SCHOOL BOARD TO ORGANIZE

Treasurer Davis, Elected Last March, Takes Office Under New Law.

CHANGE IN TIME OF TAKING THE CENSUS

Law Expected to Work to Advantage of Teachers in Country Districts, Making Their Tenure More Secure.

The Board of Education will hold its annual meeting tonight, as provided by the new law enacted by the last legislature. The new law provides that all school boards throughout the state shall hold their annual meetings on July 1 or the day following when July 1 happens to fall on a Sunday. Heretofore the Board of Education held its annual meeting on the third Monday in September.
Although Dillon Ross was elected secretary of the board at the annual meeting last September, the board, under the provisions of the new law, will be required to elect a secretary at its meeting tonight. There being no opposition, Mr. Ross will be unanimously re-elected. At the school election in March George S. Davis, the democratic candidate, was elected treasurer of the school district of Council Bluffs. Unlike the two new members of the Board of Education elected at the same time, Mr. Davis did not assume his office at the March meeting, but will do so tonight, when H. G. McGee, who held over as treasurer, will retire in his favor. Treasurer Davis filed his bond shortly after his election and the same was approved by the board, so that he is prepared to assume the responsibilities of his office tonight.
The new law also makes a change in the time of taking the school census. Heretofore the census had to be taken and completed between September 1 and the third Monday in that month. Now it has to be completed by July 1, and Secretary Ross, under whose direction the census has been taken, will be required to make his report of the same at the meeting tonight. Mr. Ross stated last evening that he had not quite completed the tabulation and that possibly he would be unable to make a report tonight, although he hoped to.
The new law affects the directors in the rural school districts somewhat differently to those in the city districts and will prove a material benefit to the teachers in the country schools. While the school directors in the rural districts are elected in March, unlike the directors in city districts, they do not take their seats until the annual meeting in July. Heretofore it has been the practice of school boards in the rural districts to elect their teachers for six months only, from September to March, and then when the new board convened in March it, as a rule, elected another set of teachers for the rest of the school year. Now that the new directors do not take their seats until July 1 the teachers, it is expected, will be elected for the entire school year.

Fight Not Allowed in Iowa.
There was no prize fight at Courtland beach yesterday afternoon, although all preparations had been made. The promoters of the affair and the principals in the proposed fistic encounter were on the ground, but Major George H. Richmond, chief of police, with Detective Weir and Sergeant O'Neil were also there. When Chief Richmond and the two officers reached Courtland beach they found everything in readiness for the fight. The ring had been pitched on the old dancing pavilion and the ropes were strung and the canvas spread. When Clarence English, the promoter of the fight, and Guy Buckles and "Kid" Jensen, the principals, appeared on the scene Major Richmond entered the ring and informed them that the fight could not be pulled off on Iowa soil. Realizing that Council Bluffs' chief of police fully meant what he said, English and his assistants at once proceeded to dismantle the ring and remove themselves from the jurisdiction of the city of Council Bluffs and the state of Iowa.

Boycott on Chicago Papers.
The boycott of the newsboys against the Chicago and St. Louis papers is still on, although it was stated yesterday that one of the Chicago papers had conceded the boys' demands. The agent for one of the Chicago papers attempted to buck the boycott and hired Tom Carter, a man who has had frequent trouble with the police, to sell his paper at the corner of Broadway and Pearl street.
Carter's appearance on the street corner almost led to an incipient riot, as the newsboys resented his intrusion. The police had to be summoned to interfere and the final upshot was that Carter, who had, despite the early hour of the morning and the fact that all saloons are supposed to be closed, secured several drinks of whisky, was taken into custody and locked up at the city jail, from which he had but recently been released, on a charge of being drunk and disturbing the peace.
Many of the newsdealers and drug stores which handle the Chicago and St. Louis papers broke over the agreement made with the newsboys. Their customers demanded the papers and they decided they had to handle them.

PLAIN FACTS

Superiority of Quality is the Test.

MOST BEER, no matter by whom brewed, is clean, pure and sterilized.

Cleanliness is accepted as a rule of self-preservation in every reputable brewery.

Purity signifies nothing more than the absence of foreign matter.

An experienced brewer would no more boast of the purity and cleanliness of his beer than a gentleman would brag of having washed his face.

Many pure, clean beers, however, are not good beers.

A really first-class beer must not only be free from self-evident defects, but it must combine all the positive excellencies known to the science of brewing.

For these reasons brewers who do not dare to test the substantial merits of beer harp on purity.

The true test is QUALITY which cannot be had without superior materials, perfect treatment and ample storing capacity.

Upon this issue of positive SUPERIORITY of QUALITY we challenge all competitors.

Of materials we use only the most excellent, regardless of cost. Corn, the one important substitute, which, on account of its cheapness, has been extensively adopted by many brewers, never enters our brewery.

Our facilities for brewing beer are unequaled.

Our storing capacity of 600,000 barrels doubles any other brewery in the United States, and enables us to store our beer from four to five months.

Facts speak louder than words.
Publicity is the demand of the day.
The consumer is entitled to the truth.

