efficient and reliable remedy. Also in scrofula, glandular diseases generally, cutaneous eruptions, indigestion, debility, diarrhœa and dysentery, constipation, piles and all morbid and critical discharges."

(Stillingla Sylvatica).

Prof. John King, M. D., says: "An alterative (blood-purifier) unsurpassed by few if any other of the known alteratives; most successful in skin and scrofulous affections. Beneficial in bronchial affections - permanently cures bronchitis-relieves irritations-an important cough remedy—coughs of years' stand-ing being cured. Aids in blood-making and nutrition, and may be taken without harm for long periods."

R. Bartholow, M. D., L. L. D., says:

"Stillingia has long been in repute as an alterative and employed for scrofula in its various forms. Most satisfactory results have been obtained from its use in syphilitic Recommended in habitual constipation, torpidity of liver, jaundice, piles, ascites (dropsy), due to hepatic (liver) changes or abstractions "

STONE ROOT (Collinsonia Canadensis).

"Alterative, tonic, stimulant. Valuable in laryngitis- 'minis-In diseases of stomach and intestines-improves appetite, promotes flow of gastric

juice; tonic effect upon organs involved. A good remedy in indigestion, dyspepsia, chronic gastritis, increasing the secretion from kidneys and skin."—American Dispensatory. "There is no doubt of Collinsonia's action

on the urinary organs. It has cured dis-orders supposed to be due to gravel, ca-tarrh of the bladder and dropsy from deficient action of the kidneys. Cures irritation of the cardiac (heart) nerves, with rapid, regular or irregular heating. Useful in valvular diseases."—Edwin M. Hale, M. D., prof. Materia Medica in Hahnemann Medical College, Chicago.

Wm. Paine, M. D., Author of Paine's Epitome of Medicine, New School Practice of Medicine and of the Medical Properties and uses of Concentrated Medicines, writing of Collinsonin (the active medicinal principle residing in Collinsonia Canadensis, or Stone root), says: "I, not long since, had a patient who was so much oppressed with a valvular disease of the heart that his friends were obliged to carry him up-stairs. He, however, gradually recovered under the influence of Collinsonin, and is now attending to his buisness. Heretofore physicians knew of no remedy for the removal of so distressing and so dangerous a malady. With them it was all guess-work, and it fearfully warned the afflicted that death was near at hand. Collinsonin unquestionably affords relief in such cases, and in most instances effects a cure." He further says: "In a case of persistent ascites (dropsy), where the ordinary remedies fail to afford anything more than a temporary relief, Collinsonin produced a permanent

Prof. John M. Scudder, M. D., in his treatise entitled "Specific Medication," says: "Collinsonia (Stone root), is a specific in 'ministers' sore throat' (chronic laryngitis)." He continues: "It proves beneficial in other cases of chronic laryngitis, in chronic bronchitis and phthisis (consumption), allaying irritation and checking cough. It also exerts a favorable influence upon the digestive processes, improving the appetite, facilitating digestion and acting as a general tonic. It passes off through the kidneys and exerts a tonic influence upon the entire extent of the urinary tract. I regard it as one of the most direct and valuable agents of the Materia Medica and one that will give satisfaction to whoever employs it."

The above are strong endorsements of one of the most valuable ingredients contained in "Golden Medical Discovery," viz., Collinsonia, or Stone root. Its virtues, however are not overextolled, as we can attest from our experience and observation in watching the beneficial action of the "Discovery" in heart affections, laryngitis, bronchitis, incipient consumption and other ailments noted above.

"Collinsonia stimulates the stomach, acts as a tonic to en-feebled muscular structure of the heart and has a direct influence upon atonic (weak) and dilated or otherwise impaired conditions of the veins. It is a specific remedy in piles. In catarrhal gastritis, where the circulation is defective, it, either alone or combined with hydrastis, is of first importance. They increase the appetite and greatly improve the digestion and assimilation of food. Good for rectal pains and piles of the pregnant woman. Is a heart tonic of direct and permanent influence. Excellent in the bicycle heart, in rheumatic inflammation and clergyman's sore throat."—F. Ellingwood, M. D.

REMARKS. We can not refrain, at this point, from calling attention to the wonderfully beneficial effects produced by Stone root in valvular and other diseases of the heart, as described by Drs. Paine, Hale and Ellingwood. The latter, it will be noted, says of it, "is a heart tonic of direct and permanent influence." He especially recommends it for the so-called "bicycle heart"

or, in other words, for all those cases of irregular heart action caused by over exertion. The wonderful regulating and strengthening effect produced upon the heart by "Golden Medical Discovery" is accounted for by the presence in it of the active covery" is accounted for by the presence in it of the active medicinal principle of Stone root, and is also partly to be credited to the Golden Seal root contained in it. The Golden Seal root is a most valuable heart tonic, and in fact exerts a tonic effect upon all of the muscular tissues of the system, and, naturally it follows that the heart, being mostly composed of muscular tissue, is favorably affected and strengthened thereby.

