

BEDFORD AND FREE PASSES

Prospective President of City Council Denies Favoring City

POINTS OUT LAW THAT BARS HIM

Accuses His Opposition of Starting Stories to Defeat Him in His Race for the Coveted Place.

Jeff Bedford denies with much vehemence that he had been in any way guilty of soliciting or accepting a railroad pass since the recent election. He admits that he has business relations with the railroads, but he calls the attention of his opponents to the fact that he is the only member of the incoming city council to whom the railroad can not give a pass. He is a coal merchant and a shipper, and it is a penal offense for a railroad to give a pass to a shipper or to any member of a shipper's family, or to a prospective shipper, or to anyone who may become a shipper.

Did Not Eat with Enemies. Moreover, Mr. Bedford denies that he was in attendance at the dinner given at the O'Brien cafe, when certain members of the council broke bread and other things while a man high in the councils of the local public service corporations sat at the head of the table and footed the bills. This, too, says Mr. Bedford, is an invention of the enemy, circulated with more or less malice and a purpose to discredit him with those of his party who are consumed with a hatred of the cohorts of corporated wealth.

"You can make this just as strong as you like," said Mr. Bedford, when he was entering his disclaimer, "for I want to be set right before the people. I want to be it was that I straddled those stories, and I'll let him know that I know. It was done to influence a couple of votes in the council. I'm in doubt as to whether it will."

The stories to which Mr. Bedford objects are to the effect that he secured railroad transportation for certain friends in the election, and that he took part in a dinner at which a corporation man sat at the head of the table and did the honors.

Corporation Support Divided. Part of the franchised corporations have been putting in licks for Bedford and part for Funkhouser, as the work of lobbyists and agents seems to indicate. The Funkhouser supporters declare their man is free from corporation taint or control, notwithstanding whatever the vested interests may be doing for him.

Coincidental with other signs of strike comes rumors that members of the city council propose to have something to say about splitting up the breakfast food not withstanding Mr. Dahman's assertion that he "would make the appointments." Nearly every officer-elect has one or more particular friends whom he wants to see seated at the city pay roll and for whom he is willing to put up a fight. Inasmuch as the mayor needs seven councilmen to confirm and make good his appointments, there is obvious need for diplomacy and care in making the arrangements.

The receiving of applications will close Tuesday afternoon and on Wednesday the new administration integers will get together, probably, and try to decide on a program. This is where a break between the mayor and his council is expected to occur if it does at all.

On City Engineer. The biggest paying office in the gift of the administration and one of the most important, both from the standpoint of its duties and from that of its care and the number of able-bodied men it requires, is that of city engineer. Mayor-elect Dahman has made it plain that he wishes to keep City Engineer Rosewater in the place, because of his experience and ability. This does not meet with the approval of Pavant, Councilor Hugh Murphy, who is actively fighting Rosewater's confirmation among the councilmen. Murphy at present represents the new A. L. Barber asphalt company, which desires changes in the paving specifications that will tend to bar out competition. The demands were made upon Engineer Rosewater some time ago and have been made in Kansas City and other places. They amount to a positive discrimination against artificial asphalt, and a proviso that the asphalt used must have contained 95 per cent or more bitumen in its original state. The effect would be to bar out the California asphalt and that from Trinidad, giving a practical monopoly to the A. L. Barber company, which controls the Bermudez fields of Venezuela, the source of litigation, international complications and public and private scandals.

Mr. Murphy has been working upon councilmen-elect to prejudice them against the engineer's retention. His candidate for the place is Thomas Shaw, local civil engineer, formerly in his employment.

Other interests are fighting for the dis-

trust to Indians.

