STEP TOWARD THE CABINET FOR MAGOON

Ke Secret About the Capital the Nebraskan is Being Groomed for the Position of Secretary of War.

(From a Staff Correspondent.)

WASHINGTON, Oct. 2.—(Special Telegram.)—Governor Charles E. Magoon, looking in splendid condition, arrived in Washington today, taking quarters at the Wilmington. Hardly had he inscribed his name on the register when he was met by a dozen new men eager to welcome him back to the capital.

It is generally understood in circles close to the president that about ready to announce the fact that Governor Charles E. Magoon, late of Panama, will become civil and military governor of the Cuban republic.

In looking about for an experienced mind to follow in the short, but exceedingly capable, but to the brilliant administration of Secretary Taft in Cuba, there is no man so thoroughly well equipped for the position of provisional governor of Cuba as Charles E. Magoon.

Taft Wants Out. This was the way the cards were put in Cuba while Governor Magoon was on the high seas and when he learned that Secretary Taft had declared himself provisional governor of that island pending a new election and the restoration of peace.

Should the president select him for the Cuban governorship Judge Magoon said tonight he would be ready to sail just as soon as Secretary Taft desired. In view of the fact that Secretary Taft has requested Mrs. Taft, who is on her way from Canada to the states to join him in Havana for a short time, it is not expected that the secretary will relinquish the provisional governorship for at least a fortnight.

SECOND CLASS MAIL MATTER

Postal Commission Hears Assistant Postmaster of Chicago at New York Sitting.

NEW YORK, Oct. 2.—Important changes in the laws governing the handling of second class mail matters were raised in a statement by John M. Hubbard, assistant postmaster of Chicago, which was read today by the postal commission, which is investigating that subject in this city.

Mr. Hubbard recommended: That second class mail matters be made self-sustaining.

That a law obliging bulk matters to be carried outside of the mails would go a long way toward solving the problem.

That if these two resolutions are rejected that the rates on bulk packages be reduced to 2 cents per pound to newspapers, and to 3 cents to subscribers, advertisers and exchanges.

The abolition of the sample copy privilege, the transient rate on packages and the complete cutting of second class matters by publishers.

The passing of a stringent law to punish violators of the law.

Mr. Hubbard's statement argued that the self-sustaining rate would remove the deficit in the Postoffice department, enable congress to increase the pay of delivering carriers, and make the department independent of the treasury.

One Way to Save Expense. The carrying of bulk outside the mails, the statement declared, would result in immense saving to the department, and it is thought that the publishers can make better terms with the transportation companies than with the department.

It was said that cost of handling unsorted mail is 1 cent a hundred and of sorted mail 1 cent a hundred.

A brief report of the American Publishers' association was submitted today to the congressional commission on postal matters, which is in session here, and which is inquiring especially into what steps shall be taken by the government to obliterate the large annual deficit in the postal revenues.

The brief is designed to show that the legitimate daily newspapers are not the cause of the deficit and consequently are entitled to a continuance of the prevailing rate.

It is asserted that while the government itself has to pay more than 10 cents to carry the 10-cent magazine from the publishing office to the news stand and carrier, it does a profit from carrying the daily newspapers.

It is declared that the newspapers have been improperly included in sweeping assertions that all those entitled to the second class mailing privilege enjoy a gratuity and subsidy from the government.

The brief asserts that the postal revenues were anticipated by Postmaster General Smith and Payne because of the establishment of the rural free delivery system, and that the deficit need not be viewed with apprehension.

Mr. Hubbard's statement argued that the self-sustaining rate would remove the deficit in the Postoffice department, enable congress to increase the pay of delivering carriers, and make the department independent of the treasury.

FUNSTON TO TAKE COMMAND

Governor Taft Requests that He Be Given Charge of First Expedition.
