FROM SPANISH PRISON COMES PLEA

Widow Gets Letter Asking Passage Money for Alleged Heiress.

YORK, Neb., May 5 .- (Special.) -A letter addressed to the late William L. Morgan of this city was recently received by widow who has forwarded to a brother of Mr. Morgan who is in the employ of the Bank of England. The letter recites that the writer is in prison in the Castle of Barracas, having been condemned to eighteen years penal servitude for some trumped-up political crime and that he is kept in the darkest dungeons in the subterranean depths of that famous prison. The writer is Emilio Laporte, who claims to be a distant relative of L. L. Morgan. He writes that he The bond was one of an issue of had salted down a big fortune in Europe ninty-seven bonds, fifty-five of which were for the benefit of a daughter, a pure Cas-

#### NO MAN IS STRONGER THAN HIS STOMACH.

Let the greatest athlete have dyspepsia and his muscles would soon fail. Physical strength is derived from food. If a man has insufficient food he loses strength. If he has no food he dies. Food is converted into nutrition through the stomach and howels. It desends on the ach and bowels. It depends on the strength of the stomach to what extent food eaten is digested and assimilated. People can die of starvation who have abundant food to eat, when the stomach and the stomach abundant food to est, when the stomach and its associate organs of digestion and nutrition do not perform their duty. Thus the stomach is really the vital organ of the body. If the stomach is "weak" the body will be weak also, because it is upon the stomach the body relies for its atrength. And as the body relies for its bedy its made up of its several members and organs, so the weakness of the body as a consequence of "weak" stomach will be distributed among the organs which compose the body. If the body is weak because it is ill-nourished that physical weakness will be found in all the organs—heart, liver, kidneys, etc. The liver will be torpid and inactive, giving rise to biliousness, loss of appetite, weak nerves, feeble or irregular action of heart, palpitation, dizziness, headache, backache and kindred disturbances and weaknesses.

heart, paspitation, dizziness, headache, backache and kindred disturbances and weaknesses.

Mr. Louis Pare, of Quebec, writes: "For years after my health began to fall, my head grew digry, eyes palned me, and my stomach was sore all the time, while everything I would eat would seem to lie heavy like lead on my stomach. The doctors claimed that it was sympathetic trouble due to dyspepsia, and prescribed for me, and although I took their powders regularly yet I felt no better. My with advised me to try Dr. Pjerce's Golden Medical Discovery—and stop taking the doctor's medicine. She bought me a bottle and we seem found that I began to improve, so I kept up the treatment. I took on feeh, my stomach became normal, the discative organs worked perfectly and I soon began to look like a different person. I can naver cease to be grateful for what your medicine has done for me and I cartainly give it highest praise."

Don't be wheedled by a penny-grabbing dealer into taking inferior substitutes for Dr. Plarce's medicines, recommended to be "just as good."

### No Secrets To Hide

We have nothing to conceal; no secrets to hide! We publish the formulas of all our medicines. You will find these in Ayer's Almanac for 1906; or write us and we will send them to you. Then show the formulas to your doctor, and ask him what he thinks of them. If he says they are good medicines, then use them. If he has anything better, then use his. Get well as soon as you can, that's the point!