It is said that many Americans, both men and women, are thin, pale and puny, with poor circulation, because they have ill-treated their stomachs by eating or too much eating, by consuming alcoholic beverages, or by too close confinement to home, office or factory, and in consequence the stomach must be treated in a natural way before they can realize their earlier mistakes. The muscles in many such people are in a state of atrophy, and this thin-blooded person, do their work with great difficulty. As a result fatigue comes early, is extreme and lasts long. The demand for the most perfect health ever tissue, bone, nerve and muscle should take from the blood certain materials and return to it certain others. It is necessary to prepare the stomach for the work of taking up from the food what is necessary to make good, rich, red blood. We must go to Nature for the remedy. There were certain foods known to the Indians of this country before the advent of the whites which later came to the knowledge of the settlers and which are now growing rapidly in professional and popular esteem. These are found to be safe and yet certain in their character. They have a direct effect upon the stomach, liver and blood. These are: Golden Seal root, Queen's root, Stone root, Bloodroot, Mandrake root. These three are the most reliable and efficient stomach tonic and liver invigorator, when combined in just the right proportions, as in Dr. Pierce's Golden Medical Discovery. Where there is bankrupt vitality—such as nervous exhaustion, bad nutrition—and thin blood, the body acquires vigor and the nerve, blood and all the tissues feel the favorable effect of this sovereign remedy.

Although some physicians have been aware of the high medicinal value of the above mentioned plants, yet few have used pure glycerine as a solvent and usually the dose is prescribed in alcohol for the ingredients in varying amounts, with alcohol.

The "Golden Medical Discovery" is a scientific preparation compounded of the glyceric extracts of the above mentioned vegetable ingredients and contains no alcohol or harmful habit-forming drugs.

BRANDEIS BOSTON STORE & SONS

placement of Assistant City Engineer George W. Craig if Mr. Rosewater is kept. The candidate for the job is M. J. Lacey, for years an employe of the office and recent candidate for county surveyor on a democratic ticket. Mr. Craig grew up with the office and it is doubtful if Mr. Rosewater would desire reappointment if he had to let him go. Places in the department have always been filled regardless of politics, there being many democrats employed. Unless he can stay assured that he will not be compelled to fill up the department with incompetents for purely partisan reasons it is said Mr. Rosewater is not anxious to remain.

OMAHA NATIONAL CASHIER

Bucholz of Norfolk Will Succeed Waite the First of Next Month.

Charles E. Waite, cashier of the Omaha National bank, has resigned his position to take effect June 1. W. H. Bucholz of Norfolk, Neb., has been elected to fill the place. Mr. Waite left the position as cashier of the St. Joseph Stock Yards National bank four years ago to become assistant cashier of the Omaha National. After half a year's service he was made cashier. Previous to his residence at St. Joseph he lived at Lincoln, Neb. He has made no announcement of his plans for the future. Mr. Bucholz came to Nebraska from Iowa twenty-two years ago, and for eighteen years, up to 1904, he was with the Norfolk National bank, fourteen years as cashier and four years as president. In 1904 he went to the Central Bank of Oakland, Cal., as vice president, and remained there until March 1 of this year, when he resigned to come to the Omaha National bank. Mr. Bucholz has a wife and two sons. He has bought a handsome residence on the west of Hancock park, the Joe Murphy place, at 1740 South Thirty-second avenue, and has already brought his family to it.

NEW BUILDING ORDINANCE

Inspector Withnell Will Ask Council to Revise the Present Regulations. Building Inspector Withnell says he will ask the new council to make a complete revision of the building ordinances to bring them up to a plane prevailing in Chicago, Denver and other cities that have given the subject careful attention. The inspector and his clerk, Richard Grotto, have been working on a proposed revision and getting the views of building departments all over the country for months. The attitude of the present council discouraged them from trying to get new regulations from it, but now a trial is to be made with the new body. According to Mr. Withnell, Omaha is sadly deficient in building laws in many respects and he finds himself without authority or power in many instances where the office he represents should have control. He is anxious to have the new ordinances provide for uniformity of construction in the business districts, limitation as to height, classification as to buildings that may be built within given territories, improvements in the requirements as to fireproofing, theaters, public buildings, etc., and restrictions in moving old structures to new sites.
