Ex-Ambassador Joseph H. Choate will be leading counsel for the New York City insurance inquisition fame will be leading counsel for the people.

A plan for cooling and ventilating the subway has been adopted by the Rapid Transit commission. By an ingenious ar rangement the moving trains will be made to do part of the ventilating work. Renewal of air rather than cooling is the first thing aimed at. Such renewal, it is believed, can best be effected by exhausting the air at points midway tween the stations, thereby causing fresh air to flow in through the station open-

Two devices will be used, automatic valves and electric fans. The valves will be operated by the trains themselves. These valves open outward only under the increased pressure of air "aused by passing trains. An outrush of the heated a'r between stations is thus produced, which, of course, induces an inflow of surface air at the stations. The greater the number of trains passing the greater becomes the volume of air removed. The valves and fans together will be able to effect a complete removal of air throughout the subway once every thirty minutes, it is said. They would provide efthe tunnels in case of fire.

If the fans and louvres are to work at their highest efficiency more openings for inflowing air will have to be provided waged within and without his party has at the stations. To increase these openleft some festering sores, but if Edward ings it is proposed to cut out 6,000 square feet of vaulting at various stations and substitute gratings, with copper pans underneath for drainage. The sum of \$300,000 will be expended in the improvements.

In New York there have been, of late, number of severe explosions, the mystery of which puzzled the authorities no little until careful inspection disclosed the cause. The conclusion was reached that which the trouble was due, but it reguired some time to solve the question fully and to account for the presence of the gasoline in sewers. Finally it was discovered that it came from the automobile garages, at which the employes cleaned the vehicles with gasoline, the refuse of which went through the drains into the sewers. It was found that there were thirty or more garages within the explosion belt. Hereafter no gasoline will be allowed to escape into the house drains and thence into the sewers. The garages are to be inspected frequently and when gasoline is found in the drains the person responsible will be arrested. The mystery of the explosions had caused much uneasiness lest they were the deliberate act of evilly disposed persons Edward Rosewater has entered the field and its satisfactory solution affords decided relief.

"If you are a Mason you will keep your word, and I want your word that you a strictly business standpoint, will go will not leave your bed or make a sound further, last longer and accomplish more in until I am out of your house," said a burgiar as he stood at the foot of the bed after-consideration. Success which is aton the second floor of 137 Bainbridge street, Brooklyn, with a revolver leveled at Mr. and Mrs. George E. Gale.

It was sumed in some quarters that this was be cause of their respect for his ability and a liking for his personality, but Mr. Chandler had a theory of his own on the subject. "No, the newspaper men don't like me for that," he said. "I know why it is. It's because I am always raising Cain and supplying them with good copy."

REAL TAINTED MONEY.

Righteous Demand for Clean Paper Currency. New York Tribune.

There is one kind of money which is really "tainted," and against which there is on that account a general and well founded prejudice. That is the paper currency which is not morally, but materially, tainted, through long use, much handling and storage in a variety of places of more or less uncleanliness. We do not know that anybody ever positively refuses to accept such money, though it is always in order to protest against a bill that is too tattered and reeking for respectability. We are not convinced, either, that everybody that accepts a worn and soiled bill is in imminent danger of dying forthwith from a complication of tetanus, tuberculosis and bubonic plague, though we have no doubt that diseases are occasionally conveyed through such a medium. But from the point of view of health, of

leanliness, of decency and of the looks of the thing, there ought to be a reform of our currency on the lines of the pending legislation in congress and of the report which the treasurer of the United States has just made upon the subject. The treasurer, we observe, does not altogether approve of any of the three pending bills, but thinks the good features of all should be incorporated in one. That may be, though there are many who will not agree with him in thinking it too drastic to order that all bills returned to the treasury for redemption shall be destroyed and replaced with new ones. Such a system might cause the destruction of many bills which were scarcely soiled, but, on the other hand, a less stringent measure might keep in circulation many which were phy-

sically vile The credit of the country requires that our circulating medium shall be such that nobody will feel that it should be handled with tongs. It is our boast that our money is always and everywhere worth its full face value. We ought also to be able to boast that it is kept as clean, physically, a as it is possible to do. Dirty money is not so bad as depreciated money, but it is too bad for a self-respecting nation to tolerate. Congress will do itself and the country credit by enacting a good, strong law on this subject.

