42. Horse, 15.2 hands and under, that has been shown singly, and has not taken a first prize at this or any of this association's previous shows. Post entries—\$100.

Champion Classes.

43. Horse, not over 15.2 hands, having taken a first prize or one of a pair having taken a first prize in the harness classes, at this or any of this association's previous shows. Post entries—356.
44. Horse, over 15.2 bands, having taken a first prize or one of a pair having taken a first prize in the harness classes at this or any of this association's previous shows. Post entries—\$50.

What shall I do with my savings? Keep hoarding it? Speculate? Or invest? And in what?

B per cent, conformation 10 per cent, and equipment 25 per cent.—\$150.

Harness Class.

Harness Class.

Horses entered in these classes must be practically sound, and will be judged by their adaptability to the purposes and vehicles specified in the several classes. Must be able to draw the prescribed vehicles without apparent effort.

7. Horse, any size or sex. The horse to be judged for its adaptability as a heavy harness horse. Style, action, pace, conformation and manners, will be especially considered. To be shown before a gig—\$500.

8. Park horse, 15.2 hands and under,

18. SUPPLY IS ENORMOUS.

Twenty-five per cent of every cake of Geyserite Soap is made up or this iava, when once used, is always used again. The stock is therefore a specific between the substance costs us practically onthing, as the ground is paid for, furthermore, this substance costs us practically onthing, as the ground is paid for, the deposit is enormous and seemingly never-ending, and we can ship it into Denver-ending, and we can ship it into Denver-endings, and we can ship it into Denver ending a cent a pound. Whether it makes a good soap is attested to by many endorsements that we have not got the stock is therefore. The stock is therefore, this substance costs us practically each of the several classes. Must be increased in the stock is therefore, this substance costs us practically each of the several classes. Must be ground is paid for, we are self-in an into developed in the several classes. Will be specially considered. To be shown before a gig—\$500.

The par value of our shares is \$1.00 each. We are selling them now at only 25 cents each. Yet we are established, are 15 years.

business. We are putting it over-conservatively, but it shows the possibilities of your investment.

SAFE INVESTMENT.

scide such matters for him iff. The question with you should be: Do you consider this a good investment? If you do go into it you will be in good company. Rich men do not often wards, mistakes in their investments. Some of the wealthiest in est men in Colorado—a state known for its wise investors—are interested in the Geyserite Manufacturing Co. This should go far toward proving, that it is a good investment for you.

It is not a mine that may or may not contain the metal you think it does. It is not an oll well in which you may strike water. It is a soap, and everybody uses soap. Why should they not be taught to use Geyserite Soap? It seems reasonable that with clever publicity—which, we have made to yet read.

SAFE INVESTMENT.

WE MAVE TANGIBLE ASSETS.

But above all, we want you to remember that you are going into something that is that you are optimal, even approperty, a factory equipment, patents, all of which represent capital invested. There are practical soap men in the company as well as successful men. They will help you to make money and protect what you already have. They will make money for you, because every time they make it for the sealer to you.

The stock of the Geyserite Manufacturing Co. is an investment, not a speculation. It is an good investment of the prominence of its stockholders. They represent some of the leading business, professional and political men in the president of the company. It is worth not ing that these successful men helped to take in the soap. That in should they not be taught to use Geyserite you to write these men, to your friends in Denver, or in any other way you choose make a thorough investigation of the product, the property, the officers, etc. Some of the stockholders are:

Pred W. Fark, Lieut. Governor of Colorado. They all king.

which we have made Thos. F. Daly, President Capital Life Intrrangements to obtain—it can be done.
And every cent invested will go toward increasing the value of this property. We are as anx-

this period of chemically prepared articles.

The discovery, romantic though it sounds, is not a myth, but a geological fact. The supposition is that the lava was deposited by an extinct geyser centuries ago. It is situated near Orieans.

No doubt thousands of prospectors and ranchmen in days passed camped near this valuable lode, but none thought to investigate it. It remained for some ranchers from Colorado who camped there to look into the peculiar soil. It was purely an accident, a deed of curiosity, that prompted a member of the party to take some of the mut to clean a knife blade. To the amagement of all, it took off the rust as if by magic. They rubbed it in their bands and their hands became clean. They tried it in cleaning other articles and it worked in cleaning other articles and it worked equally well.

Capitalists Are Interested.

