\$500,000,000 REWA

Mr. Henry Clews' Estimate of the Priceless Value cede a condition of total deafners, this Dear Dr. Branaman: "If you wish to of a Discovery.

In the January "Cosmopolitan" Mr. Henry Clews, the famous financier, is quoted as saying that "Tuberculosis and catarrh diseases are responsible for the suffering and death of a large minority of the population of this country. He who could discover a positive cure or preventive of these two scourges would confer a benefit which would well be worth five hundred millions."

There is no question that Mr. Clews is right. That Tuberculosis and Catarrhal diseases are responsible for nearly 50 per cent of the sickness and suffering and early death of the people of this country is well substantiated without resort to statistics. In fact, it would be safe to go further and state than a large majority of the population of this country is suffering from some form of these terrible scourges. And that Catarrh is generally the forerunner of Consumption and kindred diseases is equally well known. There is no question but that proper attention to a catarrhal attack in its incipiency would not only be a preventive of Pulmonary Tuberculosis, but would also be a sure preventive of such distressing diseases as Asthma, Bronchitis, Catarrhal Deafness and many forms of Stomach, Liver and Kidney troubles.

There are two kinds of Catarrh, Moist or hypertrophic and dry or atrophic. Moist Catarrh produces a secretion which extends from one organ to another, causing them to become diseased until the entire system is affected. Catarrh of the nose and throat gradually extends to the bronchial tubes, producing Bronchitis and Asthma; then into the lungs, causing acute lung trouble and Consumption and death. The eyes become weak and inflamed and the custachian tubes become closed, causing deafness and head noises. In dry catarrh there are no secretions. The nose and throat become dry and scaly.

Many people are inclined to look upon catarrh in children as a matter of small concern, innocently believing that they will "outgrow" it, and totally oblivious to the fact that it is a disease of steady and insidious growth, and each year's neglect finds the helpless sufferer rapidly approaching that dreadful condition when the dis-

for help and a denunciation of the doctor because of his inability to accomplish the miraculous.

There are some, it is true, who seemingly "outgrow" the disease. But sooner or later in their lives the patients awake to the realization that the disease has arisen as from the dead and regained its bold upon the system. But the disease has not been dead; far from it. All these years, while the disease has seemingly hain dormant, it has been eating its way along the mucus membrane, and, like the spark that falls innocently on the house-top, needs but a breeze to fan it into a blaze. And when this time comes there is usually discovered that a serious complication has arisen, Asthma, Bronchitis, Consumption, Deatness or a derangement of the functions of the internal organs. But even though, as in some cases, none of these complications has arisen, nevertheless the disease has become so chronic and deep-scated that it is not without reason that it is considered by many as incurable.

HENRY CLEWS.

There is a Positive Cure for Catarrh. ing that dreadful condition when the disease will be considered "incurable" and the very life of the patient in jeopardy. Then, when it is too late, there is a scurrying for help and a denunciation of the doctor because of his inability to accomplish the

for you.

You are constantly in danger, because you are not sensible to things that are going on around you. Many deaf people lose their lives because of inability to hear lose their lives because of inability to hear wagning sounds.

Can deafness be cured? I receive hundreds of letters every week from persons afflicted with deafness, asking this important question. Having tried many doctors and remedies in vain, most of them have concluded that there is no cure for deafness. The great majority of those cases are caused from catarrh of the Eustachian tubes, thus shutting off all sound. All such cases are curable. Deafness is often caused from discharging ears or thickened ear drums, and in most cases is accompanied by distracting head noises. Whenever these symptoms exist deafness is curable, though time as well as the best of

Thousands of people use ear drums of different makes, but there is no necessity even for this. If you can hear by the aid of an ear drum, come to me and I will make you hear without the ear drum.

As the above conditions cover most cases of deafness it is not too broad an assertion to make that it is curable. Probably the only exception to this rule is deafness caused from injury to the external ear. Relief may be given by other treatments, but my treatment is an absolute cure.

permanent cure.

Perhaps the most hopeless letters of inquiry on this subject are written by those whose ear drums are destroyed and who have been told by doctors and specialists that nothing could be done for them. The hearing can be restored when the ear drums are destroyed in from four to six months.

places every organ of the body in s vigorous and healthy condition.