Health as a Business Asset. St. Louis Republic.

The average man is not accustomed to re gard his health as his very best asset, yet that is precisely what it is. The man who will accord due regard to his health, from the end than one who makes health an tained at the expense of health is worth absolutely nothing to the man who attains There is no pleasure, either, in the process or in the final result.

RIGHTS OF THE BENCH.

Indiana Publisher Punished for Critleising the Court.

Cincinnati Enquirer. An Indiana judge has fined a newspaper publisher \$250 and sentenced him to imprisonment in jail for three months for contempt of court. The "contempt" consisted of an editorial criticism of the judge's course in a criminal proceeding. The case has given rise to a good deal of interesting comment and criticism. It brings out again a not unfamiliar argument that a judge in a proceeding for con tempt of his own court-in effect, of his own person-wields a tremendous powermore than ought to be placed in one man's hands; but the question as to how the proper limitation should be placed is not settled, and probably never will be Newspapers and judges are both human, and both go wrong occasionally. They err in judgment, or allow their passions and prejudices to govern them in public mat-

In 1904 a United States district judge issued an order affecting a railroad in which the state of North Carolina was a stockholder. It was severely criticised by a Raieigh paper as an order which would do great injury to the state. The editor was arrested for contempt and sentenced to pay a fine of \$2,000. Citizens promptly subscribed the money to pay the fine. The defendant refused the money, and had himself taken by habeas corpus before Judge Pritchard of the United States circuit court, who ordered his discharge, say-

"That newspapers sometimes engage in unwarrantable criticism of courts cannot be denied. In some instances they construe the liberty of the press as a license to authorize them to engage in wholesale abuse of the court, but these instances are rare and do not warrant a departure from the well settled principles of the law as declared by congress and construed by the courts. If judges charged with the administration of the law are not to be criticised on account of their own conduct. the liberty of the press is abridged and the rights of individuals imperiled."

MIRTHFUL REMARKS.

"Ies, he's a cigar manufacturer and yet he never smokes."

"O! yes he does."

"Why, he told me some time ago that he never smoked in his life."

"That was before he began to advertise. He found his own advertisement so alluring that he just started in."—Philadelphis Press.

"I've got you skinned to death for size and beauty," boasted the Luther Burbank rose.

The English primrose sniffed disdainfully, "You're a bloomin' graft, you are," he said.—Cleveland Leader.

"What's the matter with the stuff?" demanded the new reporter.
"What's the matter with it?" snorted the city editor; "well, for one thing you're inconsistent. Your opening sentence reads; 'No pen can describe the scene.' Then you go on and describe it to the extent on a column!" "Well, you will observe that after the opening sentence I used a lead pencil."
Philadelphia Press.

THE SERENADE.

Washington Star. No more the youth with light guiter Awaits the evening shade. To tune beneath the twinkling star. A tender screnade.

No more beneath her casement there Out in the moonlight's glow, Of eyes so bright and golden hair He sings full sweet and low

The old guitar is laid aside, The casement's closed for ke And Cupid, humbled in his bride, Out in the starlight weeps. The youth walks in the girl would laugh Should he all bashful watt. They listen to the phonograph And say: "Gee! Ain't that great!"

Pale, Thin, Nervous?

Then your blood must be in a very bad condition. You certainly know what to take, then why not take it?-Ayer's Sarsaparilla. If you doubt, then consult your doctor. We know what he will say about this grand old family medicine. Sold for 60 years.
