Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, Dec. I.-Active demand by ash buyers of wheat for December delivery auged firmness today in that option, but cash buyers of wheat for December Celivery caused firmness today in that option, but selling by commission houses caused an easy feeling in the future deliveries. At the close May was off \$\( \) (2.00 close May was of were the heaviest for several years, the total amount aggregating 4.000,000 bu. The greater portion of the grain was put out by large elevator concerns and most of it was taken by prominent commission houses. When it became known that nearly all of the wheat had been taken by leading houses rumors of a big deal in the local market were revived. This was the chief reason underlying the demand for December wheat. News of the day was quite favorable to the bears the receipts in the northwest being in excess of those last year, primary receipts being larger and cables a trifle easier. The market closed irregular, December being firm, while the distant deliveries were easier. May opened a shade to 45c higher at 785c/785c, cold to 35c and declined to 775c, where it closed. December sold between 725c and 735c/735c and flowed at 725c. Clearances of wheat and flour were equal to 350,000 bu. Primary receipts were [023,000 bu., sagainst \$550,000 bu., for the same day last year. Minneapolis, Duluth and Chicago reported receipts of 701 cars, against \$550,000 bu. As a matter of fact, there were low spots and high spots, but for the week the market is fully steady and some would say stronger. As usual at this scason of the year, there is very little really desirable stuff coming and it is only occasionally that there is a load of anything that can be graded as choice. Thus not a single load of choice lambs has been on said this week, so that it is largely a matter of guess work what a really flushed bunch would bring.
