Hous—Huyers are continuing their bear tactics and are pounding the market at every opportunity. That is not only the case here, but at every other selling point. This action on the part of buyers appears to be due to the general feeling that logs are and have been for some time selling too high. On the other hand, in spite of all the pounding, it seems very hard to go the pounding. This morning buyers started out bidding lower again, the same as they have practically every day the last week or ten days, and they succeeded in buying the hoss 2/6 gife lower than yesterdsy. The trade was not very active at the decline, as sellers fought for every cent and would not take off anything only as absolutely compelled to. The foremoon was well advanced before anything like a clearance was effected.
