Board of Education Makes Assignment of Teachers for the Year.

JOHN W. DALY KILLED AT SWIFT PLANT Becomes Tangled in Shafting While at Work Repairing an Elevator

in the Plant-Body is Badly Crushed. The teachers' committee of the Board of Education yesterday made public the assignments of the grade teachers of the first

which includes all teachers who will be retained from the old teaching force. Written notices have been sent to all teachers and so far no complaints have been

The board meets in regular session next Monday evening. At that meeting it is expected that the committee on grounds and buildings will be able to report a favorable bid for a site of the new building. If a good sits is secured it is probable that the work of erecting the building will be undertaken with dispatch. The board

has been busy lately putting in cemen sidewalks at several of the buildings in place of board walks. Appended is the complete list of the teaching force under the achool to which each teacher is assigned:

Fligh School—N. M. Graham, principal;
Perry McD. Wheeler, assistant principal;
Mary Ross, T. E. Boswell, Bertha E.
Clark, Henry Clausen, E. C. Finley, Anna
Fowier, Susie Horen, Mary Hubbell, Marie
Kennedy, Marie Schisby, Patricia Naughtin, Eva O. Sulfivan, Sara Taylor, Mable

Fatal Accident at Swift's. Another fatal accident occurred at Swift and Company's packing plant last night. John Wesley Daly was crushed to death at 5 p. m. by being wound up on an elevator shaft. Some part of the mechanism had gone wrong and he and a companion. Thomas Thorgensen, a miliwright, had gone up to the top among the shive wheels to make repairs. In some manner he was caught in the revolving shaft and whirled around several times until his body was practically beaten to a pulp. His ribs, arms, legs and head all received injuries each of which would most certainly have resulted fatally. An effort was made to save the man's life, which was still fluttering when he was extricated. He was taken to the South Omaha hospital and his

L streets, at the lodging house of J. J. Heasley. He is a married man and has son of about 8 years, but he was divorced from his wife, who lived at Murray, Neb. He was a member of the Woodmen of the World, being the counsel commander of Camp No. 211. He carried an insurance on his life. His son's name is Harold E Daly. He has two brothers in South Omah : Washington Daly and William Daly. It is expected that an inquest will be held to discover the cause of the death. The deceased was elevator conductor in the sweet pickle department. How the elevator happened to be running while the repairs were n progress is unexplained. The funeral will probably be arranged for Sunday aftrnoon under the auspices of the Woodmen of the World. Later notice will be given.

wounds partially dressed when it was found

Paying at Highland Park. A movement is on foot for the placing of pavements around Highland park, one of the greatest drawbacks to an otherwise beautiful little park being the condition of the adjacent streets. Of late several people who have the attractiveness of the park most at heart have begun an agitation or paving. A petition has been cuietly circulated seeking to secure signers from enough of the property owners to put the project through. It is a question with which the Highland Park Improvement club will interest itself through several of its autumnal sessions. The next meeting of that club will be Thursday of the com-

HAYDEN BROS NOVEL PLAN TO MAKE PILES New Scheme of Constructing Concretes to Be Used in Rome

Miller's Hotel. A novel method of constructing concrete piles will be used in Rome Miller's new hotel building at Fifteenth and Jackson. The method is entirely new to Omaha, though the inventor A. A. Raymond. was formerly an Omaha contractor, but where he perfected his scheme and became the head of the Raymond Concrete Pile company, which is doing the work on the new hotel.

The plan consists in encasing a collapsible ron core with a heavy sheet iron shell and driving it into the ground from twenty used in Omaha before. The work here is winter mornings under the rays of the to thirty feet. The core is then collapsed

and pulled out, leaving the shell in the ground, which is filled with concrete. The work can be done rapidly and just as cheaply or a litle more cheaply than wooden pile work and has the advantage of being practically indestructible, while the wooden pler is liable to rot in the course of time. The concrete pile will sustain three times the weight a wooden one will bear. About 250 of these piles will be driven for the Miller building and work

Mr. Raymond first tried his plan on one ings, but it failed, as he could not get the core out of the ground without injuring

will begin on the piling next week.

NEW LIGHTS ARE POPULAR Electricity for Street Purposes is Giving Satisfaction in Resi-

dent Districts.

Reports from the outlying districts received by the city electrician indicate that the new electric lighting is giving general satisfaction. The gasoline jamps burned for the last time on the night of July 31. Not a single one remains on the streets of the city. The amount spent for of the Transmississippi exposition build- them is now paid out for the new electric lighting. One especially warm testimonial came from a street railway motorthe sheet iron shell. He set to work to man, who gets up at 5 o'clock in the devise the collapsible core and success fol- morning to milk the cow before going to lowed. The concrete pile is used exten- the car house. He believes his rural sively in the east, but has never been labors will be much pleasanter of dark in charge of T. E. Rickard, superintendent. new arc lamp near his home.
