OMAHA, June 6, 1906. Wheat worked %c higher today, though trane was very light. Cables came %c lower and prices were unchanged at the opening. The bull sentiment was due to reports of too much rain in both southwest and northwest, together with the strength in coarse grains. The northwestern market showed a fair advance, teccipis were moderate and the cash demand slow. Shorts were inclined to cover on predictions of more rain for the porthwest.

The action of corn was surprising. The opening was a shade lower, but buying by leading interests developed a strength, putting prices up a cept at the close. The semand is strong in the cash line, and everything offered is being bought. The close was strong at le up.

Prices on Board of Trade.

CHICAGO, June 6.—The Kentucky state frop report showing considerable damage by drouth to the fall sown crop caused strength today in the local wheat market. At the close wheat for July delivery was up 160%c. Corn was up 160%c. Oats showed a gain of like. Provisions were 15c to 30c higher.

The wheat market was strong all day. There was a good demand at the opening by commission houses and pit traders, and as the day advanced the demand became more general. Offerings were light throughout the session. The main factor in the situation was the state crop report of Kentucky, which gave the conditions of fall sown wheat in that state on June 1 as 75 against \$7 on the first day of May. The deterior from was said to have been caused by ack of moisture. Other factors that sires, exied the market were excessive rains in the northwest, dry weather in Nebraska, reports of damage in Texas and Oklahoma and an advance of 1c in

that sires, sened the market were excessive rains in the northwest, dry weather in Nebraska, reports of damage in Texas and Oklahoma and an advance of lc in the price of cash wheat at Kansas City. The market closed strong, with prices near the highest point of the day. July opened unchanged to a shade higher, at 80% 380% c. Sold up to 81% c and closed at 81% 381% c. Clearances of wheat and flour were equal to 162,900 bushels. The world's visible supply decreased 5,500,000 bushels, as shown by Bradstreet's. Primary receipts were 268,000 bushels, compared with 180,000 bushels for the corresponding day one year ago. Minneapolis, Duluth and Chleago reported receipts of 171 cars, against a holiday last week and 185 cars for the corresponding day one year ago.

Liberal local receipts depressed the corn market at the opening, but sentiment soon became bullish and prices experienced a sharp rally. Shorts and commission houses were active bidders, but offerings were unequal to the demand. The market closed steady and close to the highest point. July opened 1/2 to 14,674 lower, at 49% to 1946,049% c, advanced to 50% c and closed at 50% c. Local receipts were 636 cars, with 321 cars of contract grade.

Outs were in active demand all day, but offerings were very light. The bulk of the buying resulted from the publication of a Kentucky state crop report. July opened a shade to 160%, where it closed. Local receipts were 22 cars.

Frovisions were strong because of lively baying by shorts and local packers. A 5 to 71% advance in the price of live hogs and diminished receipts formed the basis of the demand. At the close July pork was up 30c, at \$18.47%. Lard was up 15c, at \$2.75. Ribs were 25027% higher, at 25.4569.47%.

NEW YORK, June 8.—The realizing of profits was rather more conspicuous in today's stock market than the new buying of stocks, but the speculative party which is conducting the larger share of the operations in the present market did not relinquish the efforts to hold prices against this realizing by support of special stocks. There were fewer of the stocks among the influential standard issues chosen for that purpose today than of the less conspicuous and low grade industrials. Most of the supporting efforts centered upon St. Paul, and was carried over later into Union Pacific. Outside of these there was a miscellaneous list of specialities which rose from time to time and supplemented only slightly the sustaining effect of the leaders. list of specialities which rose from time to time and supplemented only slightly the sustaining effect of the leaders. There was a decided shrinkage in the volume of the market.

The character of the trading was but little regarded, and news developments were little regarded, and in fact, were not of great importance. General outside interest in the market was pronounced to be still a negligible quantity. Monday's buying was professedly based to some extent on an assumption that an early adjournment of congress was probable. The setting today, which was based on professed disappointment over a revised prospect of an extended session of the law-making body probably came from the same professional sources. The easing tendency of the local money and the local money and the law-making body probably came from the same professional sources. The easing tendency of the local money and the local money supplies. Some of the demand for remittance abroad was reported to be small. Another phase of the money outlook was seen in the rilling course of foreign exchange with the lincrease in local money supplies. Some to the demand for remittance abroad was reported to be provided for payment of maturing finance bills on which great sums ty and which was borrowed in effect, is not destined to fine parket than be retained here against the sum of the finance of the packs of money here there was noticed a movey ment in interior exchanges against New York, the rate at Chicago today falling to a discount. A possible diversion of the return flow of funds from San Francisco, to Now York to other points is indicated by this. London discounts were inclined to yield today, but Berlin hardened and Paris sold securities freely in London. The firmness in the price of wheat was connected with reports of unfavorable weather conditions. The mixed tone of the market continued up to the closing.

Wool Market. BOSTON, June s.-WOOL-Trading is quiet in the wool market. The lack of stock is said to be the prime cause of the indifferquiet in the wool market. The lack of stock is said to be the prime cause of the indifference of manufacturers, with the unsatisfactory conditions of the dry goods market also a factor. There is little doing in foreign wools here, either in South America or Australian grades. Territory wools are steady at 72673c for fine and 8875c for fine medium. Pulled wools are dull, with supers moving at 90636c. SHEEP—The sheep market this norming was without any new or increasing features. There was a tair run, thirteen cars being reported in, but the quality of the receipts was generally unsatisfactory. There was one pretty good idea of lambs on sale, which brought, \$6.35, with the fair kind selling at and around \$6.00, Wooled lambs brought \$6.75, which was the same price paid for them yesterday, but the cut today was heavier, so that they did not sell to quite as good adventage as yesterday. The general market might be described as barely steady with yesterday.

Shippers will understand that there is a good demand at this point for distrable fat sheep find lambs, but the in-between kind of stuff which constitutes the bulk of the receipts is slow sale. Buyers are complaining that the common kinds are killing out very poorly and hence they are not very anxious for any but the best grades. Still, the fact that good kinds are so scarce compels them to take practically everything coming.

Quotations on clipped stock: Good to choice western lambs, \$6.25 @6.26; fair to good to choice yearlings, \$5.50 @5.75; good to choice weetern lambs, \$6.75 @6.50; fair to good to choice weeters, \$5.50 @5.75; good to choice ewes, \$5.50 @5.75; fair to good ewes, \$4.75 @5.55; bucks, \$4.25 @4.75.
