County Attorney Blabaugh Says Filing Fee Would Help Some.

NORMAL BUILDING NOT UP TO CONTRACT

Architect Finds Fault with Quality of Stone Rather Than Contractor Who Performed Work on Building.

(From a Staff Correspondent.) LINCOLN, April 3 .- (Special.) -- County Attorney Slabaugh of Douglas county, who was here today attending supreme court, is anxious that the next legislature find some legal way whereby a fee can be charged for filings under the primary elec-

"Nearly everyone in Omaha was glad when the supreme court knocked out that provision which provided a fee should be charged candidates for filing their names But it soon developed that it would be much better were the fee charged, ever though it is only a small fee. Many can didates announced themselves, because i cost them nothing and gave them an op portunity to get before the public and secure free advertising.

"Were a fee of only \$5 or \$10 charged ! would cause a lot of these people to hesttate a long time before announcing them selves. Many of the candidates do not expect an election and I feel sure they an nounced themselves merely to get their names in the papers. This could have been prevented by a small filing fee. Of course the fee made the primary law unpopular but the large number of candidates will also tend to do that unless there is som way to put a stop to every man who wants a little advertising having his name put on the ticket."

After delivering himself of the above Judge Slabaugh took a look around the su preme court rooms and said:

"The newspapers should advocate th adoption of a constitutional amendment providing for an increase in the pay of state officers. Just think of it, the attorney general gets only \$2,000 a year. As county attorney of Douglas county I receive more salary than that. Parties from other states who come here and learn we only pay our attorney general \$2,000 wonder if that is the caliber of men we elect to such offices The state of Nebraska should pay its of-

Normal Building Rejected.

The State Normal school at Kearney is not yet ready to be accepted by the State Normal board, though about all the work on the building has been completed. Some time ago the board rejected the building because Architect Berlinghof refused to report that it had come up to the specifica tions set out in the contract. The contrac tors were then given more time in which to make the changes demanded. Mr. Berlinghof will make another report to the the men who furnished the stone for the to come up to the specifications.

At the next sitting of the court will be argued the right of the county assessor of Douglas county to assess business colleges. County Attorney Slabaugh holds if these ommercial colleges are exempt from taxation then it will be necessary to exempt dancing schools and other schools of a like nature.

Testing Right of School Board. The supreme court has been called upon to decide whether a school board has the authority to expel a pupil from a school without first granting a hearing to the child and notifying the parents of its contemplated action. The case has come up from Merrick county and it has been in the courts since 1904, when the school board of District No. 3 expelled Edith Englehardt. John T. ## **THE NEW 1906** -Spring Overcoat-

The suit style is father to the Overcoat style.

Because the sack coat is longer, the overcoat is longer this year Because the sack coat flares at the back-bottoms, the new spring Overcoat flares also.

As it's strictly a gentlemen's Overcoat, we recommend quiet, subdued fabrics, such as our No. 6111 Gun Club Plaids (our own importation and an exclusive style) made to measure in Overcoat style, \$25 to \$45.

As it is a hard-to-tailor Overcoat style, we would recommend that you have MacCarthy-Wilson

High class tailoring at popular prices.

Some cocoas are half flour some are half sugar-naturally these adulterated sorts cost less to manufacture than Runkel's Cocoa because sugar and flour and starch are cheaper than cocoa beans. The Runkel way is the safest, surest, sanest way. Just enough of the cocoa fat is extracted(by terrific mechanical pressure) to make it readily digestible, but sufficient is left to render it nourishing and nutritious.

## Runkel's Cocoa

is just the powdered cocoa bean (from which the husk and the core are first removed), ground so fine and smooth that its solubility and digestibility are certain.

One can of Runkel's Cocoa will last longer than any other because it is all cocoa. There is no flavor like it, because it is made only of selected qualities of cocoa beans, so subtly blended that a most delightful aroma and a most enticing flavor are attained. The price is just the same as though the quality were not as high.

GRAND ISLAND—At its meeting last night the Board of Education received three bids on the recently registered \$60,000 4½ per cent high school bond lasue and accepted the bid of Spitzer & \$0., an Ohlo firm, for \$14 premium upon a condition which it is believed will be met by wire today. The first advertisement for the sale of the bonds, all to be delivered at one time, brought forth twelve bids. The bid of N. W. Harris & Co. was at that time accepted. The attorney for the firm, however, refused to approve the lasue on account of alleged irregularities in the election. The irregularities referred to were since referred to the auditor of the state, who in turn referred them to Attorney General Brown. The latter found the objections made invalid and the auditor has since registered the bonds. The board then proceeded to advertise for the second time. Upon the theory that such a plan would save interest the second advertisement was for bonds in installments of \$10,000 at stated periods of about three months each, the last falling due in September, 1867, as to delivery. However, only three bids were received last night, it being apparent from these and from the communications of several other bidders that the Installment plan was not very favorably received by the bond companies. The Ohlo firm bid upon the bonds, delivery being specified at the stated periods for carifier at our (the bidder's) option. This offer was accepted as most nearly complying with the proposal, upon condition that the firm would make the clause read to the effect that the option to deliver earlier would be in the school district of Grand Island. Adjournment was made at the call of the chair and a wire response is expected today some time. It is believed that the firm will consent to the change in the wording of the bid and that such OXFORD—The State university officials have officially notified the Roard of Education that the Oxford public schools have wording was a clerical error.

and their dangerous development. STRICTURE of the URETHRA, whether chronic, acute or spasmotic, primarily induced as a result of neglected or improperly treated Gonorrhoea or other causes, obstructing the passage and impeding the flow of water, and in time closing the urethal canal entirely, producing a frightful tension of the nervous system, will soon involve in its destructive course the whole genito-

Bricture produces a burning or scalding sensation when voiding urins, obstructing its flow, or a persistent mucous discharge, causing irritation and pain, or prostatic complications. When a man sees that his stream is becoming slowly but surely smaller, that it is twisted, divided and irregular, that it passes with less force than formerly, that he urinates more frequently than he should, that sometimes he must get up in the night to relieve himself, and that at times his suffering is intense from the scalding, burning and bearing-down sensations, and that he has a gleety discharge that drains his system constantly, thus weakening both his sexual and general system, then, we say, it is high time that he should do something. Sooner or later, in every case, the urethra, the bladder, the prostats gland and even the kidneys become diseased, and if matters are allowed to take their own course, the whole genito-urinary system becomes disorganized and the general health is wrecked. Any sufferer should not let this disease run on and on, only to become worse as time progresses. These troubles are dangerous and treacherous, not only in themselves, but in the complications that ensue, because these changes are constantly taking place and are the sufferer will awaken to the fact that he is in serious shape, and that he has committed a great error in allowing this trouble to insidiously progress and tenaciously fasten itself upon the system. He may even be sympelled to void the urine drop by drop or by the use of a catheter.

By our method of freatment the cleatricial tissue is dissolved, the obstruction and irritation along the urethral canal removed, and the prostate gland, bladder and kineys restored to a normal condition of health, strength and vigor. We cure safely and thoroughly produces a burning or scalding sensation when voiding urine,
