Committee Accepts Invitation.

My Dear General: Lipon my return to the office after some days absence I find plurs of the the inst. I have received at invitation from our mutual friend, Judge Bred, to give an address of selection at the menting of the Army of the Tempessee in Connels Sluffs. I assure you, my dear general, that even though I should wear myself to a shadow in the campaign now in progress, I will be with you in Council Bluffs if I have to be aggried there on a stretcher. The cocasion is one of deep significance to me and in every loyal uttased of the state. I tost an especial interest in II, not only because it is a reunion of the best and bravest men who ever fought for a just cause, but because you are the commission of the gray-haired, age-enfeebled veterans. You know me wall enough to be sure that I shall sever lose an opportunity to de yeu honor. All lows united in affection for her most distinguished soldier. With the highest regard, I am, yours very truly.

putty, it drops out of place, leaving the stove full of air leaking cracks, allowing the gases and the fuel and a big part of the heat generated to be sucked up the chimney and thus wasted.

More than one-half of all the fuel you put into the putty jointed stove is lost in this way. If your old stove eats up more fuel and does not keep fire as well as it did at first, the reason is the stove putty has dropped out of the joints.

Cole's Original Hot Blast

Stove Saves all Fuel and Heat Wasted by Other Heating Stoves

Burns Soft Coal, Hard Coal, Crushed Coke, Lignite, Slack or Wood. No stove putty is used in the construction of

this economical stove; it is not necessary, owing to the patented construction which makes the stove practically jointless. Cole's Hot Blast is the only heating stove in the world which is guaranteed to remain siways sir-tight. On account of the absolutely air-tight construction of Cole's Original Hot Blast Stoves, gases and the fuel are held back until they are consumed by the patented top Hot Blast draft, and both gases and heat which escape up the chimney with other stoves are thus saved to your profit and comfort-soft coal is half gas. As a result of this saving the fire is never out and the rooms are heated for two or three hours in the morning with the coal put in the Cole's Hot Blast Stove the night before. Scientific Construction

Hot Blast burning Soft Cost Note the straight steel jacket encasing the heavy cast iron fire box inside, and the guaranteed smoke-proof feed door placed at the front of the top in Cole's Flot Blast Stove, shown by cut No. 1, doing away with air-leaking putty joints at top and bottom of fire pot and around the door frame on other stoves as shown by cut No. 2.

The water-tight steel bottom and patented compound hinge for ash door, also the patented steel collar for joining the ash door frame to the heavy steel body so that it cannot be loosened by action of the fiercest heat, while of only technical Save \$50.00 to \$200.00 interest, are special features in the Original Hot Blast Stove which combine to make it the most economical heating stove in the world. We are Exclusive Agents—avoid imitations.

You cannot afford to say to yourself, "My old stove or an imitation stove at a little less price will have to do this winter."

Other style stoves and all imitations of this Original flot Blast are made with stove putty joints, and when you stop to think that \$1.00 saved on the first cost of the stove means the loss of \$50 to \$500 in fuel during the life of the stove, you will readily see the advantage of buying Cole's Original flot Blast, which holds fire just as well and Is just as economical in fuel after years of use as the first day it was put up.

REMEMBER that the words "Cole's Original Hot Blast from Chicago" appear on the feed door of the Original Patented Hot Blast stove. None genuine without this.
