Distress in Interior.

The most urgent problem before the government in case an immediate outbreak is how much was stock and how much was bonds. postponed is the relief of the distress in the interior. The cabinet meeting Tuesday evening was devoted to consideration of this subject and it was voted to extend relief works in the famine districts. A commisston was appointed to decide where the budget could best be cut to find the \$7,500,-000 voted by Parliament for famine relief. It will be necessary also to provide more cash for the settlement of claims for damages to estates during the poasant excesses, the commission for Yekaterinoslav province mainder of the stock? The Rech will say tomorrow that the recovery on the bourse today was due to a loan of \$250,000,000 by the Mendelsohns to sustain prices.

Caur's Reason for Dissolution.

Premier Stolypin tonight authorized the official St. Petersburg news agency to issue the following statement to the foreign press.

From the very first days of its existence the lower house of Parliament overstepped all the limits of law. In its reply to the speech from the throne, modification of the fundumental law was demanded in the shape of the suppression of the council of the smpire and the creation of a responsible cabluse. By its agrarian program based the empire and the creation of a responsible cabinet. By its agrarian program, hased on the expropriation of land, the house raised hopes that could not be realized and weakened the respect for property of oth-ers, already enfectiled. In the speeches of its members the house consistently dis-credited the government, which it even accused of organizing and causing dis-orders. By sending a deputation to Etalyorders. By sending a deputation to Binly-tok it openly aspired to usurp executive

power. Fourisen deputies appealed to the people, inciting disorders, a step which called forth no expression of disapprobation from the house. In the last month of its existence the house declared that the government had acted illegally in explaining to the population the mature of the agrarian pro-

population the nature of the agratian pro-ject proposed by itself and decided to ad-dress a manifesto to the people persuading them not to believe in the government is-garding the question, but to await its set-tlement by Parliament. Beveral members also undertook journeys to the interior of Russia with the object of supporting agitation, their appearance being followed by renewed disorders, pogroms and strikes. All these causes necessitated the decision to dissolve the house.

Union Pacific Wins First

At the former hearing of the case the Interstate Commerce Commission decided the Union Pacific company had a perfect right to pay this elevation charge on acount of its situation. Omaha and Kansas City are the terminals of the Union Pacific and that company is willing to pay 1% cents per hundred to have its cars emptied and returned to it inside of fortyeight hours so they can be sent back for

another load. The contract with Peavey & Co. has stood, and in addition a contract was entered into with the Transmississippi Grain company similar to that of the eavey contract.

When Mr. Stickney Began his agitation against the payment of elevation charges at the Missouri river the Union Pacific hought to strengthen its position by naking the rate open and agreed to pay 14 cents per hundred to all elevators which would perform the service of unloading these cars and getting them back to the Union Pacific inside of forty-eight hours. This removed the exclusive nature of the contract and gave all elevators an

even break. A crusade was started and all other roads have stopped the payment of elevation charges except the Union Pacific at Omaha and Kansas City and the Rock Island at Kansas City.
