CROP KILLERS GET IN EARNEST WORK

Farmers in Kansas Said to Be Flowing Into Winter Wheat—Mills Will Close Four Days—Corn Drags.

OMAHA, April 24, 1906.

The crop killers began to get in their work in good earnest today. Reports came in from Kansas that the locusts were plowing up their wheat, which had been injured by high winds, open winter and lack of moisture.

With Liverpool cables lower, and more talk of a mill closing down, the market for wheat was weak. There came Bradstreet's report, showing a large decrease in the world's visible, and the market turned strong on shorts covering the reports of deterioration of the crop in the western states. July closed 1 1/2 higher than yesterday and 1/4 higher than the previous day.

Corn was weak and inclined to drag, though a few bulls were active. The market for corn was not so good. The advance in wheat helped hold corn steady. Receipts were steady, the close being 1/4 higher for May and 1/2 for July.

Primary wheat receipts were 23,000 bushels and shipments 20,000 bushels. Corn receipts last year were 20,000 bushels and shipments 20,000 bushels. Corn receipts for the week were 20,000 bushels and shipments 20,000 bushels.

Chicago, April 24, 1906. The Chicago Tribune this morning says: "All of the wheat and northern mills have agreed to shut down every mill for three days between now and May 1. This action is to be hoped will improve the situation."
