

GRAIN AND PRODUCE MARKET

Trade Basis Light Range of Values is Small. WHEAT LOWER, WHILE CORN HOLDS FIRM Front Comes on Letter as Far South as Kansas, but Crop is Out of Danger—Wheat Sentiment Bullish.

OMAHA, September 29, 1906. Early wheat prices were steady, but the market eased off under a light trade, closing 1/2 cent below yesterday. General sentiment seems to be bullish and the news for the day was in favor of the bulls, but nobody would trade. Firm cables, unimpaired reports from the west and a good cash demand were noted with pleasure by the bulls.

Export business shows signs of improvement, some large sales of wheat and flour were reported. Predictions are for a marketing season. Corn prices advanced slightly over yesterday, the volume of trade being light. Receipts were little under the estimate, but were heavier than last year. Front corn is mostly out of danger. Primary wheat receipts were 1,214,000 bu. and shipments 620,000 bu. against receipts last year of 1,264,000 bu. and shipments 610,000 bu. Corn receipts were 450,000 bu. and shipments 450,000 bu. against receipts last year of 430,000 bu. and shipments 430,000 bu. Clearances of wheat and flour were equal to 353,500 bu. and 2,300,000 bu. respectively.

NEW YORK STOCKS AND BONDS

Market is Under Pressure Which at Times Becomes Acute. VIOLENT RECOVERY NEAR THE CLOSE Savage Onslaught on Over-Extended Short Interest Causes Sharp Advance—Money Conditions the Feature.

NEW YORK, Sept. 29.—Stocks were under pressure again today, which became acute at times but were interrupted by occasional rallies when the bear traders detected a change in the selling and bought to cover shorts. A savage onslaught on the over-extended short interest caused the violent recovery near the close. The high opening was a direct result of the order of the Treasury department placing \$20,000,000 of government deposits in national banks at different points throughout the country. The high prices were immediately taken advantage of to sell stocks in realization of profits, and this movement continued at intervals for the rest of the day.

The method of relief for the money market chosen by the treasury authorities did not give entire assurance of its effectiveness for meeting the needs of the day. The money market was not so tight as it had been, but the effect of the deposits likely to be assumed militate against an overflow in the New York money market. The effect of the deposits did not find their way into the New York call loan market, where it was assumed that they would be placed.
