It is curious to note with what caution and calculation Mr. Bryan's special partisans, many of them old-time supporters because of his very radicallsm, are at this time emphasizing every possible point and appearance of him in the contrary character, and that his public deliverances now and for some time past have smoothed the way for them. And it may be fairly admitted that while the general public attitude toward vital questions has been materially modified in a decade, so Mr. Bryan's outlook may also have been modified, and there is little question on that the tendency toward this opinion is increasing in a conservative element

in his party. At any rate a very considerable tactical advantage seems likely to result to Mr. Bryan so far as practical democratic politics is concerned. CORPORATION FUNDS AND PARTIES.

All legislative bodies ought to procorporation funds for political purposes of any kind. Public opinion is practically unanimous as to the demoralizing States senator. When he himself was light of the disclosures of the past year, effect of such contributions, and in the showing how baleful is the intimate relation between corporation funds in the hands of party committees and candidates and corporation funds in the hands of legislative lobbyists, no one would now have the hardihood to defend them. The seat of the evil is more particularly in corporations which by their very nature or by mere bulk of their operations assume the character of public institutions, but there is no need of limiting the prohibitions of the law to any particular class of corporations. The law will be more effective in such a matter if its provisions are simple and sweeping.

No one proposes to infringe the right of the citizen to contribute to the political party of his choice for any legitimate purpose. His right is indisputable. It is the corporation contribution stockholders of a railroad, telegraph or bank company or the policyholders of a life insurance company entrust their in the house this week congressmen with the state board shows increased cific purposes of the business carried on, themselves on a subject which may inobjection, it is a flagrant breach of best impression they will enact the law trust to devote the money of one stock- and talk later. > BOTH FOOD AND MEDICINE

We like best to call Scott's Emulsion a food-medicine. It is a term that aptly describes the character and action of our Emulsion. More than a medicine-more than a food, yet combining the vital principles of both. It is for this reason that Scott's Emulsion has a distinct and special value in all wasting diseases. There is nothing better to remedy the troubles of imperfect growth and delicate health in children. The action of Scott's Emulsion is just as effective in treating weakness and wasting in adults. Army and Navy Register. There is under consideration the projecof withdrawing the signal corps from Benicia Barracks, Cal. The corps has at tha place a supply depot from which materia is sent to signal corps commands on the Pacific coast and in the Pillippines. Companies E and H of the corps are on duty at Benicia and much work of an experimental character has been conducted, and more has been in contemplation, at that place. If Benicia Barracks is abandoned by the signal corps, which seems probable at this time, the corps will concentrate its depots and its facilities for experimentation at Omaha, Neb., retaining, of course, Fort Wood, N. total was 1,006,499, and the 1906 arrivals have been thus far in excess of the record. Yet even these numbers are not so great in proportion to the wealth, population and by fostering the habit. There are few more assimilative power of the nation as were serious problems with which benevolent the numbers that came after the discovery of gold half a century ago. The 427,000 lmmigrants of 1854 and even the 788,000 of 1882 were more numerous in proportion to the population of the country at those periods than this year's total can possibly be to our present population.

So vast a shifting of the peoples of the earth demands our closest scrutiny. Few national needs are so pressing as the need of scanning, directing, distributing, protecting and educating this throng of newcomers and the need of inspiring them with the ideals of true democracy.

The wider distribution of the immigrants noted last year is most gratifying. So, gazing where she lay, we knew that And parting could not cleave her soul again And we were sure that they who saw her In that dim vists which we call the past. Who never knew her old and laid aside, Remembering best the maiden and the bride, Had sprung to greet her with the older speech.
The dear, sweet names no later lore can teach. And "welcome home!" they cried, and limit the sale and common use of all So dwells the mother in the best of lands

And many other painful and serious ailments from which most mothers suffer, can be avoided by the use of "Mother's Friend." This great remedy is a God-send to women, carrying them through their most critical ordeal with safety and no pain. No woman who uses "Mother's Friend" need fear the suffering

and danger incident to birth; for it robs the ordeal of its horror and insures safety to life of mother and child, and leaves her in a condition more favorable to speedy recovery. The child is also healthy, strong and good natured. Our book

"Motherhood," is worth its weight in gold to every woman, and will be sent free in plain envelope by addressing application to Bradfield Regulator Co. Atlanta, Ga.
