NEW YORK STOCKS AND BONDS

Market Lapses into a Condition of Extreme Lethargy Which Lasts All Day.

TRADERS WAIT FOR THE CROP REPORTS

Its Appearance Causes a Slight Slight Rally, but the Close is Dull and Heavy.

NEW YORK, July 10.—The stock market lapsed into a condition of extreme lethargy today, the shrinkage from yesterday's volume being in about the proportion of yesterday's shrinkage.

Complete stagnation prevailed for long intervals in the trading.

Up to noon, however, the period in which most of the day's business is usually done, there was little activity.

Attempts to contend the quiescence and find no profit in insignificant interchanges.

Among the failed efforts to relieve the market, it is attributed to the unwillingness to trade to the desire to await the appearance of the government crop report.

But the non-existent state was a proper augury of any coming activity.

The actual appearance of the report failed entirely to relieve the market, although its showing was fully up to anticipations, which had been very sanguine.

Yesterday's crop of rumors of railroad stocks secured in Paris was pretty conclusively disposed of by details from various interested quarters.

That there have been negotiations in progress to secure loans in Paris, however, admitted of little doubt from the sources of yesterday's reports.

Much attention was attracted by the abstract sent out from Washington of the condition of the market.

It was strikingly showing of the continued heavy demand for credits.

Compared with the previous call report, it showed an increase of \$7,000,000 in individual deposits, accompanying an expansion of \$2,000,000 in cash reserves.

The loan item in the same time was \$2,000,000. But compared with the growth of \$2,000,000 in individual deposits in parallel with the heavy increase of \$2,000,000 in cash reserves.

They were in the corresponding period of 1933.

The New York banks today began to return government deposits, which are called "hot money," to the market.

The money market was unaffected owing to the extreme stagnation of the stock market.

The largest individual lenders of money in Wall street were reported to have put out large amounts of carrying over.

This represents the recently prevailing bid price, which is a record for the market.

The government crop report was made in accordance with the market's habit on all favorite events.

The inactivity of the market, however, was a reflection of the narrow proportions of the market.
