

DUNN'S REVIEW OF TRADE

Stringency in Money Market Does Not Interrupt Regular Business.
Retail Distribution Continues Heavy
Building Operations Are Only Limited by the Supply of Labor and Materials-Factories Are Generally Busy.

NEW YORK, April 13.—R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say:

The stringency in the money market has caused no interruption to the whole progress of trade and industry, although tending to develop conservatism in speculative departments. Weather conditions accelerate the distribution of seasonal merchandise, and a large volume of goods is being placed where local controversies have their influence. Building operations are limited by the highest level of foreign material which cause frequent delays and is shown by the highest level of foreign material since February, 1904; Dun's Index number for the month of March is 104.294 a month previous, and 92.904 a year ago.

Manufacturing plants are fully engaged; iron production is at the maximum, shipment of footwear for the year and a strong tone reported at the textile mills in response to the well maintained markets for raw materials. Railway earnings to the first week of March are \$1.1 per cent larger than last year's, although prices of securities have weakened somewhat in response to the high money market at this season in many years. Official statistics for the month of March indicate that exports of farm staples were valued at \$19,190,000, an increase of 12.5 per cent compared with the corresponding period last year when the movement was exceptionally heavy.

Structural shapes and steel rails continue the permanent feature of the iron and steel industry, although every department has recently broadened in interest.

Failures this week numbered 193 in the United States, against 214 last year and twenty in Canada, compared with twenty a year ago.

REPORT OF THE CLEARING HOUSE

Transactions of the Associated Banks for the Week.

NEW YORK, April 13.—The following table, compiled by the clearing house, shows the bank clearing of the principal cities for the week ended April 12, with the percentage of increase and decrease as compared with the corresponding week last year:
