

Girlhood, Womanhood, Motherhood. No Man Stronger Than His Stomach.

THE first lesson that the young girl has of womanhood is usually a painful one. She learns to know what headache means, and backache, and sometimes is sadly borne down by this new experience of life.

All the pain and misery which young girls commonly experience at such a time may, in almost every instance, be entirely prevented or cured by the use of Dr. Pierce's Favorite Prescription. It establishes regularity. It tones up the general health, and cures headache, backache, nervousness, chorea, or St. Vitus's dance, and other consequences of womanly weakness or disease.

MOTHER OF THE FAMILY.

The anxious mother of the family oftentimes carries the whole burden of responsibility so far as the home medication of common ailments of the girls or boys is concerned. The cost of the doctor's visits are very often much too great. At such times the mother is invited to write to Dr. R. V. Pierce, of Buffalo, N. Y., for medical advice, which is given free. Correspondence is held sacredly confidential.

IT STANDS ALONE.

"Favorite Prescription" is the only medicine for women the makers of which are not afraid to print just what it is made of on every bottle-wrapper. It is the only medicine for women every ingredient of which has the unanimous endorsement of all the leading medical writers of this country, recommending it for the cure of the very same diseases for which this "Prescription" is advised.

A MOTHER'S LOVE.

A mother's love is so divine that the roughest man cannot help but appreciate it as the crown of womanhood. However, motherhood is often looked forward to with feelings of great dread by most women. At such times a woman is nervous, dyspeptic, irritable, and she is in need of a uterine tonic and nerve, a strength-builder to fit her for the ordeal. No matter how healthy or strong a woman may be she cannot but be benefited by taking Dr. Pierce's Favorite Prescription to prepare for the event. It makes childbirth easy and often almost painless.

DR. PIERCE'S FAVORITE PRESCRIPTION

is a powerful, invigorating tonic. It imparts strength to the whole system and to the womb and its appendages in particular. For overworked, "worn-out," "run-down," debilitated teachers, milliners, dressmakers, seamstresses, "shop-girls," housekeepers, nursing mothers and feeble women generally, Dr. Pierce's Favorite Prescription is the greatest earthly boon, being unequalled as an appetizing cordial and restorative tonic.

A STRENGTHENING NERVE.

"Favorite Prescription" is unequalled and is invaluable in allaying and subduing nervous excitability, irritability, nervous exhaustion, prostration, neuralgia, hysteria, spasms, chorea, or St. Vitus's dance, and other distressing, nervous symptoms commonly attendant upon functional and organic

disease of the womb. It induces refreshing sleep and relieves mental anxiety and despondency.

A SCIENTIFIC MEDICINE.

Dr. Pierce's Favorite Prescription is a scientific medicine, carefully devised by an experienced and skillful physician, and adapted to woman's delicate organism. It is purely vegetable in its composition and perfectly harmless in its effects in any condition of the system. For morning sickness or nausea, weak stomach, indigestion, dyspepsia and kindred symptoms, its use will prove very beneficial.

CURES OBSTINATE CASES.

"Favorite Prescription" is a positive cure for the most complicated and obstinate cases of leucorrhoea, excessive flowing, painful menstruation, unnatural suppressions and irregularities, prolapsus or falling of the womb, weak back, "female weakness," ante-version, retro-version, bearing-down sensations, chronic congestion, inflammation and ulceration of the womb, inflammation, pain and tenderness of the ovaries, accompanied with "internal heat."

HOW TO LOOK BEAUTIFUL.

Young women or matrons should not allow themselves to look sallow and wrinkled because of those pains and weaknesses which become chronic and are the result of colds, tight lacing, and the imprudent care of the womanly system. Many a woman would look beautiful, have healthy color and bright eyes if it were not for those drains on her strength and those weaknesses which come all too frequently and make her life miserable. There is a ready-to-use Prescription, used a great many years by Dr. R. V. Pierce in his large practice as a Specialist in woman's diseases, which is not like the many "patent medicines" on the market, as it contains neither alcohol nor any narcotic, or other harmful drug. It is purely vegetable. It is known as Dr. Pierce's Favorite Prescription and is sold by druggists.

DR. PIERCE'S PLEASANT PELLETS

cure biliousness, sick and bilious headache, dizziness, costiveness, or constipation of the bowels, loss of appetite, coated tongue, sour stomach, windy belchings, "heart-burn," pain and distress after eating, and kindred derangements of the liver, stomach and bowels.

Persons subjected to any of these troubles should never be without a vial of the "Pleasant Pellets" at hand. In proof of their superior excellence it can truthfully be said that they are always adopted as a household remedy after the first trial.

One little "Pellet" is a laxative, two are cathartic. They regulate, invigorate and cleanse the liver, stomach and bowels. As a "dinner pill," to promote digestion, take one each day. To relieve the distress arising from overeating, nothing equals one of these little "Pellets." They're tiny, sugar-coated, anti-bilious granules, scarcely larger than mustard seeds.

HEALTH AND HAPPINESS.

How to live in health and happiness, is the general theme of Dr. Pierce's Common Sense Medical Adviser. This great work on medicine and hygiene, containing over 1000 pages and more than 700 illustrations, is sent free on receipt of stamps to pay expense of mailing only. Send 31 one-cent stamps for the cloth-bound volume, or only 21 stamps for the book in paper covers.

THE celebrated Dr. Abernethy of London was firmly of the opinion that disorders of the stomach were the most prolific source of human ailments in general. A recent medical writer says, "every feeling, emotion and affection reports at the stomach (through the system of nerves) and the stomach is affected accordingly. It is the vital center of the body * * * * * He continues, "so we may be said to live by (and he might well have said through) the stomach." He goes on to show that the stomach is the vital center of the body. He says, "the function of digestion in its several stages is to prepare the food in forms which are suitable to be added to the structure," meaning the structure of our bodies. He continues, "every physical action from simple breathing, thinking and circulating of the blood to the most active bodily exertion wears out portions of the structure (of our bodies) and they become dead and so require to be taken away speedily. Much of the food which we take, and especially when unwholesome or in excess, adds to the waste material, and when it has undergone chemical changes it is still more mischievous." Then he goes on to the effect that the nervous system prompts every part of the circulating system. He says, "it gives its message every moment to the infinite number of glands and follicles to unload themselves of waste material so that the current of blood may carry it away."

"When these two processes of nutrition and excretion are thus carried on with equal assiduity we are in health, but when this equilibrium does not exist there comes disorder and disease. The common form of such derangement is indigestion or dyspepsia. The function of nutrition is interrupted and all the operations which depend upon it go wrong. Under these conditions it has a way of appearing in other types of disorder. Many of these often misled physicians. Other parts of the organism are likely to be involved, and we may find consumption, kidney complaint, hepatic (liver) disorders, hysteria and even mental alienation (derangement)." He says, "it may be observed that deranged persons have a woe-be-gone expression, offensive breath, irregular action of the bowels, hallucinations and other like conditions of dyspepsia."

The foregoing is no doubt a rational view of the sad havoc worked in the human system by indigestion and dyspepsia, torpid liver and kindred derangements, which are generally associated with or followed by many other diseases of diverse appearance, but all depending upon the weak and disordered stomach. Cure the stomach weakness and you cure all these diseases and derangements.

For weak stomachs and the consequent indigestion or dyspepsia, and the multitude of various diseases which result therefrom, no medicine can be better suited as a curative agent than Dr. Pierce's Golden Medical Discovery. The Golden Seal root, Stone root, Mandrake root and Black Cherrybark are all recommended by such eminent authorities as Dr. Bartholow, of Jefferson Medical College; Prof.

John King, author of the "American Dispensatory"; Prof. John M. Scudder, late of Cincinnati; Dr. William Paine, author of Paine's Epitomy of Medicine; Dr. Hobart A. Hare, of the University of Pa.; Prof. Laurence Johnson, M. D., Medical Department, University of New York; Prof. Edwin M. Hale, M. D., Professor of *Materia Medica* in the Hahnemann Medical College, Chicago, and many others, as remedies for indigestion and dyspepsia, torpid liver as well as for bronchial, throat and lung affections, as will be seen from reading a little booklet recently compiled by Dr. R. V. Pierce, of Buffalo, N. Y., who will send the same on request, by postal card or letter, to any address, free. This little booklet tells of what Dr. Pierce's celebrated medicines are made, and gives the properties and uses of each and every ingredient entering into their composition. Write Dr. Pierce, as above and receive it by return post.

Queen's root, or Stillingia, is an ingredient entering into the "Golden Medical Discovery" highly recommended by several of the above mentioned authorities for the cure of chronic or lingering bronchial, throat and lung affections, public speaker's sore throat attended with hoarseness, dry, rasping cough and kindred affections. Not only is Queen's root specific in its curative action in all these affections, but in "Golden Medical Discovery" it is greatly assisted by the combination with it of Golden Seal root, Stone root, Black Cherrybark and Bloodroot, with which it is blended in just the right proportion. Pure, triple-refined glycerine also greatly enhances the effectiveness of all these agents in the cure of chronic and lingering coughs, being a valuable demulcent, also antiseptic, and a nutritive of great value, especially useful in all wasting diseases, as in incipient consumption and other scrofulous affections. "Golden Medical Discovery" is a sovereign remedy in all catarrhal affections, whether affecting the nasal passages, the stomach, bowels or pelvic organs and the reason why will be learned by reading the little booklet noted above. Send for it now.

In chronic catarrh of the nasal passages, it is important that while taking the "Golden Medical Discovery" as the most effective constitutional treatment for this terribly distressing and most obstinate affection that the nasal passages should be cleansed two or three times a day by the free use of Dr. Sage's Catarrh Remedy, used according to the directions which accompany the same.

The enormous popularity of "Golden Medical Discovery" is due both to its scientific compounding and to the actual medicinal value of the ingredients. The publication of the names of the ingredients on the wrapper of every bottle hereafter to be sold, gives full assurance of its non-alcoholic character and removes all objection to the use of an "unknown remedy."

Every bottle of Dr. Pierce's Golden Medical Discovery bears the stamp of public approval. For the dealer to offer you something he claims is "just as good" is to insult your intelligence.

GLADDEN A GLAD OPTIMIST

Famous Divine Tells of Progress Mankind Has Made in Late Years.

RECOLLECTIONS OF HIS LIFETIME

Growth in Every Direction, but Especially in Thought, Has Marked the Career of the Race of Man.

Rev. Washington Gladden's "Recollections of a Lifetime" was the big event of the three days' session of the Nebraska Association of Congregational Churches. The address was given Thursday night at the First Congregational church, before an audience which filled the lecture room as well as the church proper. Dr. Gladden talked of changes which have taken place in the industrial, social, political and religious world in his life of 50 years. In part he said:

About the first thing of any great importance I remember distinctly was that in 1861 I shouted, with the other boys, "Hurrah for Harrison." In my early boyhood there were small towns and settlements in the eastern part of the country, but the greater part of this broad land was yet unbroken forest and virgin prairie. The streams of the eastern states were full of trout, and many a time I have seen the wild deer come across the farms in central New York. There were some short lines of railway in existence, but I doubt if one in every 10,000 people away from the railroad itself had ever seen a locomotive. There were twenty-four states in the union, Iowa, Wisconsin and Illinois were yet territories, Iowa had 3,000 people and Wisconsin had 31,000, while the census taken before my birth showed New York a town of 20,000 people. Chicago was three years old and a very small town. There had been little done to develop

the country. Large factories of any kind were scarce. Employers generally worked in the same room with their men, and between them there was no such thing as class distinction. A few chartered companies were in existence, but corporations as we know them, had not been invented, though indeed it was but a year after that Connecticut passed a law allowing the combination of capital by business interests.

The changes that have come to pass since then could not have been divined. Great forests have disappeared, willow swamps have been driven back into the fastnesses until now they are an uncommon sight, the tide of population has flowed westward and a mighty empire has sprung up on the Pacific coast; towns have risen from mountain and prairie and the face of the land has been covered with a network of railways.

In those early days such a thing as the sudden mustering of forces for industrial warfare was not dreamed of. Yet a school of thinkers have arisen who attack our entire system of economic life and insist it is wrong from the bottom up. The industrial machinery can and must be moralized and spiritualized; that it can be ruled by the law of love has been in my abiding faith. No social machinery man can invent can give us peace, unless the idea of love enters into its workings.

Changes in Politics. A considerable part of Dr. Gladden's remarks were devoted to a consideration of the political changes due to slavery and the civil war. The young people of today, he said, could have no idea of the depth of passion, pride, exultation and sorrow of those days of civil strife. To read about it in the histories is like going into a big hall on the morning after an orchestral performance and trying to get an idea of it by the music left lying on the chairs of the stage.

Speaking of the great accumulation of wealth and its influences, Dr. Gladden said: "The fight on slavery was out in the open. It was a fight between many men. But the conflict in which the nation has become involved in the last few years is not open; the fight is against unseen, but powerful forces. The president, in his attempts to regulate the trusts, has a greater conflict on his hands than did Lincoln in keep-

ing the union intact. If the battle were only in the open, as then, it wouldn't take us long to fight it.

Change in Thought.

The changes of seventy years in the world of thought are greater than in the world of politics or economics. New things of the outer world but register the progress of thought. By digging into the old things of the past we find the ground prepared for the doctrine of evolution. Sir Charles Lyell, who was appointed royal geologist in the year 1830, read the earth's history as told in the rocks of the crust, and only then the hinted doctrine of the transformation of species. Men began to look as though it might have something in it. But for the most part this was too much of a revolution. If the earth's crust had been built up by the same processes which today are in work at the seashore, they said, how about that story of Genesis, which says God made the earth in six days? The question had the temerity to question the exactness and the literalness of that story. The earth was just exactly 5,500 years old. It was considered rank infidelity to believe that the earth was made in any time but six days, and the geologists were bitterly denounced from the pulpit. The question was left unanswered by the believers. They preferred to think the God had made the world in six days, rather than to doubt the statement of the Bible.

Brings God Nearer to Us.

Some people in this day seem to be anxious to know how they should live. They think we are losing the husks of our religion. We will lose the chrysalis and get the butterfly. In my young days the Christian thought God was once working through the creation of the earth and the world. He was once talking on earth, but had ceased to speak. All this has changed. He is working here now so less mightily than of old; is no less sweetly speaking things to you and me, and the great word is, "If any man have ears to hear, let him hear." When I was a boy the main reason urged for Christianity was personal interest. It was an insurance against loss, an assurance of future happiness. "That idea has retreated into the background. We are Christians now because the Christian life is a noble life; because it is more blessed to give than to receive; because it is better to bring heaven to earth than to go to heaven after we die. There may be a world than this, but I should like to live another seventy years in just such a world as this.

Now is the Time to Live.

Of this I am sure. If it is worth while to live at all it is worth while to live today. No better year ever dawned on our country than the year of our Lord 1906, which has just passed. Sweeping investigations of economic and industrial institutions have been made and great rottenness and rascality exposed. I look upon this as a blessing rather than a calamity. It is to me a mighty revelation of the moral awakening of the nation. Never has there been reason for hope and courage as there is today. The past year, I think, will appear in the annals of the future as an epoch in the moral awakening of the American people.

IN THE CUSTODY OF SHERIFF

Man Accused of Hindering Justice Turned Over by Bondsman and Taken to Jail.

When Al Keenan, charged with trying to influence a witness in the case of the State against Frank Noonan, appeared in court Friday afternoon his \$1,000 bond was set aside by Judge Sutton and he was remanded to the custody of the sheriff.

Mr. Keenan declared he was ready for trial, but Judge Sutton told him he had been drinking too heavily to go to trial then and he would have to wait until he was in better condition. He was taken to the county jail.

Keenan's hearing was set for Friday morning, but he did not appear. Thomas Hector of South Omaha, who was on his bond, was notified to have him in court at 2 o'clock or the bond would be forfeited. Keenan appeared in court in company with his father-in-law, William Hughes, and Detective Kistler of South Omaha. He is charged with advising Hughes not to comply with a subpoena to appear as a witness in the Noonan case.

It is no trouble to recover a lost article. Put an ad in the "Lost" column of The Bee.

WOMEN IN CLUB AND CHARITY.

The resignation of Miss Edna Bullock as secretary of the State Traveling Library commission will be regretted by the scores of club women all over the state with whom she has co-operated in library extension. Miss Bullock has served as secretary since the commission was established, five years ago, and has given unparagoned of her enthusiasm and herself to the launching and establishment of its valuable work. Her resignation comes not altogether as a surprise, as many of her friends have known of her desire to enter another branch of library work. Miss Charlotte Templeton of Omaha, who succeeds to the secretary's office, was recognized as one of the most competent members of the Omaha public library staff during her term as reference librarian. She is a graduate of the University of Nebraska and took the course in library work at Pratt institute, returning last August, and soon after received the appointment of librarian at Oshkosh, which she resigns to return to Nebraska.