When this is done there can be no disease. The membranes of the nose, throat, bronchial tubes and lungs are healed, the ears are opened by the application of electro-medicated vapor which care. when this is done there can be no disease. The membranes of the nose, throat, bronchial tubes and lungs are healed, the ears are opened by the application of electro-medicated vapor which cures catarrhal deafness

and stors head noises. It cures where other treatments have falled. The following are only samples of thou-

ands of just such aggravated cases that I have cured. I can refer you to others; some who probably you may know per-To have your hearing restored after hav

ing been deaf for over 40 years would most certainly make you grateful to your benefactor. If you are deaf now or are suffering from those awful head noises that pre-

Dear Dr. Branaman: "If you wish to change my medicine you will have to do it at once or I will be well. I have laid my trumpet away and can hear a watch tick, the first time in 40 years. The awful noises have gone. The people here think it a miracle for me to hear so well." July 14. 1901, he writes; "My wife is very jubliant. She can now talk to me without the ear trumpet. How is that for high? I can hear a watch tick easily."

A. C. MOORE, Oswego, Kan.

Mr. George Van Patten, 1600 Little Benton St., Council Bluffs, In., sayst

Mr. Weneil Franta, 2227 S. 11th St., says: "I had head noises and was getting was troubled with catarrh deaf; was troubled with catarrh of nose and throat; ears stopped up; could not hear distinctly. Dr. Branaman cured my catarrh, stopped the head noises and restored my hearing. I am now perfectly well and recommend the doctor to all who are deat."

Mrs. R. D. Hutchinson, 609 N. 18th St., says: "I had catarrh and deafness for years, noises in my head, my kidneys, stomach and lungs pained me. I tried many good doctors without relief. I was discouraged. Dr. Branaman cured me in a short time. I am now enjoying the best of health."

Mr. L. L. Burgess, Talmage, Neb., says 'After suffering for years all the torments of a bad case of catarrh, which had extended into the stomach, causing sick-

ASTHMA CURED

Mr. Fred Deerwald, 18th and Pierce Sta., Cured of Asthma After Suffering 22 Years.

"When I was 7 years old I had an attack of Scarlet Fever which affected my hearing, and ever since then, until now, my ears have been discharging. My hearing gradually became worse until at times people would have to fairly shout to make me understand what they said. In fact, whenever I had a cold I was almost totally deaf. People told me deafness from the fever could not be cured, and I gave up all hope of ever hearing clearly again. But reading of the wonderful cures that Dr. Branaman has been effecting by his new treatment, I decided to try once more to obtain rebef, and I am very glad I did, for the effect was even more than I expected. The ringing noises in my head, which had been so severe that I could hardly sleep, and the discharge from the ears have entirely stopped, and I can now hear a watch tick at arm's length, and can plainly understand an ordinary conversation anywhere within the room. In fact, my hearing is now better than at any time within fifteen years and life is worth living again. I can now better than at any time within fifteen years and life is worth living again. I can now better than at any time within fifteen years and life is worth living again. I can now better than at any time within fifteen years and life is worth living again. I can now better than at any time within fifteen years and life is worth living again. I can now better than at any time within fifteen years and life is worth living again. I can now breathe free and easy. I sleep like a child all night. I do not cough or have any more rattling or wheezing. This new cure is a sure specific for Asthma, and I recommend to anyone."

SISTER AND BROTHER CURED of Lung Diseases and Deafness.

For several years I have been sick and

of Lung Diseases and Deafness.

For several years I have been sick and helpless from lung disease. Had one hemory sears with noises in my head. I would become nervous from the distracting noises. I have tried all sorts of remedies without any relief. I became discouraged, as there seemed to be no help for me. I saw an account of Dr. Branaman's new cure and went to see the doctor, who told me he could cure me in a short time, which he has done. The noises are all gone. I can hear splendid; in fact, I am all right, and now recommend the treatment to all, as I know it will cure.

Mr. G. R. Garrison, Reynolds, Neb., says: "I was deaf for 25 years. Specialists told me I was incurable. I treated with a dozen, who falled to even benefit me. Dr. Branaman cured me by home treatment. I can hear splendid."

Mr. Wencil France. 2227 S. 11th St.