BLACK CHERRYBARK (Prunus Virginiana).

Roberts Bartholow says: "Wild Cherrybark is an excellent stomach tonic; it has long been held in great esteem in domestic practice as a remedy in catarrhal states of the bronchial mucous membrane and in phthisis (consumption)." "The sirup is much used as an ingredient in cough mix-

"The tonic influence of this agent is more markedly apparent when it is administered in disease of the respiratory apparatus (breathing organs) of a subacute (mild) or (lingering) chronic character. A common

nervous patients without apparent cause; is popular in the treatment of mild cases of palpitation. Palpitation from disturbed condition of the stomach is directly relieved by it."—F. Ellingwood, M. D.

BLOODROOT (Sanguinaria Canadensis).

"Stimulates digestive organs, increases action of heart and arteries-stimulant and tonic. Very valuable as a cough remedy—acts as a sedative—further valuable as an alterative."—American Dispensatory.

"Overcomes congestion of the lungs, after Stood Root Severe cold in the chest from exposure. Given in bronchial coughs, in membraneous croup. It equalizes the circulation of the entire system, inducing warmth in the skin and in the extremities. It will assist in overcoming hepatization (solidification) of lung structure and restoring normal tone and normal functional action."—F. Ellingwood, M. D.

"Has most frequently been employed in incipient phthisis, bronchitis, influenza, pneumonia, croup, asthma, diphtheria, in scarlatina, dyspnea (short breath), dyspepsia, hydrothorax (dropsy of the chest) and jaundice."—Edwin M. Hæle, M. D.

"Its most important therepeutical effects are witnessed in diseases of the respiratory (breathing) organs. Used in croup, in functional amenorrhom (absence of menses), chronic nasal catarrh and nasal polypi."—R. Bartholow, M. D.

MANDRAKE ROOT (Podophyllum Peltatum).

"Certain, sure cathartic; leaves bowels in improved condition. A gentle stimulant tonic; improves the appetite. Particularly valuable in dyspepsia, gastric and intestinal catarrh. Beneficial in some affections of bladder."—American Dispensatory.

"Recommended in biliousness with mark-ed inactivity of the liver, sallow skin and mandrake ed inactivity of the liver, sallow skin and conjunctiva (eyes), constipation, dry stools and bloated bowels, highly colored urine containing uric acid, or urates in great excess. Is given in jaundice, gall-stones, piles; is an alterative in plethoric (full blooded) conditions, in skin diseases and in scrofula and syphilis."—F. Ellingwood, M. D.

MISS REED GOES TO KELLOM

Due to the Death of Miss Foos.

The vacancy in the principalship of the Kellom school caused by the death of Miss Anna Foos was filled by the Board of Education last night by accepting a report from the committee on teachers and examinations which recommended that Miss Effic Reed be transferred from the principalship of the Omaha View to Kelom. Miss Franc Eaton will go from the Porest school to Omaha View, Mrs. Marthe Christiancy from Druid Hill to Forest. and Miss Carrie Nash from Gibson to Druid Hill. The Gibson school is to be placed under the supervision of Miss Kate Brown, principal of the Bancroft school. The changes take effect April 9.

The board accepted the resignation of Miss Nellie Bennett from the teaching staff, she desiring to retire because of trouble with her eyes. A resolution of respect presented by Member Vance was dopted and the board adjourned to meet as a committee of the whole to discuss the new Vinton school question.

The resolutions for Miss Foos read: Whereas. This board recognizes that for

Whereas. This board recognizes that for the last twenty-five years every citizen of Omaha has been indebted to Anna Foos for the faithful and intelligent service she has rendered, and Whereas. Every child that has passed under her influence owes her a debt of gratitude for the higher inspiration and added powers received from her culture and training, therefore, be it. Resolved, That in the death of Miss Foos the schools of this city have met with a distinct loss and the community has lost a cultured and refining influence from its midst and that a copy of these resolutions be spread upon the records for this evening and that out of respect to her memory we do now adjourn.

After some time in committee of the whole the board members informally de-

FRANK THOMAS AND WILL YOUNG VICTIMS

Jury in Latter's Case Returns Verdiet in Ten Minutes of Ten Years for Theft of Ten Dollars.

