TASK FOR THE TAX AGENTS

Union Pacific's Enormous Earnings Foor Argument for No Increases.

HARRIMAN SHOWS DIVIDENDS LARGER

Annual Report Indicates Total Surpluses and Equities Engued of Searly Forty-Eight Million Dollars.

nion Pacific tax agents have been put to work since the issuance of the company's annual report to figure out their new arguments against an increase in the company's taxes that will be as plausible as possible and as nearly compatible with the enormous multiplication of dividends which the stock of the corporation has produced in the year just passed.

Not only has the actual earning power of the railroad brought forth increased results, but the investments have done so as well, and President Harriman predicts that the company will realize an increase during the current year from investments. of \$4,000,000, of which \$2,500,000 will(nebwie from the Southern Pacific.

The Union Pacific's fiscal year closed June 20, and the report shows a total of surpluses and equities earned for the stock of \$42,711,283, or over 20 per cent on the common stock after the payment of 4 per cent on the preferred; it shows also a profit from the Northern Pacific transaction after deducting all coats of more than \$75,000,000, all of which as of June 30 had not been realized, however, and shows that at the close of the fiscal year the Union Pacific had an excess of current assets over current Habilities, that is say a working capital of more than \$100;-000,000, a large part of which was in the

form of cash and demand loans. By adding the profits on the Hill stocks sold during the year to the other surplus the total makes about 36 per cent for the ion stock, says the Wall Street Jour-

The report specifically differentiates between income from transportation operations and income from investments, and stress is laid on the fact that 6 per cent was paid on the common stock from transportation earnings and 2 per cent from investment earnings

Most Interesting Feature. The most interesting feature of the report is the balance sheet. This shows current assets of \$123,017,890, the greater part of which is in cash and receivables. Against this there was outstanding but \$31,401,662 of current Habilities, consisting chiefly of unpaid interest, coupons and divi-

An important feature of the report is the item "stocks and bonds owned" in the balance sheet carried at \$96,781,806. Without going into the details of the computation, analysis will show that such of these seprities as are in companies not auxiliary to the Union Pacific have a market value of very nearly \$210,000,000. In addition to these there are securities in companies which are auxiliary to the Union Pacific of

a value of about \$139,800,000. The sum of these securities carried in the Union Pacific treasury at a cost of \$96,781,806 appears to have a value of over \$348,000,000. This is sufficient commentary on the condition of the Union Pacific treas-

Even this does not measure the entire collateral wealth as distinguished from real property represented in the Union Pacific treasury. The \$101, 0,000 working capital must not be forgutten. This brings the total of the collateral wealth up to \$450,-

amount. If the Union Pacific wanted more money it has \$55,000,000 unpledged refunding bonds in its treasury besides.

OMAHA'S GROWTH SHOCKS Tremendous Development of City Astounding to Man from

Boomland In Colorado. J. S. Grable of Greeley, Colo., was an Omaha visitor Friday. He is an old-time resident of Nebraska and was for two terms mayor of Beatrice. He has been a resident of Colorado for about eight years.

You are having a little better weather here than we have had out in Celorado," said Mr. Grable. "We have had twenty-two inches of snow there this season already, but it is now about all gone. Business is in a high state of prosperity all through the state of Colorado. The crops at Greeley this year were the best ever grown in that region. A great many small farmers are coming into that section and irrigation is being rapidly extended all through that country.

"We ship lots of produce east and to Omaha, though Denver is naturally our chief market. West and north of us is the great sheep country of Colorado, and an mmense business is being done in that line, Many Nebraska people are residents of that locality, and all of them are getting rich.

This is my first visit to Nebraska for five years. I am astounded at the growth of Omaha. It bertainly has a great future before it as has all of Nebraska."
