Citizens Ready to Take Up Tank of Rebuilding and All Thank the Army and Praise the Mayor.

When Mr. Harriman's special pulled into the Union Pacific depot at 2:46, right on the scheduled time which had been laid out for the train, a large party of railroad officials were on hand to extend greeting to Mr. Harriman. He was accompanied by General Manager Mobier, Traffic Director Stubbs

and Superintendent Ware. Mr. Harriman gave out this statement on the conditions of San Francisco: The earthquake was the most severs that has occurred since san Francisco became a great city. This is evidenced by the destruction of charches and other large buildings showing indeubiedly some faulty construction—the gider houses expected by the pieneers and carly citizens haying in many cases withstood the shock unharmed, as did also the recent modern steel structures. Honors for the Soldiers. Honors for the Soldiers.

The officers of the quartermaster's department of the United States army, of whom Major Devol is chief, and of the commissary department, and especially ithe surgeons of the army, have all labored unremittingly and effectively in caring for and distributing supplies, and organizing camps and hospitals. Better Than Savings Bank Investment

Talk-o-Phone Investment Talks-No. 1

Have you money in savings bank pay-ing you 3 per cent, or 4 per cent in-terest? It so, we want to talk to you. Do you suppose the matings banks per-mit your money to remain in tacir vaults? No, indeed; they put the money to work and get all the print except the pairry 3 or 4 per cent they pay you. They put it to work by investing it where it will pay larger in-terest returns. Your common sense will tell you this must be so. Why not invest yourself and get all these

three yourself and get all tissee larger returns.

Then, again, of what use to you is the small interest item you earn from the savings bank—a few dollars from the savings bank—a few dollars each year, at the most. And in the meantime there is no chance for your principal—the money in the bank—to increase.

In an investment is Talk-O-Phone Company stock we offer you an opportunity to earn at least 10 per cent per annum, and in the meantime your principal—the value of the stock itself—will be randed the second

itself-will be rapidly dacreasing.

Last year the Talk-O-Phone Company earned 8 per cent above all expenses on their entire capitalization.

This year a semi-ahnual dividend of 5 per cent will be paid to all stockholders on July 1. We predict a larger, dividend at the close of the year.

That is why we say, get in on the ground floor and don't wait until the stock rises—for it is sure to rise, as sure as the sun rises every day in the year. the year. Send for prospectus or for further par-