When the party returned to Colorado they told of their find. The saponaceous qualities of the lava were not dreamed of at that time, the finders believing it qualities of the lava were not dreamed of at that time, the finders believing it merely had strange and unusual scoucing properties, just as nearly all mind possesses some such properties. Denver capitalists became interested and sent a geologist to investigate. He reported that the deposit was undoubtedly left by a once active geyser. The matter was then submitted to chemists, and their analysis of the lava gave the first inkling that it possessed the properties of soap in a pure and natural state.

The property, extending over a considerable number of acres, was bought outright from the original owner, and a company was formed in Denver to manufacture a commercial soap with this lava as a bage. The company was named the Geyserite Soap company, and the article itself Geyserite Soap and A building was erected at Thirty-first and Blake streets in Denver, and the manufacture of the soap was begun on a large scale.

Company Finds Demand.

Though all this hapened a comparatively short time ago, the company is reported to be in a very prosperous condition, and the soap is being soid in all parts of the United States, and the demand for it is increasing steadily without the expenditure of a cent for advertising. The promoters, however, hope soon to compete with the other well known soaps by launching an extensive advertising campaign. It seems that nowadays nothing can be made to go hugely without extensive advertising. HON. HARPER M.

ORAHOOD.

ing can be made to go hugely without extensive advertising.

Frank A. Joslin of Denver, the president of the company, recently made a trip to the property in the company of an expert, and he reports that the deposit is well night limitless. An attractive feature from the commercial standpoint is that Geyserite costs the company practically nothing in comparison to the material that other soap manufacturers are compelled to buy, and that the Geyserite can be shipped into Denver, ready to be converted into soap, at less than one-half cent a pound. This gives the company a tremendous advantage over other soap manufacturers as owing to the perullar inexom the commercial standpoint is tha ufacturers, as owing to the peculiar inex-pensiveness of the article, it can be sold at

pensiveness of the article, it can be soid at a lower figure than other soaps, while giving a better profit. The wholesaler and jobber sells what he finds the most profit-able, so it is certain that Geyserite Soap will have the friendship of the men who

Pure Natural Scap. Chemists claim that Geyserite Soap is the only pure and natural soap that has yet been marketed. It is said to be uncom-bined and to contain no free caustic alkall. It is this latter ingredient in the cheaper soaps that plays such havoc with the skin.

The successful sale of the soan is re-

The successful sale of the soap is re-markable, because it has depended entirely markable, because it has depended entirely upon one person recommending it to another, but even by this primitive method the sale has been extended into several countries. The commercial importance of the find is admitted by rival soap manufacturers, and other sections of the state are being prospected for similar deposits. At the present time it is believed that the Geyserite Soap company has a world monopoly of this soap deposit.

Original "Geyserite" Soap Factory Owned by the Company. Present Capacity 20,000 Cakes Daily.

THESE ARE THE MEN YOU LOOK TO FOR YOUR EARNINGS

IS THERE PROFIT IN SOAP-MAKING?

There are over twenty million families in the Inited States. It is estimated that an average family uses about \$5 cents worth of soap a month The sales run into the millions, and this is only for toilet seap. But America contains only a small part of the population of the world and soup is these millions that are spent for toilet soap and a part of the hundreds of thousands that are spent for surgidal soap. We manufacture Geyserite Surgical Soap, and doctors who have used it say that it is superior to the German soap now generally used. This soap is simply a by-product of the Geyserite Toilet Soap, so it costs us practically nothing. Our profit is very large on both soaps, and yet we give the best soap of each kind that has ever been made.

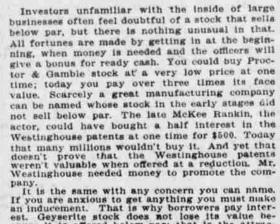

Some of America's largest fortunes have been made in soap. The Fairbanks, Kirks, Cudshys, Armours, Swifts, Babbitts and others have been made in soap. The Fairbanks, Kirks, Cudshys, Armours, Swifts, Babbitts and others have been made in soap. The pairbanks, Kirks, Cudshys, Armours, Swifts, Babbitts and others have been made in soap. The pairbanks, Kirks, Cudshys, Armours, Swifts, Babbitts and others have been made in soap. The pairbanks, Kirks, Cudshys, Armours, Swifts, Babbitts and others have been made in soap for less money and still make more profit than any rival. With these advantages why should we not be able to make Geyserite Soap the "National Soap?" It is a continuous seller if once used. All that we have accomplished is due to the superlative value of the article, and the fact that the business has grown been plished is due to the superlative value of the article, and the fact that the business has grown been plished is due to the superlative value of the article, and the fact that the business has grown been plished is due to the superlative value of the article, and the fact that the business has grown been plished is due to the superlative value of the article, and the fact that the business has grown been getting these millions. used everywhere. We believe we can get a part of

FRANK WHITEHEAD, Vice President

exceptional article. If such

Westinghouse needed money to promote the company.

