the big Southern Pacific shops are locate at Sacramento, and owing to the general rise in wages in San Francisco and Sacramento snopmen have demanded more pay. This has led to a refusal by the company to meet the demand and a reduction in the force at the shops. But with the reduction of the force the shops are unable to juired of them, and hence Omana is called ipon for help. All the work that cannot be done in the acramento shops will be sent to Omaha,

where, at this season of the year, the work is not as great as at other times, and the force will be able to take care of it. The best men out of the Sacramento rorce will be retained, but the reports in digate that those who are not will have so trouble whatever in getting all the work they can perform in stricken San Francisco at wages much higher than those asked of the Southern Pacific. So far as is known, this state of atfairs has not stirred up any serious trouble in union labor circles, though something of the kind has been hinted at.

For the Entire Month of July the Mean Temperature Shown by the Government Was Seventy-Three.

Cheer up; it ten't hot. You just think so because you live in a summer resort, where, during the month of July just past, the average temperature was 78, 2 degrees cooler than the mean temperature for all

While Thursday presented a fairly good article of warm weather, it was not a record-breaker, by any means. The maximum temperature was reached at 5 o'clock Thursday afternoon, when the weather bureau thermometer registered 97.7. During the month of August, 1901, the maximum temperature every day was 97 and on two days 106 was registered, which was within one degree of the maximum temperature for the month for the record of the last thirty-five years. However, in 1804, the year of the hot winds, the thermometers registered on July 26 a temperature of 105, which is the maximum temperature for July since the establishment of the weather bureau in Omaha.

The temperature all through eastern Nebraska and western Iowa ranged from 97 to 100, as well as in nature prevailed all through the corn and wheat belt except in the Omaha district. The temperature at 7 o'clock Friday morning was 76, and the forecast is for continued warm Friday night and Saturday. During July and August, 1874, a temperature of 105 was recorded for this locality; of August temperatures in this latitude. Only during five years since 1894 has the temperature of 102 was reached, which will be remembered as hot, dry and dusty. A like condition prevalled in July, 1899, and August, 1896,

the humidity was 68 per cent. A man who works for the Omaha Gas company and who lives at 2315 Douglas street was overcome by the heat on Douglas street Friday afternoon. Dr. W. O. Bridges attended the man and pronounced

But he who points out the evils of the time and indicates how they may be remedied; he who points' to the good that is being done, and the good that may be done-he, we believe, has a place in our progressive, active, strenuous, earnest American life-whether "he" be a man or a magazine.

How a small body of workingmen did work too big for experienced and able legislators-controlling strikes and a land-domination equal to our Trust and Railroad domination.