INCREASE IN THE CORN YIELD

Prof. Holden Expects to Add Five Million Bushels to the Crop.

DEALERS DISCUSS GRAIN INVESTIGATION

Many of Opinion It Will Uncover Discrimination in Favor of the Line Elevators—Condition of Fruit Crop.

(From a Staff Correspondent.)
DES MOINES, July 1.—(Special.)—Prof. P. G. Holden of the State Agricultural college will start out this month to increase the yield of corn in Iowa by 5,000,000 bushels. His efforts will be made under the college extension department, for which the last legislature appropriated $35,000. Prof. Holden was the originator of the gospel seed corn train that toured Iowa last winter and the winter before, spreading information among the farmers as to the selection and care of their seed corn. Last year there was about 9,000,000 acres of corn in Iowa and the average yield was thirty-six bushels. The year before it was thirty-two bushels. This average yield means but two stalks of corn to the hill. Prof. Holden believes that by proper selection of the seed corn so that every grain will grow, a stand of corn can be secured that will grow three good stalks to the hill, which would add one-third to the yield of the state. Since the lectures of Prof. Holden and the gospel seed corn trains the yield of corn has steadily increased. Beginning this month, Prof. Holden leaves the agronomy department of the State Agricultural college and will devote his entire time to the college extension work, which means that he is to change from teaching farmer boys in the college to teaching the farmer and his boy direct on the farm. He believes that a great deal can be added to the increase of the yield of corn next year by the dissemination of information this year, as to how to select seed corn, and believes that it is only a question of time till a perfect stand of corn of three stalks to the hill with three full-sized ears will be secured. The acreage of corn this year is 9,433,960 acres, and to add the 5,000,000 bushels which he has set for the increase next year it will be necessary to add only a trifle over half a bushel to the acre. To make an increase from the present average of two stalks to the hill to a perfect stand of three stalks to the hill would mean an increase of about 110,000,000 bushels. Prof. Holden, therefore, thinks that his proposed increase of 5,000,000 is a very conservative figure. To accomplish this he has planned to go into every section of the state of Iowa to reach the farmer with his theory as to the selection of seed corn.

Will Affect Iowa Grain.
Grain dealers of this state are in conflict as to whether or not Iowa will be affected by the investigation of the grain business and line elevators and discriminations called for by the LaFollette resolution. E. D. Hamlin of this city, who operates along the Iowa Central, believes that the investigation will effect only the big terminal elevators, and their dealings with the railroads. At different times in the last few years it has been discovered in this state that there are secret agreements as to rates and shipments of grain. The farmers have had offered in the legislature a number of times bills intended to correct evils which, however, have always failed to pass. A little over a year ago members of the Iowa Grain Dealers association fell out among themselves as to prices of grain and also as to line elevators which were favored as compared to the independent shipper. A number of grain dealers have expressed themselves the last few days to the effect that the LaFollette investigation will disclose discrimination in favor of the line elevators. They furthermore, claim that the same conditions which operate to give Peavey & Co. at Council Bluffs an allowance of 1¼ cents a 100-weight and free switching between Omaha and Council Bluffs, also operate in other parts of this state to the advantage of large shippers, and they anticipate some disclosures under the LaFollette investigation.

May Curtail Base Ball.
The supreme court has been called upon to decide a case that may affect the whole future of the national game in Iowa. An appeal has been taken from Lucas county in an injunction proceeding that was started to prohibit small boys playing base ball on a vacant piece of ground in the city of Chariton. The injunction was granted by the district court of Lucas county on the ground that the balls being batted about were liable to go onto the ground of the complainant, which would require the players to invade the complainant's yard, which might lead to damage to complainant's property. As there is always adjoining property to every base ball grounds the same ruling will apply everywhere in the state, unless the supreme court reverses the case. The vacant land in Chariton is owned by W. A. Elkenberry. The land has been used as a sort of public commons and small and large boys alike have for years gathered there for their base ball games. The owner received no rental for the ground, though at times admission was charged to see some of the games. Suit was started by J. F. Spiker for an injunction, which was granted for the reasons given, and he was given damages to the amount of $1 and costs, amounting to $48.30.

Ring for Nebraska Brother.
Miss Ada C. Davis, the wealthy woman who was discovered dead at her home near Berwick a few days ago, left in her will a bequest of $10 for her brother, William, in Saunders county, Nebraska, with the request that he buy a ring with the money and have it engraved, "From Ada." The rest of the property is willed to nieces and other relatives.

Condition of Fruit.
State Horticulturist Wesley Greene today reported that the condition of the fruit of the state June 30 was as follows: Apples, 60; pears, 35; American plums, 62; domestic plums, 45; Japan plums, 43; peaches, 77; cherries, 79; grapes, 81; red raspberries, 66; currants, 67; gooseberries, 68. In each case, except peaches, cherries and red raspberries, the condition of fruit is now as good as it was June 1. Red raspberries are in the same condition. Cherries have improved from 75 to 79, and peaches from 67 to 77. The figures given are the per cent of the average condition of the fruit.