It is the same with any concern you can name. If you are anxious to get anything you must make an inducement. That is why borrowers pay interest. Geyserite stock does not lose its value because it is offered below par; that is the attraction. You buy it as an investment and to get you to buy it we make an inducement. We need the money to increase the value of the stock. When the right value has been reached the sale of stock will stop or the stock will be obtainable only at its true price. You, having helped us to get it to that high place, will share in the good fortune.

Bank interest is no attraction for the smart investor. He knows his money is worth more than per cent. You can make

"Gold in Geyserite"

This is the title of a booklet that tells ail about the Geyserite Manufacturing Co., how Geyserite was discovered and by analysis of Geyserite Soap and of Geyserite Surgical Soap, tells about the officers. gives the names of the principal stockholders, gives a tabulated statement of the

profits on Geyserite Soap, etc., etc. If you don't want to send money now, on the facts given in this announcement, then send for this booklet, clippings from the press, etc. Then you can read it at your leisure and think the matter over. "Gold in Geyserite" is a very interesting booklet for any one who ever intends to invest. It is illustrated, contains statistics and gives information not usually given in

We will send it free to any interested person upon receipt of name and address.

FREE SAMPLES FOR EVERYBODY

Whether you intend to invest in the stock of Geyserite Manufacturing Co. or stock of Geyserite Manufacturing Co. or not, we would like to have you become better acquainted with the merits of Geyrerite Scap, or, if you are a doctor, with Geyserite Surgical Scap, made according to the formula of the late Dr. Parkhill. We believe that if you will try Geyesrite Scap you will want to become a stockholder in the company, or at any rate you will want to continue to use the scap, and in that way you will benefit the present stockholders. We will send a sample of the scap to anyone anywhere upon receipt stockholders. We will send a sample of the soap to anyone anywhere upon receipt of name and address absolutely free. It wont be long before every store in America will be handling Geyserite Soap, so, even if it is impossible to obtain it row in all places you can send for it direct, if you like it well enough. As soon as we get sufficient capital for marketing the soap on the scale it deserves the most out-of-the-way inhabitants will be able to obtain it with facility.

WHERE GEYSERITE SOAP IS ON SALE.

Geyserite Soap is already used by the leading hospitals and sanitariums of the country in their toilet rooms, by the leading railroads east and west, by the leading hotels, etc., and other public institutions. It is also on sale in the principal stores of the country. It sells for 5 and 10 cents a package. The 5 cents size has the value of the usual 10 cents soap and the 10 cents of the 25 cents soap. It is the greatest money's worth in soap making, the only pure soap sold, and yet a profitable soap to the manufacturers. Omaha friends can buy it at the following stores, where they can also obtain A SAMPLE ABSOLUTELY FREE.

Hayden Bros. Drug Dept. Boston Store Drug Dept. Sherman & McConnell Drug Co. Beaton Drug Co. Myers-Dillon Drug Co.

The trade in the middle west is supplied by J. G. NOTTER & CO., 40 River street, Chicago, and the east by JNO. J. BEETSON, 24-26 E.

ANYTHING for grantedlook into the matter fully.

Do not take shares as he can possibly pay for, cash or installments. We want men, women, even children, and thousands of them, in every part of the country-yes, in every part of the world. The more scattered our shareholders the more universally known will our soaps become, and this is the prime object in selling our stock to the public. Above all, do not delay in sending your subscription. The price cannot remain long at 25 cents per share, and if you send your remittance promptly you will be able to secure your shares at this price. If you desire more information before investing, write us fully. We will answer your every question and do all in our power to convince you of the solidity of this company and the safety

LABOR AND INDUSTRY.

The famous Krupp works for gunmaking keeps on listrolls 62,535 workingmen and 5,065 officials. A plant for manufacturing artificial marble was recently established in Catalina. Italy.

