BY A WELL KNOWN ARTICLE. So much has been written by the standard medical authorities...

Of Queen's root, Prof. King says: "An alternative (blood purifier) unsurpassed by few if any other of the known alternatives..."

Briefly let us say that the "Golden Medical Discovery" was named from the sturdy little plant Golden Seal, the root of which enters largely into its composition...

Who can doubt the efficacy of such a compound when scientifically made up, as in Dr. Pierce's Golden Medical Discovery? Who can doubt that it is a most effective remedy for the several diseases for which its ingredients are so highly recommended...

But to return to the "Golden Medical Discovery" it may be said that its curative properties are not wholly dependent upon Golden Seal, valuable as it is...

Much further information as to the properties and uses of the Golden Medical Discovery and Dr. Pierce's Favorite Prescription for weak women, will be found in a little booklet...

barred by constitutional prohibition from the president's chair may not be conscious of that disability. But the people of the territories may have reason to complain when their citizens may be thus barred in the District of Columbia, a different matter. In the insular dependencies the native Porto Rican, the Hawaiian and the Filipino are wholly at the pleasure of congress, and differ in political and civil rights not only from the people of the territories, but from the citizens of the United States. A strange condition, not dreamt of by the fathers of the republic, exists when the descendant of the emancipated black man may, as a free citizen of his country, look down upon the dependent yellow, the red and the brown man. When the Chinese youth born in San Francisco may, as a patriotic American, desert his alien father, and when the Indian, the first American, may proudly accept, as the ward of the nation, the guardianship of a grumbling government.

GRAND JURY RESUMES WORK

Federal Body Takes Up Investigation of Land Filing Cases After a Week's Rest.

The federal grand jury resumed operations at 9 o'clock Thursday morning, after a vacation of about a week. The investigations pertain to the fraudulent land filings in the Richards and Comstock cases, the witnesses being largely old soldiers from the vicinity of the disputed lands.

These men, according to the statement of one of the witnesses, were solicited to make filings on the lands in the vicinity of Gordon, within the Spade ranch, by I. D. Hull. Their filing expenses were paid and also all expenses from Missouri Valley to Gordon and the witnesses were taken out to the lands said to be the claims on which they had executed the filing papers. They were to lease the lands during the time they were perfecting their final proof to Richards and Comstock for \$50 per year, which was paid them for the first year. It was also understood that the hearing of the lands would be equivalent to settlement and making improvements and after final proof had been made they could sell the lands to the cattle company for from \$100 to \$300. Some of the soldiers, who had doubts as to the legality of these proceedings, wrote to the general land office about it, and, being informed that it would be illegal, relinquished their filings to the government.

WEBSTER WILL NOT TALK

Declines to Say Whether He Has Started to Select His Delegation.

John L. Webster returned from Cheyenne Thursday morning, where he was suddenly called to attend a law suit. Mr. Webster said he never saw the state looking as fine as it does this spring. "The crop is coming up in fine shape in this great agricultural commonwealth of ours and the various shades of green make a sight long to be remembered." Mr. Webster declined to discuss his senatorial candidacy. It was reported he had started to select his delegation for the primary contest, but his friends said this was not true. On this point, as well as others, Mr. Webster was noncommittal, but gave the impression he had not yet undertaken active measures.