Swift justice overtook two Omaha criminals in Judge Sutton's court yesterday. At the morning session Will Young, colored, was tried convicted and sentenced to ten years in the penitentiary for burglary, and at the afternoon session Frank Thomas, also colored, was tried, convicted and sentenced to five years in the penitentiary for forgery. Attorneys who have practiced at the Douglas county bar for a numger of years are unable to remember a similar

Thomas was charged with signing the name of Frank Thompson to a note requesting Mrs. Thompson to send him \$15 by a messenger boy. It was through the sharpness of the messenger boy, Ernest Wilkinson, that Thomas was arrested. The boy suspected something was wrong and before delivering the money to Thomas notified Thompson by telephone. A policeman was detailed and Thomas was nabbed just as the messenger boy handed him the money

Thomas went on the stand and denied all knowledge of the transaction, but Wilkinson was positive in his identification of him. The jury was out about ten minutes. Thomas waived a motion for a new trial and received his sentence before he was taken back to the county jall.

"Ten" Young's Hoodoo. Young's conviction comes just one month to the day after the commission of his The whole trial required less than two hours Monday morning in Judge Sutton's court. He was charged with breaking into the dwelling of Israel Knapp at Fourteenth and Spencer streets March 2 and stealing \$10 in money. The case is almost record-breaking in the speed with which it was finished up and sentence

Mr. Knapp went on the witness stand and identified Young as the man he caught coming out of the window of his house about 1 o'clock in the afternoon. Young had a pair of Knapp's trousers on his arm and Mr. Knapp stopped him and held him at bay until Young pulled a revolver and trained it on Knapp. He then backed away and was at large for about two weeks when he was arrested by the police Besides the trousers he had stolen \$10 in

and also positively identified Young as the burgiar. Young testified in his own behalf, denying he had been in the Knapp house. The jury was out ten minutes, bringing n a verdict of gullty, and Young waived a motion for a new trial and received his sentence at once. In sentencing him Judge Sutton told him he belonged to a danger-

SCHOOL FOR JEWISH YOUTH added. Hebrew Institute Will Be Established Under

Not Calculated to Supplant, but Supplement Work of Public Schools and Various Christian

Organizations.

A Hebrew institute will be established in Omaha under the care of the order of For Nebraska-Fair in west and show- a meeting of the lodge Sunday night, at which a report was heard from a com-Wednesday, fair and warmer in western mittee appointed some time ago to investigute the advisability of founding such an

institution.

The purpose will be to train Jewish boys and girls, mentally and physically, and to furnish them a place of study, recreation and social life. It is not calculated to take the place of the public schools or the Christian associations, but to be supplementary to the work of both. At first only history and the principles of American citizenship will be taught, but as the work develops night schools and

departments of physical training will be added.

As training for good citizenship is the Rosanna Oliver, 1909 South Eleventh, 26; Anna Hardy, 1479 South Seventeenth, 20; Agnes W. Moore, 848 South Twenty-third, 3. primary purpose of the proposed institute, it is considered by the organizers of the NEWSPAPER IN DIVORCE CASE movement that it will enlist the interest and the assistance of Christians

as Jews. The institute will have a home of its own. Where it will be or when it will be built has not been decided, as funds are vet to be secured. Subscription committees will be appointed in a few days.

"Plans as to a building are necessarily ndefinite at present," said Nathan Bernstein, "but we will start to work at once to get the money. We have an idea of the size of the structure we want, but that will depend largely upon the response we meet when we ask for assist

Mortality Statistics.

The following birth and deaths have been reported to the Board of Health during the forty-eight hours ending at noon Mon-

fan Asks Separation Because Wants Child to Read of Crimes.

Because he says his wife insisted on their young child reading long newspaper articles about murders and other crimes is one of the reasons Julius T. Weber urges in a cross petition for divorce in the sult recently brought against him by his wife, Marie Weber, Mr. Weber holds this kind of literature is unfit for a child of tender years and his wife's action caused him great mental anguish. He also says she frequently upbraided him and charged him with poisoning domestic animals and concealed herself in a room in their house for hours at a time. He asks the custody of

the child. Marie Sullivan has filed a suit for divorce from Charles D. Bulivan and Marie Boudin warts a decree separating her from John P. Boudin. Both charge desertion and non-

Rose Rossiter seeks a divorce from John S. Rossiter to whom she was married in Bancroft, April 3, 1899, alleging he is addicted to the use of strong drink and has not supported her for the last six years.