NEW PACKING PLANT IN SIGHT

Omaha May Get Branch of Beechnut Company of New York.

Omaha is right in line to have another large industry within its borders which will give employment to 250 people. This is the Beechnut Packing company of Canajoharie, N. Y., a concern which makes a specialty of putting up high grades of meat and fruit in glass jars. Only the highest class of products are handled, the best of bacon, the finest ham, beef with all the fat and gristle removed and the best of fruits. The directors have been looking for some time for a good location in the west and Wednesday Great Western officials, consisting of W. E. Pinkney, general freight agent; C. H. Berry, assistant general freight agent, and H. H. Churchill, general agent at Omaha, met Walter J. Lips, vice president, and Frank L. Black, general salesman, of the Beechnut Packing company in Chicago and brought them to Omaha in a private car to show them the advantages of a location in Omaha. Thursday was spent in looking over the field in Omaha, South Omaha and Council Bluffs and Thursday night the party, except Mr. Churchill, left for St. Joseph to look over that city. They will also go to Kansas City and Des Moines. While in Omaha the party was entertained at the Omaha club and at the Orpheum Thursday night. Mr. Churchill says that Mr. Lips told

Every Niece and Nephew of Uncle Sam

should be deeply interested in what he has said about soda crackers, because they are the one food with which all of them are familiar.

Uncle Sam has given out figures showing that soda crackers are richer in nutriment and body-building elements, properly proportioned, than any food made from flour.

This is saying much for common soda crackers, and much more for Uneeda Biscuit, because they are soda crackers of the best quality. They are baked better—more scientifically. They are packed better—more cleanly. The damp, dust and odor proof packaging retains all the goodness and nutriment of the wheat, all the freshness of the best baking, all the purity of the cleanest bakeries.

Your Uncle Sam has shown what food he thinks best for his people. His people have shown that they think Uneeda Biscuit the best of that food, nearly 400,000,000 packages having already been consumed.

HALF-HOLIDAY ON SATURDAY

A. I. Root First Firm to Announce Early Closing for Summer Months.

A. I. Root, printer, is the first business man to announce the closing of his place of business Saturday afternoons through the summer. His establishment will be closed this afternoon.

As it is yet early in the season, no movement has been made among the department stores, clothing, furnishing and dry goods stores, for early closing Saturday evenings.

It is said the dread question is to be considered, as usual, before hot weather comes on. Last year the stores closed at 5 o'clock Saturday afternoons in July and August.

One store, that of Thompson & Belden, has closed every summer at 1 o'clock on Saturday afternoon, but the proprietors have not decided whether or not that custom will be followed this year.

Pictures of Collectors.

Collector of Customs E. S. Barrows has received a number of the pictures of the former collectors of this port, and has

PUBLIC PLAYGROUNDS TO OPEN

Plant at Twentieth and Harney to Go Into Commission Very Shortly.

The public playgrounds at Twentieth and Harney streets are to be reopened in a few weeks equipped with many improvements over last year. A shower bath building 8x20 feet in size is being erected, a giant stride being put in and a toboggan slide constructed. Vines have been planted to grow over the wire fence surrounding the grounds and the place generally will be much more attractive to youngsters than it was last year.

Mortality Statistics.

The following births and deaths have been reported to the Board of Health during the twenty-four hours ending at noon Friday:

Births—Julius Wicher, 1937 South Seventeenth, boy; Louis Adler, 1665 South Eleventh, girl; Otto Gauntner, 298 Ames avenue, boy; Charles H. Mallinoy, Seventeenth and Chicago, boy; James F. Strout, 41 North Nineteenth, twin girls; Hurl Tower, 206 North Twenty-fourth, boy.

Deaths—Peter Croke, Fourteenth and Fairview, 46; Charles H. Gilmore, 513 North Nineteenth, 56.

The Perfect Food Beverage

The kind of Cocoa Beans that we use contain six times as much food value as beef. We buy only the highest-priced. Our Cocoa is nothing but Cocoa and that is why it is the most delicious of Cocos.

The WALTER M. LOWNEY CO., Boston, Mass.

Lowney's Chocolate Beans and Chocolate products.