My HOME TREATMENT is just as effective as my office treatment. You

brother and I have to thank Dr. Brauaman and his treatment for our present happiness and health. We both recommend him and his treatment to all who suffer. MISS AUGUSTA BECK, 2468 Eighth St., North Denver.

Eight years ago I began to have shortness of breath and choking, constant
wheezing and rattling in my chest and
coughing. I would raise tough phicgm.
Finally I got so bad I could not work.
I had to sit up all sight. The only
relief I got was from smoking an asthma
powder, which only gave temporary relief.
I lost flesh and strength. I went to Dr.
Branaman a physical wreck and in a few
weeks I was a new nan. I can now
breathe free and casy. I sleep like a child
all night. I do not cough or have any
more rattling or wheezing. Declors told me
Asthma could not be cured, but this new
cure is a sure specific for Asthma, and I
recommend it to all my friends as no one
Pictier Picquerick.
2815 V Street, South Omaha.

CATARRH CURED

I have been afflicted with catarrh of the nose and throat for ten years. The disease seemed to gradually extend to my bronchial tubes and lungs, and I would get hourse and cough. My lungs pained me and I grew weak, lost flesh; in fact, was miserable. I tried many things recommended for these symptoms, but got no relief until finally a friend recommended Dr. Branaman's new cure. I decided to try it and was surprised to get relief and a cure of all my troubles in a short course of treatment. I feel better than I had for years; no cough, no catarrh; in fact. I feel splendid. My wife is now under the treatment, with the same good results. We can recommend the treatment to all sufferers from catarrh, asthma, etc. D. W. SMITH.

Benson, Neb., Route No. 2. I have been afflicted with catarrh of the

MY HOME TREATMENT is just as effective as my office treatment. You can cure yourself at your own home without any inconvenience. Write for full particulars and book of testimonials.

CAN CURE YOU

The most stubborn and complicated cases will not exceed \$5.00 for one whole month. This offer is not made as an experiment. This new method of treatment has cured hundreds of cases of

ASTHMA, CATARRH, DEAFNESS AND HEAD NOISES

that have been pronounced incurable by other specialists. Consultation and Trial Treatment Free to all who apply at office before May 1st. Special rates to Mail Patients. Write for Symptom Blank and Book of Testimonials, Free.

Recent Progress in the Field of Electricity

Telephone Rate War in Chicago.

trol of the telephone situation. This remarkable and pleasing change was brought about by a decision of the state chartered rate was \$125 per annum. By means of various devices, principally measured service, the rate was raised as high as \$175. Under the decision of the court the company is liable for all payments in

Recently the company made overtures of a reduction, substituting measured service for all flat rates. The overture encountered a public frost. Later the company came in with an offer of a radical cut in rates aggregating a reduction of \$1,135,000 in annual facome. Meanwhile, two rival companies cut below these figures and the authorities look for better terms before the question is settled.

National Telephone System.

The president of the American Telephone and Telegraph company, in his annual report to stockholders, proposes the establishment of a national telephone system, in which every subscriber can be connected with every other subscriber throughout the land. To this end he has entered upon a contract for the sale of \$100,000,000 of convertible bonds. The number of telephones in use at the end of the year 1906 was 5,698,258. The company re-87,212 employes, 4,479,500,000 overwire talks,

Electrical Refrigeration.

Writing on electrical refrigeration, Electrical World says: "By electrical refrigeration is meant merely the new system of automatically driving and controlling small mechanical refrigeration plants by means of an electric motor. This system has been brought forward within the past year or so, and its friends say that it is giving excellent results; that, all things considered, it is cheaper than ice and does away with much of the annoyance caused by the older system. Besides preventing the objectionable daily replenishing of the boxes with ice, it gives a system of refrigeration which is always under control, and by means of which the cold rooms may be kept dry easily. The system is strongly recommended for all situations where a considerable amount of ice is necessary now, such, for example, as butcher shops, hotels, restaurants and drug stores.

the exceptionally mild winter would probably affect the ice harvest, although at that time the ice companies said that they felt no anxiety about the supply. we are told that the harvest of ice is the poorest that can be remembered; that the supply so far secured and which can making plants will be only a little more than one-third of the supply for 1905.