The Western Pacific railroad, being built between Salt Lake City and San Fran-cisco, needs 5,000 men, ranging from en-gineers and machinists to day laborers. In New York state 692 miles of improved roads are already completed, plans for 1,550 miles have been approved by the various boards of supervisors and 5,450 miles is recommended for improvement by the state engineer for the purpose of the state engineer for the purpose of the state engineer for the purpose of the state of the st forming a complete system of improved coads for the state. About 3,754 miles of highway have been surfaced with gravel, 1,501 with crushed stone, while about 39,945 miles have been shaped and

The use of colored papers for house decorations, which was scarcely known in China until quite recently, is now becoming general.
In the town of Klingenberg, Germany,

by them increased from 147,000,000 marks (mark 23.8 cents) in 1903 to 230,000,000 in 1905. The profits realized (which accrue to the benefit of the members) were 12,000,000 and 15,000,000, respectively, for the years mentioned. Many of these various retail co-operative stores have their wholesale purchasing companies, which supply them at original cost; they are thereby enabled to secure lowest wholesale prices.

In a paper read recently before the Society of German Engineers, it was estimated that in Germany no less than 600,000 horse-power might be obtained from the surplus gases of coke ovens, and an additional 1,000,000 horse-power from the waste gases of blast furnaces. The first gas-engine plant dealing with coke oven gases was put into operation in 1824 in Germany, and there are now constructed or under construction gas engines capable of delivering no less than 400,000 horse-power when operated; with "poor gases."

At the next convention of the United

"poor gases."

At the next convention of the United Mineworkers of America an attempt will be made to adopt a rule against the closing of a mine on the day of the funeral of a miner killed by accident. Instead of that the act of sympathy proposed is the donation of one-half the day's wages to the family of the deceased. Last year there were \$44 lives lost in the anthractic coal field and the average loss of wages in each case, due to the stoppage of work as a mark of respect, was about \$1,500. Oncer the proposed plan the men would have continued working as usual, but the family of the buried miner would receive a gift of \$750.

Malaria used to kill 15,000 persons a year in Italy. In 1902 state quinine was intro-posed and last year the mortality fell to

Probably the heaviest man in Europe was the late Hans Froman of Willenberg, in eastern Prussia, a hotelkeeper. He weighed the pounds. A showman in Paris once offered him a large sum and he was willing to accept it, but he could not enter any passenger car and refused to travel in a freight car. If the shah of Persia were to be de-prived of his income he could still make sure of being one of the richest men in the world. He would only have to sell his ornaments, gens and precious stones to become possessed of about \$5,000,000, the sum at which the magnificent collection is valued.

A bullet that hits the mark, but does not kill, has just been invented by Dr. Deirliers of Paris. The details of its construction are not mentioned, but it is said to be hollow, and can be used several times. In a test for duel practice pistois were used with steel guards resembling a sword hilt, because, although the bullet does not penetrate the clothing, it will wound naked flesh. Both men wore goggies. Out of 272 shots, 292 struck some part of the bodies of the duellets.

Less than two years ago a prospector lost his way on the desert near the Cali-

fornia line, in Nye county, Nevada, and died of thirst. On the spot where that man's body was found is now the town of Builfrog. A water works plant costing \$50,000 supplies an abundance of water. There are hotels with baths in many rooms and residences equipped with all the modern paraphernalia that make for comfort. Electric lights illumine the streets where only the stars of heaven looked down on the death of the lonely miner, and within the radius of a very few miles there are now about 15,000 people.

RELIGIOUS NOTES.

The black pope was a "dark horse."

Mrs. Nellie A. Reid, the only woman pastor in Connecticut, is stirring religious circles in South Manchester as they have not been moved in many years. As pastor of the John Wesley Pentecostal church, she is not only winning the hearts of her parishloners, but is saving the souls of many unbelievers as well.

After forty-one years of continuous service in the ministry, during which time he never missed a Sunday on account of sickness, Rev. Henry Goodsell of La Crosse, twice presiding elder of the Wisconsin Episcopal church, will tender his resignation as pastor and will, on the anniversary of his ordination, go to California, where he expects to make his future home.

Rev. Daniel B. Leach of Bone Gap, Ill. a Methodist minister \$6 years old and well known all over southern Illinois forty years ago as one of the greatest pulpit orators, has just had placed on a graphophone record a benediction which he has used for more than seventy years in closing sermons. It is his request that the benediction be reproduced by the graphophone at his funeral.

Baphael Merry Del Val, secretary of state to the Vatican, was a distinguished
