

For and About Women Folks

Woman in Unknown Labrador. Mrs. Leonard Hubbard writes...

Mr. Hubbard planned to explore and map one and perhaps both of the two large unknown rivers of northeastern Labrador...

"In undertaking a Labrador expedition of exploration," says Mrs. Hubbard, "it was my purpose to carry to completion the plans which Leonard Hubbard Jr., my husband had mapped out for himself in his expedition of 1868."

"A fortune in money or beauty counts for little with the man who really seeks happiness. It is better to have a fortune in your wife than with her."

"My expedition demonstrated that geographers were mistaken in supposing the Northwest river draining Lake Michikamau and the Mascaupe river, draining Seal Lake, to be two distinct rivers. They are one and the same, the outlet of Lake Michikamau carrying its waters northeast to Seal Lake, and thence southeast to Hamilton Inlet. The head waters of the Nascaupe river I traced northward through Lake Michikamau and the other lakes and streams leading to the height of land—a narrow strip of low hills, 30 yards in width and located the head waters of the George river immediately beyond it, following 300 miles to its mouth the course of the stream, which, at its source a tiny rivulet, is at its discharge into Ungava bay a great river three miles in width, and securing correct maps of the waters traversed. I witnessed also the annual caribou migration, and visited in their home camps the two bands of Indians inhabiting the north slope of the plateau—the Montanais and the Nascaupes—traveling 350 miles of wilderness before seeing any human faces other than those of my crew. On the August 27 I reached the George River Hudson Bay company's post at Ungava, 681 miles after leaving the country."

"If men and women will do the right thing; if they will cease wondering how they can make themselves happy and begin figuring on how they can make the other fellow happy; if they will make an occasional sacrifice to that end; if they will put down foolish vanity and pride and stubbornness, which amounts to nothing, and make compromises and concessions, which amount to everything, they will find themselves enjoying solid comfort and happiness even from the ruin which looked perilously like a bad bargain."

"The entire journey of 681 miles was accomplished in a few hours less than sixty-one days, forty-three days of actual travel and eighteen days in camp; for we did not travel on rainy days, and sometimes not on Sunday. We had all we could eat all the time, and at the journey's end there was including my surplus of the Nascaupe provisions, a surplus of 150 pounds of Indians."

"There's nothing, terrible about real love," replied the specialist, "and nothing violent. You probably allude to a very youthful infatuation known as puppy love. It usually comes to the idle. There is nothing so great as work to keep young blood from mistaking attachments. They fall in love without the slightest consideration for the fitness of things, and think because they can't be happy apart they must necessarily be happy together. There is only one ideal life, and that is in finding one's affinity."

Marry Early if Possible. Rev. E. J. Hardy, author of "How to Be Happy, Though Married," who, during a busy life spent as an army chaplain in all parts of the world, has already published some ten books relating to marriage and kindred topics, has just issued his eleventh volume, "What Men Like in Women."

From Parlor to Farm. Miss Helen Holmes, a graduate of Smith college, has abandoned pink tea and all fashionable frivolities to become a New England farmer.

John Jacob Astor, who has been called a great beauty on both sides of the Atlantic, told of the simple plan she has adopted to preserve her freshness and beauty. "I live simply, take adequate exercise, eat rationally, act with deliberation and get plenty of rest."

Part of the railroad development of China may be placed in the hands of an American girl. Miss Nora Stanton Betch, who is the first woman to take a degree as civil engineer in Cornell university, has been offered a position in one of the thirty-six corps of engineers for immediate work in China.

Artistic buckles, having the look of hand wrought silver, are made in the dull sandy finish of silver which is now so fashionable, in connection with semi-precious stones, and these silver buckles are often adorned by topaz, chrysoberyl, jade, coral, etc., but some of the smartest designs are not made of silver, but of a material which looks like silver for their beauty.

Among the students in Cornell last year was an unobtrusive Chinese young man who had taken a degree as civil engineer in the University of Tien Tsin and had come to the United States ostensibly to take a higher degree than the Chinese university offered.

At the end of the year it suddenly transpired that the unobtrusive Chinese student was in reality a very important personage, none less than the head organizer of what promises to be one of the largest and most effective corps of engineers in the world.

Largest stock of Office Furniture in the City

John Jacob Astor, who has been called a great beauty on both sides of the Atlantic, told of the simple plan she has adopted to preserve her freshness and beauty. "I live simply, take adequate exercise, eat rationally, act with deliberation and get plenty of rest."

Artistic buckles, having the look of hand wrought silver, are made in the dull sandy finish of silver which is now so fashionable, in connection with semi-precious stones, and these silver buckles are often adorned by topaz, chrysoberyl, jade, coral, etc., but some of the smartest designs are not made of silver, but of a material which looks like silver for their beauty.

"What is the most valuable fur on the market?" "The silver fox," replied the commissioner. "I have seen skins of that animal out three or four feet long and not more than eighteen inches wide which were worth \$1,500 each. The silver fox is a freak in nature and it is only now and then that one is born. They are greatly prized by the Russians."

out our control of the northern part of British America about a generation ago. We are now a civil institution and not a political one.

Part of the railroad development of China may be placed in the hands of an American girl. Miss Nora Stanton Betch, who is the first woman to take a degree as civil engineer in Cornell university, has been offered a position in one of the thirty-six corps of engineers for immediate work in China.

At the end of the year it suddenly transpired that the unobtrusive Chinese student was in reality a very important personage, none less than the head organizer of what promises to be one of the largest and most effective corps of engineers in the world.

"Where do you hire your traders, Mr. Chipman?" "The most of them are of Scotch origin. We bring them over as boys of 17 years, and as a rule they expect to spend their lives with the company. They learn the Indian language and are gradually advanced from post to post. We have civil service rules, and men are seldom discharged except for cause. Some are paid good salaries, and in due time the employees are retired with pensions."

A Skin of Beauty is a Joy Forever

Dr. T. Felix Gouraud's Oriental Cream or Magical Beautifier

Purifies as well as beautifies the skin. No other cosmetic will do it. Removes Tan, Pimples, Freckles, Moth Patches, Hair and Skin Diseases, and every blemish on beauty and defies detection. It has stood the test of 15 years, and is so harmless we taste it to be sure it is properly made. Accept no counterfeit of similar name. Dr. T. A. Gouraud writes to a lady of the haughty (in patient), "As you will see from the enclosed, I recommend 'GOURAUD'S ORIENTAL CREAM' as the best and most effective of all the skin preparations." For sale by all druggists and fancy goods stores in the United States, Canada and Europe.

FERD. T. HOPKINS, Prop. 37 Great Jones St., New York.
